Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Citation:	22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description:	Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes:	Returned to compliance on 12/23/2014. The waste analysis plan is not current for the processes and wastes that are generated on site. The plan does not contain all of the required elements. The waste analysis plan must contain all of the elements specified in 22CCR 6265.13(b). Please develop a waste analysis plan and submit it to this Agency within 30 days.

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank

E.F.T. FAST QUALITY SERVICE INC. (Continued) **S128624480**

assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 07/07/2015. The tank assessment that was received by this Agency does not meet regulatory standards (see below).

Eval Notes: On site for routine recycler inspection. Consent to enter and inspect was given by Nobu Ueno. The facility collects process line rinse waters in a lined sump and then pumps them into the city water holding tank prior to treatment in the ion exchange columns. The resultant deionized water is held in the DI water holding tank until its return to the process line. The facility has previously claimed authorization for recycling activities under H&SC 25143.2(b). Based upon the activities observed on site, this exclusion from classification as a waste does not apply. Please review the process, determine a more appropriate authorizing provision of the H&SC, and complete the Recycling Activities form.

Eval Notes: This Agency has reviewed the PE assessment for hazardous waste tanks and secondary containment dated February 2013. The following deficiencies were noted: - The assessment does not include the tank used for cyanide batch treatment (destruction) and return recycle water holding tanks. The return recycle holding tanks were reported to be used for holding of waste water from ion exchange columns prior to treatment. - Design considerations with respect to anchoring and location within a seismic fault zone were not provided- 66265.192(a)(5). These considerations must include the calculations used to assess adequacy of the system design to withstand seismic events. - The assessment indicates the hazardous waste tanks are "existing tanks" in response to 66265.192(d). These tanks are reportedly 6 years old and are therefore subject to this requirement. The The secondary containment assessment indicates the tank integrity assessments and system records are maintained in [Truncated]

Eval Notes: PBR documents declined in CERS due to: Financial Assurance documents have been accepted. Permit by Rule Process Combination Requires Revision: - PBR-1: Process combination 14 appears to be more appropriate than combination 20 for the cyanide destruct process that is being conducted on site. Please review and revise. - PBR-2 and PBR-3: process combination 2 should include including pH adjust and precipitation for these treatment processes.

Eval Notes: On site for routine Permit by Rule inspection. The inspection was conducted with Nobu Ueno. Consent to enter, inspect, and take photographs was given by Mr. Ueno. The facility has notified this Agency of treatment activities under the PBR tier for metals removal from an aqueous solution. Process baths, effluent from the cyanide destruct tank, and effluent from regeneration of the ion exchange columns are treated via pH adjustment and precipitation prior to the filter press. Mr. Ueno confirmed that there have been no changes to the system and no releases in the previous three years. The following conditions were observed: drain board is available between the cyanide-containing process tanks and the rinse tanks, counter current rinsing is used following the cyanide-containing process tank. The following documents were are available for review: inspection log, written inspection schedule, waste analysis plan*, PE certification for secondary containment dated [Truncated]

Eval Notes: This Agency received the summary explanation of the recycling process with respect to rinse waters. All of the rinse waters that are recycled in the ion exchange unit were tested for pH and metals. With the exception of four of the rinse waters, the rinses are non-hazardous. The four rinse waters that were determined to be hazardous are due to pH =2. The facility stated that they are enacting a process change in order to allow the pH of three of the rinses to remain above 2. The rinse after the CirEtch 100 micro-etch has a pH of 2, which is hazardous. The facility has not addressed the recycling of this hazardous waste. Violation (R004) will remain outstanding. Please submit the required recycling materials report to this Agency or modify the process so that the pH of the rinse is above 2. If the process is to be modified, please provide documentation that indicates rinse is not hazardous for pH.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Hazardous Waste Summary:
Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

PRECISION CIRCUITS (Continued) **1000292563**

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Actual Return to Compliance Date: Not reported
Return to Compliance Qualifier: Not reported
Violation Responsible Agency: Not reported
Scheduled Compliance Date: Not reported
Enforcement Identifier: Not reported
Date of Enforcement Action: Not reported
Enforcement Responsible Agency: Not reported
Enforcement Docket Number: Not reported
Enforcement Attorney: Not reported
Corrective Action Component: Not reported
Appeal Initiated Date: Not reported
Appeal Resolution Date: Not reported
Disposition Status Date: Not reported
Disposition Status: Not reported
Disposition Status Description: Not reported
Consent/Final Order Sequence Number: Not reported
Consent/Final Order Respondent Name: Not reported
Consent/Final Order Lead Agency: Not reported
Enforcement Type: Not reported
Enforcement Responsible Person: Not reported
Enforcement Responsible Sub-Organization: Not reported
SEP Sequence Number: Not reported
SEP Expenditure Amount: Not reported
SEP Scheduled Completion Date: Not reported
SEP Actual Date: Not reported
SEP Defaulted Date: Not reported
SEP Type: Not reported
SEP Type Description: Not reported
Proposed Amount: Not reported
Final Monetary Amount: Not reported
Paid Amount: Not reported
Final Count: Not reported
Final Amount: Not reported

Evaluation Action Summary:
Evaluation Date: 20180322

PRECISION CIRCUITS (Continued) **1000292563**

Evaluation Responsible Agency:	State
Found Violation:	No
Evaluation Type Description:	COMPLIANCE EVALUATION INSPECTION
Evaluation Responsible Person Identifier:	Not reported
Evaluation Responsible Sub-Organization:	Not reported
Actual Return to Compliance Date:	Not reported
Scheduled Compliance Date:	Not reported
Date of Request:	Not reported
Date Response Received:	Not reported

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Violation Date: 04-23-2014
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes: Returned to compliance on 06/27/2017. The PE Certification for hazardous waste tanks and secondary containment dated 12/10/14 does not meet regulatory standards. The following deficiencies were noted: - Design standards, including material thickness and test method, piping, and pumps are not included - Hazardous waste characteristic(s) of the wastes are not included - Design considerations, including foundation, anchoring, and seismic calculations, are not included - Inspection for presence of weld cracks/breaks, punctures, scrapes of protective coating, and corrosion are not included - Ancillary equipment support and protection are not included - Ages of tanks are not included - Description of leak detection equipment is not included - Corrosion protection for T1 and ancillary equipment is not included - Estimated remaining service life of the tank system is not included - Evaluation of the secondary containment with respect to required elements of 22CCR 33265.193 are not included NOTE: The [Truncated]

Citation: 22 CCR 45 67450.11(a)(9) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(a)(9)
Violation Description: Failure of the generator to meet the following Permit by Rule requirements while treating soils contaminated with metals listed in 22 CCR 11 66261.24(a)(2): 1) The generator is not otherwise required to obtain a hazardous waste facilities permit or other grant of authorization for any other hazardous waste management activity at the facility; 2) Using only the following technologies as treatment and at the following quantity thresholds: A) Screening to separate components based on size and magnetic separation at a quantity of 45,000 pounds or more in any one month. B) Chemical stabilization at a quantity of 500 pounds or more in any one month.
Violation Notes: Returned to compliance on 01/14/2015. FTU-2 has not been closed but has been out of service for several years. The annual notification for PBR excludes FTU-2, as it only indicates one PBR unit. Please conduct closure activities of FTU-2 in accordance with the closure plan and 22CCR 67450.3(c)(11)(D/E/F/G). Closure must be completed within 60 days. Submit a copy of the PE certification for unit closure to this Agency within 60 days. If the facility is going to resume usage of this unit, please submit an amended notification to this Agency within 30 days.

Eval Type: Other, not routine, done by local agency
Eval Notes: This Agency received the following documents: - Waste analysis records - Annual PBR notification for 2015, 1 PBR unit - PE Certification for the hazardous waste tanks and containment dated 8/4/15 The waste analysis records indicate that only one of the waste streams is hazardous. The tin strip tk rinse tested for 42.2 mg/l of copper, pH is 5.0. The results are consistent with treatment under the CA tier, not PBR. If these results are representative of the wastes entering into the treatment system, the facility will need to notify that a CA unit is being operated on site instead of a PBR tier. Please submit revised notification documents to this Agency within 30 days if the lab analyses are from representative samples of the wastes being treated on site. The PE certification is incomplete and does not contain all of the required information. Please submit a revised certification that complies with 22 CCR 66265.192. Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection with Terry Carrier. Consent to enter, inspect, and take photographs was given by Sam Akbari (PCW). The facility generates sufficient quantities of RCRA hazardous waste to be regulated as a large quantity generator (LQG). It is also regulated for treatment under the permit by rule (PBR) tier. Observed facility and inspected hazardous waste storage. Containers are stored closed and properly labeled. Adequate aisle space is maintained. Process tank was labeled not in use but contained large amounts of crystalized hazardous waste. Tanks that are no longer being used must have all hazardous contents removed within 3 months of being taken out of service. See violation below. Training records were reviewed and accurate. The following documents are current and available for review: - Hazardous waste manifests - Contingency Plan - Hazardous waste area inspection log - SB 14 Source Reduction [Truncated]
Eval Division: Orange County Environmental Health

Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 04-23-2014
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: This is a follow up to the onsite inspection conducted on 3/11/14. During that inspection, violations were cited. The following violations remain outstanding: (P001) Failure to accurately notify this Agency regarding the number of treatment units on site (X016) Failure to revise the waste analysis plan to accurately reflect the wastes that are generated on site. Also this violation reflects the failure to follow the waste analysis plan with respect to testing intervals. Violation (X013) was cited due to the apparent closure of FTU-2 without following closure requirements. Please make a determination whether this unit will be closed or remain in use and notify this Agency as to the determination.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Address: 3315 W HARVARD ST
City,State,Zip: SANTA ANA, CA 92704
Site ID: 527341
CERS ID: 838200
CERS Description: Industrial Facility Storm Water

Violations:
Site ID: 527341
Site Name: Beo Mag Plating Inc
Violation Date: 06-13-2016
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Failure to Obtain Permit
Violation Notes: The facility failed to meet the conditions of the NEC, therefore considered a non-filer for failure to obtain IGP permit coverage
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Site ID: 527341
Site Name: Beo Mag Plating Inc
Violation Date: 06-13-2016
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Failure to meet NEC criteria
Violation Notes: Several poly tanks were in use and several totes were observed being stored outdoors (rear of the building) without Best Management Practice (BMP) implementation. Severe concrete etching in the storm swale was noted which indicates a history of spills and a lack of BMP implementation.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-13-2016
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff (RBS) conducted a no exposure certification (NEC) inspection of the above facility on June 13, 2016. RBS The facility gained NEC coverage on August 25, 2015. RBS observed industrial activity being conducted in the rear of the facility exposed to storm water. There were Several poly tanks were in use, several totes were observed being storageed outdoors without BMP implementation, and evidence of historic spills resulted in the storm swale etching of runoff from past storm water events. The facility currently does not meet the requirements of the NEC criteria as defined in the IGP and thus their NEC will be denied and a NNC will be issued.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
CEDRI is a web application used by EPA programs and various stakeholders to manage environmental data transmitted to EPA in order to meet EPA's reporting requirements.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-02-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine tiered permitting inspection. The inspection was conducted with Rudy Murillo of BEO. Consent to enter, inspect, and take photographs was given by Mr. Murillo. The facility conducts treatment of aqueous wastes with chrome, cyanide, and heavy metals. Four PBR units were identified: - PBR1: Aqueous waste with Ni, Cu, Zn. Continuous flow, with neutralization and precipitation. - PBR2: CN rinse water. CN destruct. - PBR3: Aqueous waste with Cu, Ni, plus alkaline cleaner. Batch treatment with neutralization and precipitation. - PBR4: Chrome rinse water. Cr reduction. Mr. Murillo confirmed that there have been no releases from the treatment system in the previous three years. All PBR tank systems were labeled with the required information. The following documents were available for review: written inspection schedule and logs, waste analysis plan and records, closure plan, sewer agency discharge records, Phase 1 [Truncated]

Eval Notes: On site for the CAL ARP re inspection to the routine inspection on 6-17-14. During that inspection, the RMP was past due. Permission to inspect granted by Beo-Mag/Murillo. Murillo stated that since the last RMP submittal, they have made process changes to the NaCN tank (tank # 24, copper strike). The tank was made smaller (160 gallons) and the NaCN concentration was reduced (average CN concentration of 8.3

BEO MAG PLATING (Continued) **S123079356**

oz/gallon and a high of 8.7 oz/gallon). This calculates out to an average of 83 lbs of NaCN and a high of 87 lbs of NaCN. This is below the TQ for NaCN of 100 lbs. The product NaCN is only brought into make up a new tank and is in flake form, therefore exempt from CAL ARP. If you keep you NaCN level below 100 lbs, then this facility will no longer be regulated under CAL ARP. If, at any time in the future, you make a process change that increases the NaCN to over 100 lbs, then you must have an RMP in place and notify this Agency immediately. This facility will [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-19-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Jesse Murillo of BEO-MAG Plating. Observed the facility and inspected hazardous materials storage. The inventory submitted in latest CERS submission matches what is observed on site. Business emergency plan is available on site for review. Training records are current and available for review. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds (200cuft compressed gas, 55 gal liquid, 500 lbs solid). If there is a change in the type or amount of chemicals that are maintained on site, please electronically submit revised documents within 30 days of the change.

BEO MAG PLATING (Continued) **S123079356**

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine tiered permitting inspection. The inspection was conducted with Diana Trujillo of BEO-MAG. The facility conducts treatment of aqueous wastes with chrome, cyanide, and heavy metals. Four PBR units were identified: - PBR1: Aqueous waste with Ni, Cu, Zn. Continuous flow, with neutralization and precipitation. - PBR2: CN rinse water. CN destruct. - PBR3: Aqueous waste with Cu, Ni, plus alkaline cleaner. Batch treatment with neutralization and precipitation. - PBR4: Chrome rinse water. Cr reduction. Mrs. Trujillo confirmed that there have been no releases from the treatment system in the previous three years. All PBR tank systems were labeled with the required information. The following documents were available for review: written inspection schedule and logs, waste analysis plan and records, closure plan, sewer agency discharge records, Phase 1 Environmental Checklist, annual employee training records for cyanide [Truncated]

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection with Terry Carrier. Consent to enter, inspect, and take photographs was given by Rudy Murillo of BEO-MAG Plating. The facility generates sufficient quantities of RCRA hazardous waste to be regulated as a large quantity generator (LQG). It is also regulated for treatment under the permit by rule (PBR) tier. Observed facility and inspected hazardous waste storage. Containers are stored closed and properly labeled. Adequate aisle space is maintained. Training records were reviewed and accurate. Contingency Plan was not up to date. Please see violation above. The following documents are current and available for

Eval General Type: Other/Unknown
Eval Date: 08-13-2014
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: This is a re inspection to the initial HMBEP inspection on 6-17-2014. Permission to re inspect granted by Beo-Mag/Murillo. Violations U102 and U109 listed on the 6-17-14 inspection report are abated with this inspection. Most of the chemicals on site match the submitted HMBEP. Several chemicals are no longer being used, are not listed on the HMBEP map or need to be listed on the map. See violations. Re submit the updated HMBEP with these corrections. Once re submitted correctly, the violations will be abated. Have all violations abated on/before 9-13-2014.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

BEO-MAG PLATING (Continued) **1012176448**

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

KOZWEL BOATWORKS INC (Continued) **1024688020**

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-14-2021
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS The facility inspection was conducted with James Bush of Kozwel Boatworks. Walked the interior and exterior of the facility to inspect the hazardous waste storage area and dumpster. Observed hazardous waste management practices and documentation including training records, manifests and contingency plan. No violation observed on this date.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS,

Eval General Type:	Other/Unknown
Eval Date:	11-04-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Received email inquiry regarding hazmat reporting requirements. Returned email with tips for completing disclosure and site map.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-14-2021
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS CERS ID: 10556107 Facility inspection conducted with James Bush of Kozwel Boatworks. Chemicals observed on this date match the CERS submission on 1/16/2020. Reviewed BEP and the site map with the business. CERS information verified. Explained to Mr. Bush to resubmit HMBEP in CERS for 2021. Reminder: Please re-certify your HMBP on or before March 1 at www.cers.calepa.ca.gov

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will

DIVERSIFIED FOAM PRODUCTS INC (Continued) **1016053120**

completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110071073991

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 386566
Site Name: DirecTV - LT1ZLB
Violation Date: 05-10-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 06/07/2017. No Hazardous Waste manifests were available for review on site. Please keep and maintain all hazardous waste manifests on site for at least 3 years. Send copies of manifests to your inspector, to abate this violation.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection. Consent to enter and inspect was given by Ron Kellman. Observed the facility and inspected hazardous waste storage. The containers are stored closed and properly labeled. Please be aware of chemical compatibility with respect to hazardous waste storage. An empty drum that is to be used for nitric acid waste was observed in the hazardous waste storage area that also contains sodium hydroxide waste and waste oil. Nitric acid will react with both sodium hydroxide and organics, and therefore the acid waste must be segregated from the basic and organic wastes. Please be sure to label containers used for the accumulation of universal waste with the following information: universal waste- fluorescent tubes. Generators of universal waste must

MICRO PRECISION SWISS ORCHID (Continued) **S113802008**

have the waste hauled within 1 year of beginning accumulation. No evidence of hazardous waste spillage or runoff was observed. Manifests and emergency plan [Truncated]

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

MICRO PRECISION SWISS LLC DBA (Continued) **1024692600**

storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated,

ORCHID ORTHOPEDICS SOLUTIONS (Continued) **1023323562**

transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Comments:	Not reported
Description:	RP States: Smoke was seen coming from a room in an unoccupied building. A fire occurred which deployed the overhead fire sprinklers causing a release of 10-15 gallons of diluted Nitric Acid and Sodium Dichromate from a passivation tank. There was no breach from the tank. It is believed that the tank overflowed due to the fire sprinklers. The release is contained and no longer releasing. No waterways were impacted and clean up will be conducted by Cal West Environmental Services.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information
