Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-07-2014

EXPRESS MANUFACTURING INC (Continued) **1000356567**

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous waste inspection. Consent to enter, inspect, and take photographs was given by Ed Lawlor. The facility, hazardous waste storage area, and process areas were inspected and the following conditions were observed: - All containers are stored closed. - One 55-gallon of fiberglass dust has an accumulation start date of 5/3/13 - Multiple boxes of aerosol cans and paint cans without hazardous waste labeling - Several 55-gallon drums that were not labeled for the hazardous property The facility utilizes a solder recovery system that separates the solder from the dross. The solder is reused on site and the dross is hauled as hazardous waste. If the facility recycles 220 pounds or more of solder/dross per month, a recyclable materials report will need to be submitted. The report can be located at http://occupainfo.com/civicax/filebank/blobdload.aspx?BlobID=14780 No hazardous waste was observed in the dumpster. Manifests and emergency [Truncated]

Environmental Interest/Information System:
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

Violation Description:	SW - Deficient BMP Implementation

ALUMINUM PRECISION PRODUCTS (Continued) **S103653616**

Violation Notes: Condensate waste container appears to have been allowed to overflow and spill onto ground. General neglect shown for housekeeping at north end of storage yard and in vicinity of bulk scrap storage bins. A broom needs to be made available for the shipping container fabrication area. Inappropriate use of granular absorbent for chronic leaks from stored machinery.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Site ID: 525973
Site Name: Aluminum Precision Products
Violation Date: 01-31-2018
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Late Report
Violation Notes: Failure to submit the Level 2 ERA Action Report by due date.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-27-2003
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: See attachment
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-26-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On March 26, 2001, under clear skies, at 1410 hrs the above referenced facility was inspected by Regional Board staff. Staff met with the facility's Plant Manager, Ron Awrey who escorted them through the non ferrous forgings plant. Review of the facility's SWPPP and training records revealed that the SWPPP was adequate but lacked documentation of any employee training. Mr. Awrey escorted RB staff around the facility's site. During the inspection, the following items of noncompliance were noted: A leaking water faucet collecting debris and creating a runoff problem, forklift tracking from waste oil storage area, metal chip and trimming debris throughout property, exposed machinery, exposed metal chip bins without cover. These bins were filled with metal shavings that had cutting oil residues on them, rain and gravity cause the oil to drain from the bottom of the bins and flow into the partially covered secondary containment area., dust, debris and metal shavings have collected in the facility's loading dock area that is nop longer used. Awrey said that rainwater accumulates in this area and they pump it directly out to Yale street.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-06-2012

ALUMINUM PRECISION PRODUCTS (Continued) **S103653616**

Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and sunny. Bulk liquid container found used to collect compressor condensate; found with heavy oily residue on top and on ground nearby; Contact speculates that container was allowed to overflow - committed to cleaning or replacing the tank. Numerous steel dies found rusting uncovered outside. Heavy accumulations of aluminum cuttings and other debris found among the dies and other stored machinery particularly near roll-off scrap bin. Unattended spills of aluminum cuttings consistently found near roll-off bins. Inappropriate use of granular absorbent found used on chronic leaks from stored machinery. Heavy accumulations of sawdust observed in shipping container fab area; no broom found available for cleanup. Contact was directed to start sampling for Fe and Al.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Case Development Inspection
Eval Date: 04-25-2001
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: On April 25, 2001 under clear skies, Board Staff Marc Brown and Zulakha Khan conducted a follow-up inspection at the above referenced facility. The two were escorted around the exterior of the facility by Ron Awrey. All items noted on the March 30, 2001 NOV issued by the Board had been sufficiently corrected. No further action shall be taken concerning this enforcement action.

Environmental Interest/Information System:

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Hazardous Waste Summary:

Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

SAFETY-KLEEN SYSTEMS, INC. (Continued) **1000224428**

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

Waste Code: D021
Waste Description: Chlorobenzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D023
Waste Description: O-Cresol

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D030
Waste Description: 2,4-Dinitrotoluene

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D034
Waste Description: Hexachloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

SAFETY-KLEEN SYSTEMS, INC. (Continued) **1000224428**

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D037
Waste Description: Pentachlorophenol

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: D041
Waste Description: 2,4,5-Trichlorophenol

Waste Code: D042
Waste Description: 2,4,6-Trichlorophenol

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

SAFETY-KLEEN SYSTEMS, INC. (Continued) **1000224428**

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Quarterly Update: QUARTERLY UPDATE Quarterly Update Period: September 2023 - December 2023 DTSC issued the first Notice of Deficiency (NOD) for the permit modification on September 15, 2023. The 1st NOD meeting was conducted on August 29, 2023. A Class 3 permit modification is underway to convert an existing underground storage tank used for product to a hazardous waste tank. Quarterly Update Period: April 1, 2023 - June 30, 2023 The facility is conducting the required 60-day public comment period, commenced on May 19, 2023, and ends on July 19, 2023, for submitting the class 3 permit mod. The modification request relates to addition of a second, existing, underground storage tank (UST) to the permit. Quarterly Update Period: January 1, 2023 - March 31, 2023 The facility is preparing a permit modification application to add a new underground storage tank to the permit. The facility is also working on the public notice documents for the required 60-day public comment period. FACILITY DESCRIPTION/ HISTORY Safety-Kleen Systems, Inc. (Safety-Kleen) began operation at the Santa Ana facility in 1968 to provide mineral spirit solvent reclamation and supply service for customers primarily engaged in vehicle repair shops, industrial maintenance, and dry cleaning. The Facility provides parts cleaning services, which involve parts degreasing units, consisting of a sink affixed to the top of a 16- or 30-gallon drum of cleaner solvent. Safety-Kleen is also engaged in providing generators with aqueous corrosive cleaners, and immersion cleaners (carburetor cleaner) for use in the degreasing units. The units are emptied and the hazardous materials are refilled by the Safety-Kleen truck operators at customer sites, and the trucks transport the used materials back to the Facility. The hazardous waste solvents from the Facility are eventually transported another permitted facility for recycling, treatment and/or disposal. The Facility stores and transfers hazardous wastes in drums/containers and tanks as described in Part IV of the existing Permit. The Permittee provides the following services which lead to the off-site generation of hazardous waste that the Permittee transports back to the Facility. 1. Aqueous-Based Parts Washing Solution 3. Safety-Kleen Immersion or Carburetor Cleaner Service 4. Safety-Kleen Dry Cleaner Service 5. Safety-Kleen Paint Collection Service 6. Safety-Kleen Used Oil Service 7. Safety-Kleen Used Antifreeze/Coolants Service 8. Miscellaneous Containerized Waste Services PERMITTING REGULATORY DESCRIPTION/ HISTORY On September 17, 1994, DTSC issued a Hazardous Waste Facility Permit to the Permittee. During the term of the Permit, the Permittee requested modifications to the Permit including the October 13, 1994 changes to the container stacking heights, the March 10, 1995 authorization to handle photographic wastes, the July 7, 1998 change of corporation name, the September 7, 2001 authorization to store paint, thinner and dry cleaning wastes, the February 21, 2002 authorization to store mineral spirits drum washer wastes, the September 5, 2002 replacement of one of the drum washer units, and the June 29, 2005 revisions to the waste analysis plan. The Permit expired on September 17, 2004, and renewed on May 23, 2007. The last permit issued on May 23, 2007 expired on May 23, 2017.The permit renewal application was submitted on December 23, 2016. DTSC has made a final decision to approve the Resource Conservation and Recovery Act (RCRA) Equivalent Hazardous Waste Facility Permit (Permit) for Safety-Kleen Systems, Inc. located at 2120 South Yale Street, Santa Ana, California 92704. DTSC issued technical completeness letter for the permit renewal application on

SAFETY-KLEEN SYSTEMS, INC. (Continued) **1000224428**

April 3, 2019.The draft Permit was released for public comment from April 5, 2019 through May 24, 2019. No public comments were received. The Permit became effective on July 27, 2019. The Permit duration is ten years and will expire

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date:	05-18-2020
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 06/04/2020.
Violation Division:	Orange County Environmental Health
Violation Program:	UST

Site Name:	SK Santa Ana
Violation Date:	03-29-2018
Citation:	HSC 6.7 Multiple - California Health and Safety Code, Chapter 6.7, Section(s) Multiple
Violation Description:	UST Program -General - Must include violation description, proper statute and regulation citation in the "comment" section.
Violation Notes:	Returned to compliance on 12/26/2018. According to Title 23 Section 2631(a) "Primary containment shall be product tight." As seen in the attached photographs taken during the inspection, the primary piping is leaking material into the turbine sump of Tank #1. The material is crystallizing inside the sump and on the primary piping, clearly indicating that the primary containment is not "product tight". Please

SAFETY-KLEEN SYSTEMS, INC. (Continued) **1000224428**

remove the crystallized material from the sump and dispose of it as hazardous waste. Please submit the hazardous waste manifest with that material to this agency within 30 days. Please seal your primary piping to make the primary containment product tight. Please submit proof of these repairs to this agency within 30 days. Please check ochealthinfo.com to determine if your repairs require a plan check.

Site Name: SK Santa Ana
Violation Date: 05-03-2016
Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715
Violation Description: Failure to comply with one or more of the designated operator monthly inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and maintenance has been completed and documented.
Violation Notes: Returned to compliance on 03/08/2017. The designated operator monthly reports are insufficient due to: - The alarm history only includes sensors L1-L12. L17-L24 (UDC sensors) are not included. - Spill bucket inspection information is incomplete for the July 2015, August 2015, and November 2015 reports. No follow up details are provided. Please obtain the complete alarm history for the next monthly report and submit it, along with a copy of the report, to this Agency, within 30 days. Please ensure that all fields are completed accurately, and that any required follow up activity is documented.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 12-08-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Submittal declined in CERS due to: Tank Information and Monitoring - Waste 4N1: piping system type is gravity. - Leak sensor model for the waste 4N1 piping sump is incorrect. - UDC monitoring: the UDCs are single-walled and do not have secondary containment or monitoring on that containment. NOTE: submittal indicates monitor is programmed for positive shutdown and fail safe, and also indicates that a pipe integrity test will be conducted annually. Certification of Financial Responsibility: please complete the form by providing the name of the tank owner or operator in section B. Provide a copy of the insurance policy that indicates coverage for pollution liability for underground storage tanks with an adequate coverage amount. Plot Plan: include location of piping for waste tank

Eval Notes: INSPECTOR COMMENTS This Agency received the following documents: - Monitoring system certification dated 3/18/2020 - Spill container test report dated 3/18/2020 - Overfill prevention testing dated 3/18/2020 Results indicate that the T1 Line Leak Detector failed testing. Violation I198 remains outstanding. Results indicate the T3 spill container failed testing. Violation I355 remains outstanding. All other components passed testing. Retesting for failed components is scheduled for May 26th, 2020.

Eval Notes: SR0124379 On site for final inspection for repairs to UDC containment, installation of UDC monitoring equipment, and replacement of sensor T2 sump. The facility has 8 metal pans at grade that serve as containment for the pressurized piping of the solvent-dispensing system. Pans that initially failed testing were sealed with a 2-part marine coating (sections 1, 4, 7, 8). Eight Veeder Root m#208 sensors were installed for UDC monitoring. A m#205 sensor in the T2 sump was replaced with m#208. The secondary piping for the solvent was affixed with a containment fitting to complete the secondary containment behind the building where the piping exits the ground. The UDC sensors were submerged in fluid, triggering an audible/visual alarm and turbine shutdown on both pressurized systems. The sensor in the T2 sump also triggered audible/visual alarm and turbine shutdown. The UDCs were tested hydrostatically. UDCs 1, 2, 3, 4, 6, and 8 passed two consecutive 15-minute tests. Eval Notes: This Agency reviewed the Certification of Financial Responsibility submitted to the eSubmit Portal. The insurance document that was provided does not include UST liability, therefore the submittal has been declined. The following violations were cited on previous inspection reports and remain outstanding: (TF02) Secondary containment has not been tested every three years (TO01) Failure to monitor the UST system (UDC area) (TR02) Failure to submit UST documents to electronic database (TR05) Failure to submit valid UST financial responsibility (TR10) Failure to submit DO owner statement indicating the designated operator for the facility Please correct these violations immediately. Failure to comply with UST laws and regulations may result in loss of permit to operate and/or enforcement action by this Agency.

Eval Notes: INSPECTOR COMMENTS On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has three double-walled tanks monitored by a Veeder Root TLS350 system. The following tank systems/components are installed: - Tank #1, Armakleen 4-in-1 solvent with double-walled pressurized piping to dispensing nozzle - Tank #2, waste aqueous-based cleaning solvent, double-walled gravity feed piping - Tank #3, 150 petroleum naphtha solvent, double-walled pressurized piping to dispensing nozzle The monitor is operational for audible and visual alarms. Positive shutdown and fail-safe programming was verified for the systems with pressurized piping. In-tank probes are used for overfill prevention and were verified to create an external audible and visual alarm at 90% tank capacity. The sensors in tank annulars, turbine sumps, manway sumps, fill sumps, and dispensors all shutdown the turbines when submerged in liquid. The mechanical [Truncated]

Eval Notes: INSPECTOR COMMENTS Onsite to conduct aboveground petroleum storage tank APST inspection. The following were observed: - 8000 gallons of Oils (drums and totes) Storage has secondary containment. The SPCC Plan was reviewed. The plan was self-certified. The SPCC plan listed 9,900 gallons of aboveground petroleum product. The facility intentionally keeps the storage of oils below 10,000 gallons. If the facility has more than 10,000 gallons of aboveground petroleum product on site, Safety Kleen will have to get a full SPCC plan completed that is certified by a Professional Engineer. If the facility has less than 10,000 gallons of aboveground petroleum, please adjust your current SPCC plan. Any SPCC plan must be re-certified every 5 years. Training records and monthly inspection records were reviewed.

SAFETY-KLEEN SYSTEMS, INC. (Continued) **1000224428**

monitored by a Veeder Root TLS350 system. The following tank systems/components are installed: - Tank #1, Armakleen 4-in-1 solvent with double-walled pressurized piping to dispensing nozzle - Tank #2, waste aqueous-based cleaning solvent, double-walled gravity feed piping - Tank #3, 150 petroleum naphtha solvent, double-walled pressurized piping to dispensing nozzle The monitor is operational for audible and visual alarms. Positive shutdown and fail-safe programming was verified for the systems with pressurized piping. In-tank probes are used for overfill prevention and were verified to create an external audible and visual alarm at 90% tank capacity. The sensors in tank 1 and 3 annulars, turbine sumps, manway sumps, fill sumps, and UDCs all shutdown the turbines when submerged in liquid. The sensors in the waste solvent tank [Truncated]

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Preparer of Incident Report:	Other-Compliance MGR
Description of Events:	While unloading trailer employee discovered a leak / spill from a 55 gallon metal drum. The employee immediately contained spill with absorbent mitigated drum by turning it over and reclaimed material for proper disposal. The material released from a pinhole in the drum's seam. Pinhole location is near the bottom of the drum. The damage(pinhole)to the drum is unkwown.
Recommendations/Actions Taken:	Recommend reviewing pre-loading inspection of freight with employees for adequacy.

Remarks:

a warehouseman moving drums with a forklift in temporary storage dropped a 55 gallon drum onto a concrete floor. when the drum struck the floor top cracked releasing six gallons of waste. the warehouseman overpacked the leaking drum and absorbed the spilled material. this spill created sixty pounds of waste that was transported, along with the original waste, to the safety-kleen facility at 5756 alba st, los angles, ca for treatment/disposal. the warehouseman was counseled to use more care when moving drums with the forklift.

Remarks:

THE DRIVER CAME INTO THE FACILITY AND DID NOT CHECK HIS LOAD OR UNLOAD HIS TRUCK BEFORE LEAVING FOR THE WEEKEND. ONE OF THE DRUMS OF WASTE TETRACHLOROETHYLENE HAD TIPPED OVER AND BEGUN TO LEAK DUE TO A BAD GASKET. THE DRUM WAS DISCOVERED THE FOLLOWING WEEK WHEN THE TRUCK WAS BEING UNLOADED AND ONE GALLON OF MATERIAL HAD SPILLED INTO THE BACK OF THE TRUCK. THE SPILL WAS IMMEDIATELY CLEANED UP WITH ABSORBENT MATERIAL AND CONTAINERIZED. THE SPILL GENERATED APPROXIMATELY 10 POUNDS OF WASTE WHICH WAS TREATED, ALONG WITH THE ORIGINAL WASTE, AT THE SAFETY-KLEEN FACILITY AT 2120 SOUTH YALE STREET IN SANTA ANA, CA. THE DRIVER WAS COUNSELED ON PROPER DRUM INSPECTION AND BLOCKING PROCEDURES TO ENSURE NO MORE FUTURE INCIDENTS.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-26-2003
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Inspection notes too long (see attachment).
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Case Development Inspection
Eval Date: 01-11-2011
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Site is neat and orderly; no grease cleaning parts found outside except for one motorized part whose body was covered and in good condition. Gutters appeared to have been repaired as reported by Contact, except for a broken seam on western bulding. Wall beneath the seam is stained and their is a hole in the wall that may allow rainwater to enter their storage areas. Will need to inspect following a storm to see if rain enters. A large portion of the yard has been repaved and asphalt curbs added to control runoff. A dead sump was added to the west gate discharge point; Contact was reminded to note changes in the SWPPP. The automatic gate motor was removed a few days earlier and is stored outside uncovered; greased gears exposed. Contact stated this would be disposed of in a few days.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

SAFETY KLEEN CORP SANTA ANA BRA (Continued) **S124439903**

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-20-2010
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Site distributes cleaning equipment and chemicals to customers and collects and disposes of the resulting hazardous waste. Principle BMP is to conduct waste handling indoors or under cover. Building has zero overhang and relies on a gutter to prevent rainwater from entering bay doors where materials are handled. Observed water inside on floor in one bay door and evidence that water was running down exterior wall of building where a hole might allow water to enter building. Inspected rain gutter and found some sections sagging with aggregate and debris; loose/disconnected joints; and gutter coming loose from building. Contact committed to having gutter serviced in 30 days. Found used parts-washing equipment stored outside coated with residues from auto parts washing. Contact's colleague explained that these items are normally brought indoors on receipt. Items had been dropped off earlier this morning (when it had rained; rainwater was pooled in some of the items) but they were shortstaffed and the items were not brought in. Colleague committed to moving items inside that day.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

BRAVO CORP H W SITE (Continued) **1000273238**

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System

SWIFT HEALTH SYSTEMS INC DBA INBRACE (Continued) **1027062974**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Site History:	The South Coast Business Center (SCBC) is located at 3400-3500 West Warner Avenue in Santa Ana, California. Soil and groundwater at the Site are contaminated with TCE cis-1,2-DCE. Contaminants in the groundwater are present primarily in the shallow aquifer. Lower levels od cis-1,2-DCE (27 ppb) were detected in a monitoring well screened in deeper aquifer in December 2003. Numerous groundwater investigations have been performed on-site and off-site. FS/RAP prepared and submitted in November 2005. A revised RAP was submitted in May 2007. A Remedial Injection (emulsified vegetable oil) Summary report was submitted in December 2010.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110071067775

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

CERS ID: 10537900
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 419322
Site Name: HUNT ENTERPRISES
Violation Date: 11-22-2021
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 11/22/2021. No HMBEP was submitted in CERS. Assisted business with HMBEP during on site inspection. Violation abated on site.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-09-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: FA0025952 Hunt Enterprises, 2030 S Susan St, Santa Ana 92704 INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Dan Hunt. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Propane - Lubricating oils, various - Machine coolant - Waste machine coolant REQUIREMENT FOR ELECTRONIC SUBMITTAL OF HMBEP DOCUMENTS: This report serves as notice that the facility must submit the following documents electronically within 30 days of this report: - Business Emergency Plan - Hazardous Materials Inventory - Site Map The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised [Truncated]
Eval Division: Orange County Environmental Health

LERNER PROCESSING LABS INC (Continued) **1000596270**

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110070926033

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	595688
Site Name:	E.F.T. Fast Quality Service Inc.
Violation Date:	04-12-2018
Citation:	22 CCR 15 66262.41 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66262.41
Violation Description:	Failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC by March 1st on even numbered years ; and maintain it onsite for three years.
Violation Notes:	Returned to compliance on 04/19/2018. A current Biennial Report is not available on site for review. Please send a copy of the updated Biennial Report to this agency within 30 days.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS,

Site ID:	595688
Site Name:	E.F.T. Fast Quality Service Inc.
Violation Date:	02-05-2014
Citation:	22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description:	Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made

E F T FAST QUALITY SERVICE INC (Continued) **S113174567**

	available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes:	Returned to compliance on 12/23/2014. The waste analysis plan is not current for the processes and wastes that are generated on site. The plan does not contain all of the required elements. The waste analysis plan must contain all of the elements specified in 22CCR 6265.13(b). Please develop a waste analysis plan and submit it to this Agency within 30 days.

Violation Program: HWLQG
Violation Source: CERS,

Site ID: 595688
Site Name: E.F.T. Fast Quality Service Inc.
Violation Date: 02-05-2014
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 12/23/2014. It has not been determined whether the process chemicals or rinse waters are hazardous prior to treatment or recycling. Please evaluate all of the waste chemicals and rinses that are processed in the Permit by Rule treatment system or ion exchange recycling system. These solutions must be evaluated for pH and Title 22-regulated heavy metals (TTLC testing using a state certified laboratory). Please submit laboratory results for the waste process solutions and waste rinse waters to this Agency within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 595688
Site Name: E.F.T. Fast Quality Service Inc.
Violation Date: 02-14-2014
Citation: 22 CCR 45 67450.11(d)(4)(D) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(4)(D)
Violation Description: Failure of the owners or operators treating cyanide waste solutions to provide initial and annual training to employees, who handle cyanide process solutions, cyanide-containing rinse waters, or manage cyanide-containing aqueous waste, on how to reduce wastes in the production area, including, but not limited to, procedures to: A) Reduce drag-out of plating baths, B) Minimize contaminants in process baths, C) Extend process bath life, D) Minimize chemical spills and splashes from process and rinse solutions handling practices, and E) Respond to chemical spills to reduce waste and minimize releases from process and rinse solutions handling practices.
Violation Notes: Returned to compliance on 04/24/2014. Annual training for employees who handle cyanide solutions and wastes is not conducted. Please conduct the training and submit documentation of the training to this Agency within 30 days. If the training has been conducted within the previous year, please submit a copy of the training record.

E F T FAST QUALITY SERVICE INC (Continued) **S113174567**

	Chapter 15, Section(s) 66265.191(e)
Violation Description:	Failure of the generator conducting CE, CA, or PBR treatment activity to annually obtain and maintain a current P.E. assessment of the existing Hazardous Waste tank systems which lacks secondary containment meeting the requirements of section 66265.193. The P.E. assessment shall determine that the tank system is adequately designed and has sufficient structural strength and compatibility with the waste(s) to be transferred, stored or treated to ensure that it will not collapse, rupture, or fail. At a minimum, this assessment shall include all elements of the tank integrity assessment.
Violation Notes:	Returned to compliance on 06/20/2018. The latest PE Certification available is dated February 3013. An updated PE Certification is required every 5 years. Please provide this agency with a copy of a new PE Certification within 30 days.

Violation Date: 02-05-2014
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.
Violation Notes: Returned to compliance on 12/23/2014. The previous Recyclable Materials Report that was received from the facility is dated 2008. The form is to be submitted by July1, in even-numbered years. Please submit the completed form to this Agency within 30 days. The form can be found at http://occupainfo.com/civicax/filebank/blobdload.aspx?BlobID=14780

Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes:	Returned to compliance on 12/23/2014. Please conduct testing according to the waste analysis plan and provide copies of the records to this Agency within 30 days.

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Facility training records do not contain the required information. Please revise the documents so that they contain the qualifications and training requirements for each position that is related to hazardous waste handling and/or management. Submit the revise document to this Agency within 30 days.

Eval Notes: On site for routine recycler inspection. Consent to enter and inspect was given by Nobu Ueno. The facility collects process line rinse waters in a lined sump and then pumps them into the city water holding tank prior to treatment in the ion exchange columns. The resultant deionized water is held in the DI water holding tank until its return to the process line. The facility has previously claimed authorization for recycling activities under H&SC 25143.2(b). Based upon the activities observed on site, this exclusion from classification as a waste does not apply. Please review the process, determine a more appropriate authorizing provision of the H&SC, and complete the Recycling Activities form.

Eval Notes: This Agency has reviewed the PE assessment for hazardous waste tanks and secondary containment dated February 2013. The following deficiencies were noted: - The assessment does not include the tank used for cyanide batch treatment (destruction) and return recycle water holding tanks. The return recycle holding tanks were reported to be used for holding of waste water from ion exchange columns prior to treatment. - Design considerations with respect to anchoring and location within a seismic fault zone were not provided- 66265.192(a)(5). These considerations must include the calculations used to assess adequacy of the system design to withstand seismic events. - The assessment indicates the hazardous waste tanks are "existing tanks" in response to 66265.192(d). These tanks are reportedly 6 years old and are therefore subject to this requirement. The The secondary containment assessment indicates the tank integrity assessments and system records are maintained in [Truncated]

Eval Notes: This Agency received the summary explanation of the recycling process with respect to rinse waters. All of the rinse waters that are recycled in the ion exchange unit were tested for pH and metals. With the exception of four of the rinse waters, the rinses are non-hazardous. The four rinse waters that were determined to be hazardous are due to pH =2. The facility stated that they are enacting a process change in order to allow the pH of three of the rinses to remain above 2. The rinse after the CirEtch 100 micro-etch has a pH of 2, which is hazardous. The facility has not addressed the recycling of this hazardous waste. Violation (R004) will remain outstanding. Please submit the required recycling materials report to this Agency or modify the process so that the pH of the rinse is above 2. If the process is to be modified, please provide documentation that indicates rinse is not hazardous for pH.

Citation: 22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description: Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes: Returned to compliance on 12/23/2014. The waste analysis plan is not current for the processes and wastes that are generated on site. The plan does not contain all of the required elements. The waste analysis plan must contain all of the elements specified in 22CCR 6265.13(b). Please develop a waste analysis plan and submit it to this Agency within 30 days.

Eval Type: Routine done by local agency
Eval Notes: On site for routine recycler inspection. Consent to enter and inspect was given by Nobu Ueno. The facility collects process line rinse waters in a lined sump and then pumps them into the city water holding tank prior to treatment in the ion exchange columns. The resultant deionized water is held in the DI water holding tank until its return to the process line. The facility has previously claimed authorization for recycling activities under H&SC 25143.2(b). Based upon the activities observed on site, this exclusion from classification as a waste does not apply. Please review the process, determine a more appropriate authorizing provision of the H&SC, and complete the Recycling Activities form.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection. Consent to enter, inspect, and take photographs was given by Nobu Ueno. Also present were Darwin Cheng (OCHCA) and Tom Scimeca (EFT). The facility generates sufficient quantities of federally-regulated hazardous waste to be regulated as a RCRA large quantity generator (LQG). The facility currently treats hazardous waste onsite under the permit by rule (PBR) tier. Cyanide waste, acidic solutions with metals, and electroless nickel solutions are treated on site. Observed the facility, production areas, treatment areas, hazardous waste storage areas, and dumpster area. The following conditions were observed: - All containers of hazardous waste were stored closed and properly labeled. - All hazardous waste accumulation dates were within 90 days, or 365 days for satellite storage. - No hazardous waste spillage or runoff was observed. The following documents are available for review: hazardous waste [Truncated]

Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: This Agency has reviewed the PE assessment for hazardous waste tanks and secondary containment dated February 2013. The following deficiencies were noted: - The assessment does not include the tank used for cyanide batch treatment (destruction) and return recycle water holding tanks. The return recycle holding tanks were reported to be used for holding of waste water from ion exchange columns prior to treatment. - Design considerations with respect to anchoring and location within a seismic fault zone were not provided- 66265.192(a)(5). These considerations must include the calculations used to assess adequacy of the system design to withstand seismic events. - The assessment indicates the hazardous waste tanks are "existing tanks" in response to 66265.192(d). These tanks are reportedly 6 years old and are therefore subject to this requirement. The The secondary containment assessment indicates the tank integrity assessments and system records are maintained in [Truncated]

Eval Notes: Inspector Comments: Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification for this facility. The 2016 Closure Cost Estimate (CCE) of $5008.63 is not properly calculated. The 2016 CCE should be, at a minimum, your 2015 CCE multiplied by an inflation factor of 1.009. Your 2015 CCE was submitted and approved at $4962.97. Therefore, your minimum 2016 amount must be $4962.97x 1.009 = $5007.64. Corrected Certification Of Financial Assurance Form and Estimated Closure Cost form must be submitted by 4/8/16.

Eval Notes: INSPECTOR COMMENTS On site for routine Permit by Rule inspection with Michael Palazzola. The inspection was conducted with Nobu Ueno. Consent to enter, inspect, and take photographs was given by Mr. Ueno. The facility has notified this Agency for 3 PBR units. All batch treatment is conducted in same tank. Only one type of waste is treated at a time. The three PBR treatments are: - Cyanide destruction, batch treatment - Acid solutions with metals, batch treatment - Electroless nickel solution, batch treatment There have been no changes to the system and no releases in the previous three years. The process lines and treatment units were inspected. The treatment units were properly maintained and inspected on a proper schedule. The following documents were available for review: - Inspection schedule and log - Annual notification documents and acknowledgment letter - Closure plan - Sewer agency discharge records - Phase I checklist - PE certification [Truncated]

Eval Notes: This Agency received the summary explanation of the recycling process with respect to rinse waters. All of the rinse waters that are recycled in the ion exchange unit were tested for pH and metals. With the exception of four of the rinse waters, the rinses are non-hazardous. The four rinse waters that were determined to be hazardous are due to pH =2. The facility stated that they are enacting a process change in order to allow the pH of three of the rinses to remain above 2. The rinse after the CirEtch 100 micro-etch has a pH of 2, which is hazardous. The facility has not addressed the recycling of this hazardous waste. Violation (R004) will remain outstanding. Please submit the required recycling materials report to this Agency or modify the process so that the pH of the rinse is above 2. If the process is to be modified, please provide documentation that indicates rinse is not hazardous for pH.

Citation: 22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description: Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes: Returned to compliance on 12/23/2014. The waste analysis plan is not current for the processes and wastes that are generated on site. The plan does not contain all of the required elements. The waste analysis plan must contain all of the elements specified in 22CCR 6265.13(b). Please develop a waste analysis plan and submit it to this Agency within 30 days.

Eval Notes:	On site for routine recycler inspection. Consent to enter and inspect was given by Nobu Ueno. The facility collects process line rinse waters in a lined sump and then pumps them into the city water holding tank prior to treatment in the ion exchange columns. The resultant deionized water is held in the DI water holding tank until its return to the process line. The facility has previously claimed authorization for recycling activities under H&SC 25143.2(b). Based upon the activities observed on site, this exclusion from classification as a waste does not apply. Please review the process, determine a more appropriate authorizing provision of the H&SC, and complete the Recycling Activities form.

Eval Notes: This Agency has reviewed the PE assessment for hazardous waste tanks and secondary containment dated February 2013. The following deficiencies were noted: - The assessment does not include the tank used for cyanide batch treatment (destruction) and return recycle water holding tanks. The return recycle holding tanks were reported to be used for holding of waste water from ion exchange columns prior to treatment. - Design considerations with respect to anchoring and location within a seismic fault zone were not provided- 66265.192(a)(5). These considerations must include the calculations used to assess adequacy of the system design to withstand seismic events. - The assessment indicates the hazardous waste tanks are "existing tanks" in response to 66265.192(d). These tanks are reportedly 6 years old and are therefore subject to this requirement. The The secondary containment assessment indicates the tank integrity assessments and system records are maintained in [Truncated]

Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection with Michael Palazzola. Consent to enter, inspect, and take photographs was given by Nobu Ueno. The facility generates sufficient quantities of RCRA hazardous waste to be regulated as a large quantity generator (LQG). It is also regulated for treatment under the permit by rule (PBR) tier. Observed facility and inspected hazardous waste storage. Containers are stored closed and properly labeled. Adequate aisle space is maintained. A current Biennial Report was not available for review on site. Please see violation below. Current training records were not available for review on site. Please see violation below. The following documents are current and available for review: - Hazardous waste manifests - Contingency Plan - Hazardous waste area inspection log - SB 14 Source Reduction documents

Eval Notes: This Agency received the summary explanation of the recycling process with respect to rinse waters. All of the rinse waters that are recycled in the ion exchange unit were tested for pH and metals. With the exception of four of the rinse waters, the rinses are non-hazardous. The four rinse waters that were determined to be hazardous are due to pH =2. The facility stated that they are enacting a process change in order to allow the pH of three of the rinses to remain above 2. The rinse after the CirEtch 100 micro-etch has a pH of 2, which is hazardous. The facility has not addressed the recycling of this hazardous waste. Violation (R004) will remain outstanding. Please submit the required recycling materials report to this Agency or modify the process so that the pH of the rinse is above 2. If the process is to be modified, please provide documentation that indicates

E F T FAST QUALITY SERVICE INC (Continued) **S113174567**

rinse is not hazardous for pH.
