Environmental Interest/Information System:
The Used Oil Recycling System (UORS) is managed by the California Integrated Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	384648
Site Name:	ALLOY TECH ELECTROPOLISHING INC
Violation Date:	03-21-2017
Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include one or more elements in the Contingency Plan including but not limited to the following: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities, evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes:	Returned to compliance on 04/11/2017. The Contingency Plan was incomplete. Missing emergency response phone numbers and nearest Hospital information. Please add the nearest hospital information and other emergency response information to complete.

Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS,

Site ID: 384648
Site Name: ALLOY TECH ELECTROPOLISHING INC
Violation Date: 01-17-2014
Citation: 22 CCR 15 66265.193 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.193
Violation Description: Failure of the LQG and/or TP generator, on all new and existing hazardous waste tank systems and ancillary equipment, to meet the following secondary containment requirements: 1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and 2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed. 3) Constructed of or lined with materials that are compatible with the waste(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrological forces), physical contact with the waste to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation (including stresses from nearby vehicular traffic); 4) Placed on a foundation or base capable of providing support to the secondary containment system and resistance to pressure gradients above and below the system and capable of preventing failure due to settlement, compression, or uplift; 5) Provided with a leak detection system that is designed and operated so that it will detect the failure of either the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the existing detection technology or site conditions will not allow detection of a release within 24 hours; 6) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health or the environment, if removal of the released waste or accumulated precipitation cannot be accomplished within 24
Violation Notes: Returned to compliance on 04/04/2014. The facility has an inspection log but it does not contain all of the required elements. Please amend the current log or create a new one that contains the following elements: Date and time of inspection, name of inspector, notation of observations, date and nature of any repairs.

Violation Source: CERS,

Site ID: 384648
Site Name: ALLOY TECH ELECTROPOLISHING INC
Violation Date: 07-15-2024
Citation: 22 CCR 15 66262.41 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66262.41
Violation Description: Failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC by March 1st on even numbered years ; and maintain it onsite for three years.
Violation Notes: Returned to compliance on 07/24/2024. OBSERVATION: The 2024 Biennial

ALLOY TECH ELECTROPOLISHING INC (Continued) **S113017629**

report was not prepared and submitted to DTSC. A generator who ships any hazardous waste offsite to a TSDF within the United States shall prepare and submit a Biennial Report, U.S. EPA Form 8700, to the DTSC by March 1 of each even-numbered year, and shall cover generator activities during the previous calendar year.

Violation Date: 03-21-2017
Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description: Failure to place wastes or treatment reagents in a tank system that could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail; and for not using appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. (Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure).
Violation Notes: Returned to compliance on 03/27/2017. Crystalized Filter Cake waste was found inside of the secondary containment for the Filter Press under the wood planks. This Filter Cake needs to be removed daily and disposed of in the Filter Cake container as Hazardous Waste. If Filter Cake is not removed from this secondary containment daily, the secondary containment will be regulated as a Hazardous Waste tank.

Violation Description: RCRA Large Quantity Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 03/09/2016. I316- VIOLATION- GENERAL OPERATIONS. Generator does not comply with Article 10 (Tank Management Standards) 22CCR 6262.34(a)(1), 67450.3(c)(9)(F). Process area containment areas are filled with process chemical dragout and rinsate. The pH of the electropolishing containment liquid was between 1-2. The floors slope to a low point and are pumped to the treatment system. Containment areas are regulated as hazardous waste tanks unless the hazardous waste is removed within 24 hours. Please remove all waste from the containment areas daily or comply with all of the applicable tank management standards found in 22CCR, Division 4.5, Chapter 15, Article 10.

Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes:	Returned to compliance on 06/03/2014. The tank system was last certified in December 2008. Please obtain and maintain available for review a written assessment/certification that attests the integrity of each on site hazardous waste storage tank and secondary containment system. The certification must be conducted every five years. It must be reviewed and certified by an independent, qualified professional engineer, registered in California.

Violation Date: 03-21-2017
Citation: 22 CCR 15 66262.41 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66262.41
Violation Description: Failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC by March 1st on even numbered years ; and maintain it onsite for three years.
Violation Notes: Returned to compliance on 04/11/2017. Failure to complete Biennial Report. Biennial Report on site is from 2014 and was due again in 2016. No 2016 Biennial Report was completed. Complete another Biennial Report immediately.

Citation: 22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description: Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes: Returned to compliance on 04/04/2014. Please prepare a waste analysis plan that includes the following: 1) Parameters for each hazardous waste to be analyzed and the rationale for selection of these parameters 2) Analytical method that will be used to test for these parameters 3) Sampling and sampling management methods which will be used to obtain a representative sample of the waste to be analyzed

Violation Date: 01-17-2014
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes: Returned to compliance on 04/04/2014. Please obtain the following waste analysis records: chemical analyses, lab reports, and other documents specified in the waste analysis plan.

Citation: 22 CCR 15 66265.193 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.193
Violation Description: Failure of the LQG and/or TP generator, on all new and existing hazardous waste tank systems and ancillary equipment, to meet the following secondary containment requirements: 1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and 2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed. 3) Constructed of or lined with materials that are compatible with the waste(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrological

ALLOY TECH ELECTROPOLISHING INC (Continued) **S113017629**

forces), physical contact with the waste to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation (including stresses from nearby vehicular traffic); 4) Placed on a foundation or base capable of providing support to the secondary containment system and resistance to pressure gradients above and below the system and capable of preventing failure due to settlement, compression, or uplift; 5) Provided with a leak detection system that is designed and operated so that it will detect the failure of either the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the existing detection technology or site conditions will not allow detection of a release within 24 hours; 6) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health or the environment, if removal of the released waste or accumulated precipitation cannot be accomplished within 24

Violation Notes: Returned to compliance on 04/04/2014. Please amend the current schedule or create a new one that contains the following elements: The inspection schedule for the facility must include the following: 1) Items to be inspected: monitoring equipment, safety and emergency equipment, security devices, operating and structural equipment (such as dikes or sump pumps) 2) Types of problems which are to be looked for during the inspection (eg: inoperative sump pump, leaking fitting, eroding containment) 3) Frequency of inspection

Eval Notes: Alloy Tech Alloy Tech, 2220 S Huron Dr, Santa Ana 92704 On site for routine Permit By Rule inspection. The inspection was conducted with Ben Kochmanski and Albert Morales of Alloy Tech. Consent to enter, inspect, and take photographs was given by Mr. Kochmanski. Waste waters that are hazardous for low pH and heavy metals are generated and treated on site. The facility was previously regulated under the conditionally authorized (CA) tier. The type and amount of waste that are treated on site are not consistent with the CA tier. Based upon the laboratory results and review of the process, this Agency has determined that the facility has two Permit by Rule (PBR) treatment systems, one for each agitation tank system. Each unit appears to have three tanks and one container (agitation, sludge holding tank, filter press, collection container). Mr. Morales confirmed that there have been no changes to the system and no releases in the previous three years. The are [Truncated]

Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection with Michael Palazzola. Consent to enter, inspect, and take photographs was given by Ben Kochmanski (Alloy Tech Electropolishing). The facility generates sufficient quantities of RCRA hazardous waste to be regulated as a large quantity generator (LQG). It is also regulated for treatment under the Permit By Rule (PBR) tier. Observed facility and inspected hazardous waste storage. Adequate aisle space is maintained. According to Ben Kochmanski, Process Floors and Passivation Area floors are pumped out daily. Observed large quantities of hazardous liquid in the Process and Passivation Area floors. Floors that are not pumped out daily are subject to Article 10 of 22 CCR Chapter 15 and will be managed as Hazardous Waste tanks. Hazardous Waste drum had a label dated 3/16/18. Please have the hazardous waste properly hauled immediately. See violation. The following documents are available for [Truncated]

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY

SUPERIOR MANUFACTURING CO (Continued) **1016188743**

INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Violations:
Site ID: 413997
Site Name: ALUMINUM PRECISION PRODUCTS INC
Violation Date: 06-24-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 07/08/2016. Several of the observed materials (Sand blasting silica, grease, floor scrubber) were missing from the HMBEP chemical inventory. Please add the missing materials to the inventory within 30 days and verify that all quantities are accurate.

Comments: Not reported
Description: This is 40% white mineral oil, it is used to show cracks in submerged aluminum parts. The release occurred when a water hose burst, spraying water into the tank. The tank overflowed, out the doors, into the street, and into the storm drains which fflow to the Greenville Banning Channel.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Eval Notes: INSPECTOR COMMENTS On site for routine aboveground petroleum storage tank (APST) inspection. The facility has the following petroleum storage capacity: - 1000 gallons of diesel fuel - 1000 gallons or red diesel fuel - 2 x 55 gallons of hydraulic oil - 2 x 55 gallons of ATF - 2 x 55 gallons of engine oil - 3 x 55 gallons of waste oil All of the tanks and containers have secondary containment. No changes have been made in the last 3 years. The spill prevention countermeasure and control (SPCC) plan was accessible during the inspection but was over due for recertification. Please review and re-certify this document every 5 years. SPCC plan was reviewed and re-certified shortly after the inspection. Violation has been abated.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Violations:

Site ID:	414920
Site Name:	National Trench Safety
Violation Date:	08-12-2015
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 09/04/2015. Please have the waste soy-based shoring fluid waste analyzed to determine if it is hazardous. Have a representative sample of the waste tested for aquatic toxicity using the 96-hour fish bioassay test. Testing must be conducted by a state certified. Submit a copy of the laboratory results to this Agency within 30 days.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-12-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: FA0060403 Trench Plate Rental, 1908 S Yale St, Santa Ana 92704 INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with David Miller. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Propane - Asphalt - Shoring fluid - Oxygen - Acetylene REQUIREMENT FOR ELECTRONIC SUBMITTAL OF HMBEP DOCUMENTS: This report serves as notice that the facility must submit the following documents electronically within 30 days of this report: - Business Emergency Plan - Hazardous Materials Inventory - Site Map The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents [Truncated]

NATIONAL TRENCH SAFETY INC (Continued) **S128624340**

Eval General Type: Other/Unknown
Eval Date: 09-04-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: This Agency received the laboratory results for the soy-based waste oil. The results indicate an LC50>750mg/l. Hazardous waste toxicity characteristic includes the criteria of having an LC50<500 mg/l. Therefore the waste is not considered to be hazardous waste according to Title 22 CCR. Please remove the hazardous waste sticker and/or other markings indicating the waste is hazardous. Violation (I325) has been corrected. The business will be removed from the hazardous waste inspection program.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-25-2018
Violations Found: Yes

Eval Type: Other, not routine, done by local agency
Eval Notes: HazMat documents decline in Portal: Chemical Disclosure Days on site is the number of days in the year that a chemical is on site. For routinely maintained chemicals, this field should have 365. Compressed gases have a federal hazard category of pressure release and storage pressure of above ambient. - Acetylene: the maximum daily amount is maximum amount that can be present on site. The amount observed during the onsite inspection was greater than the 200 cu ft disclosure threshold, therefore disclosure is required. If the maximum amount stored on site has been reduced (1 cylinder or less) so that it is below the 200 cu ft disclosure threshold, the chemical will need to be deleted from disclosure. Please revise the maximum daily amount so that it is above 200 cu ft or delete the chemical from the disclosure. - Propane: physical state is liquid, federal hazard category is fire, pressure release, and acute health. Maximum daily amount must meet or exceed the [Truncated]

SIC Code:	2842
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110000480408

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Citation: 22 CCR 15 66265.193 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.193
Violation Description: Failure of the LQG and/or TP generator, on all new and existing hazardous waste tank systems and ancillary equipment, to meet the following secondary containment requirements: 1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and 2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed. 3) Constructed of or lined with materials that are compatible with the waste(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrological forces), physical contact with the waste to which they are exposed, climatic conditions, the stress of installation, and the stress of

ELECTRODE TECHNOLOGIES INC DBA REID METAL FINISHING (Continued) **S113000528**

daily operation (including stresses from nearby vehicular traffic); 4) Placed on a foundation or base capable of providing support to the secondary containment system and resistance to pressure gradients above and below the system and capable of preventing failure due to settlement, compression, or uplift; 5) Provided with a leak detection system that is designed and operated so that it will detect the failure of either the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the existing detection technology or site conditions will not allow detection of a release within 24 hours; 6) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health or the environment, if removal of the released waste or accumulated precipitation cannot be accomplished within 24

Citation: 19 CCR 4.5 2745.10(b) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2745.10(b)
Violation Description: Failure to revise, update, and submit the Risk Management Plan to the UPA as follows: 1. At least once every five years from the date of its initial submission or most recent update required by section 2745.10(b)(2) through (7); 2. No later than three years after a newly regulated substance is first listed by the California Office of Emergency Services. 3. No later than the date on which a new regulated substance is first present in an already covered process above a threshold quantity; 4. No later than the date on which a regulated substance is first present above a threshold quantity in a new process; 5. Within six months of a change that requires a revised process hazard analysis or hazard Review. 6. Within six months of a change that requires a revised offsite consequence analysis as provided in section 2750.7; 7. Within six months of a change that alters the program level that applied to any covered process.
Violation Notes: Returned to compliance on 07/14/2021. OBSERVATION: The owner/operator failed to revise, update, and submit the Risk Management Plan to the UPA at least once every five years from the date of its initial submission or most recent update required by section 2745.10(b)(2) through (7). CORRECTIVE ACTION: Revise and update the Risk Management Plan. Ensure the Certification statement has been dated and signed. Please submit a copy of the certification to mescobedo@ochca.com.

Violation Date: 03-27-2014
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes: Returned to compliance on 09/16/2014. Please prepare or make available for review waste analysis records that are consistent with the waste analysis plan. Submit copies of the records to this Agency within 60 days.

Eval Notes: Inspector Comments: Please be advised that this Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2015 Closure Cost Estimate (CCE) has been rounded to the nearest dollar. The closure cost estimate is the actual cost of closure. Therefore, the calculated amount should be recorded to the nearest penny and not rounded to the nearest dollar. The 2014 CCE was approved at $9604.00. Therefore your minimum 2015 CCE is $9604.00 x 1.016 (inflation factor) = $9,757.66. Please submit revised Certification Of Financial Assurance Form and breakdown of costs table (enclosed) by 5/22/15.

Eval Notes: On-site for routine CalARP inspection. Met with Human Resources Director Susie Underwood and operator Danny Padron of Reid Metal Finishing. Also present was Brandon Aprahamian of OCHCA. This facility is regulated under CalARP Program Level 1 requirements. The following are the regulated substances on-site: 1) Cadmium Oxide (Liquid) 2) Sodium Cyanide (Liquid) Program Level 1 Requirements were reviewed this date: 1) The RMP provided on this date was complete. The RMP was certified by Tim Grandcolas on July 1, 2012. Please note that RMPs must be recertified every 5 years. The RMP certification is due on July 1, 2017. 2) The RMP contained the Worst Case Release Scenarios for the 2 processes. It has been determined that in the event of a catastrophic rupture of the largest process tank, no off-site consequence would occur. 3) The certification that the facility has not had a release with an off-site consequence within the last 5 years was also reviewed. Eval Notes: On site for a routine CalARP Level 1 inspection. Met with Susie Underwood of Reid Metal Finishing. Consent was provided to conduct inspection activities. The facility is regulated as a Program Level 1 facility. The regulated substance are Sodium Cyanide and Cadmium Oxide. Total quantities are as follows: - Sodium Cyanide 2300 pounds - Cadmium Oxide 380 pounds ** Please ensure that quantities stored/in process tanks are accurate with the spreadsheet that is maintained. The following were observed: -- The RMP was available. Please ensure that the RMP is updated accordingly. -- RMP Certification: The RMP certification was dated 7/1/2012. The certification that the RMP is accurate for level 1 requirements needs to be revalidation every 5 years. Please date and sign the level 1 revalidation and send to this agency. -- The Executive Summary was reviewed and is complete. -- The

Eval Notes: THIS INSPECTION REPORT SUPERSEDES THE PREVIOUS VERSION OF THIS REPORT. On site for routine tiered permitting inspection. Also present was Lisa Wales of OCHCA. The inspection was conducted with Tim Grandcolas and Juan Mendoza. Consent to enter, inspect, and take photographs was given by Mr. Mendoza. The facility conducts treatment of rinses, drag out, and other wastes with chrome, cyanide, and cadmium under the permit by rule tier. There are four PBR units: two for cyanide treatment, one for anodize rinses with chrome, and one evaporator unit for chrome waste. The evaporation unit has been modified since the previous inspection. An additional tank and container have been added. The two containers are located outside of the bermed containment area. The rinse tank that follows the cadmium-cyanide process tank was obstructed by equipment during the inspection even though the process tank was in use. A 30-gallon rinse drum across the catwalk was initially [Truncated]

Eval Notes: On site to discuss contents of inspection report with Tim Grandcolas and Ivan Padron. Darwin Cheng of OCHCA was also present. Reviewed report with Mr. Grandcolas. It was determined that the annual PBR/FA submittal is problematic in CERS due to a glitch with the CERS database. Mr. Grandcolas will need to follow up with CERS in order to fix the issue. Also clarified that the PE certification for the CN batch and evaporator units was conducted after the tanks were moved, and therefore there were not non-certified changes to the system following the previous inspection. The PBR inspection report was not accurate in light of these discoveries, and a violation related to annual submittal will be voided. Mr. Grandcolas was advised that a second inspection report would be issued to supersede the report that was reviewed this date.

Eval Notes: This Agency has reviewed and approved the Tiered Permitting Financial Assurance Self Certification for this facility. Please be advised that this the closure cost estimate is the actual cost of closure. The actual closure cost for 2014 listed on the breakdown of costs is $9,604.00, rather than $9603.59, since it was rounded off to the nearest dollar. The calculated amount should be recorded to the nearest penny and not rounded to the nearest dollar. The salvage value of the assets has not been changed from the value listed in 2012. The salvage value of your assets must be reviewed on an annual basis to be sure that depreciation and changes made to your inventory of equipment are reflected in the salvage value estimate. If you believe that your salvage value has remained the same since 2012, be sure to maintain documentation reflecting your estimated salvage value.

Noted that sample results indicate that pH is not being tested within prescribed hold time; Contact reported that they have their own pH meters and may start their own testing. Facility tests various parameters well above required; discussed dropping parameters if 2 consecutive results are below benchmarks per Permit. Business occupies

ELECTRODE TECHNOLOGIES INC DBA REID METAL FINISHING (Continued) **S113000528**

the entire series of suites in one building of a 2-bldg complex; various other businesses are in the other building; both drain via sheet flow to a common ribbon gutter between them. They share a common area for pallets and trash bins where loose trash was accumulating; they agreed to clean their side of the ribbon gutter. Site is otherwise neat and orderly.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D018
Waste Description: Benzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

ELECTRODE TECHNOLOGIES INC DBA REID METAL FINISHING (Continued) **1000183534**

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: P006
Waste Description: Aluminum Phosphide (R,T)

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

ELECTRODE TECHNOLOGIES INC DBA REID METAL FINISHING (Continued) **1000183534**

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

Waste Code: P121
Waste Description: Zinc Cyanide (Or) Zinc Cyanide Zn(Cn)2

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

ELECTRODE TECHNOLOGIES INC DBA REID METAL FINISHING (Continued) **1016177405**

who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
CEDRI is a web application used by EPA programs and various stakeholders to manage environmental data transmitted to EPA in order to meet EPA's reporting requirements.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Violations:

Site ID:	419707
Site Name:	IMPORT CRAFTERS BODY & PAINT
Violation Date:	07-12-2019
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 07/12/2019. Hazardous Waste container holding paint grinding dust was missing the accumulation start date. Violation was abated on site.
Violation Division:	Orange County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	419707
Site Name:	IMPORT CRAFTERS BODY & PAINT
Violation Date:	10-21-2016
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 04/24/2017. Spoke with Mr. Mendez about processes said they use a hand sander to remove paint from vehicles. The facility is not currently managing paint dust has a hazardous waste and a waste determination has not been made. You have a few options on how to proceed with this waste. You may choose to do a waste determination test, which will require you to take representative sample of the waste sanding dust to a state certified laboratory and have a Total Threshold Limit Concentration (TTLC) test for regulated heavy metals conducted. Provide a copy of the lab results to this agency; based on lab results, additional testing may be required. You also have the option to assume the dust is hazardous without testing it and manage it as a hazardous waste. This violation should be addressed immediately by providing this agency with the test results or by showing that it is being managed as a hazardous waste.

Citation: HSC 6.95 25505(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)
Violation Description: Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes: Returned to compliance on 10/10/2013. The facility was notified regarding the requirement for electronic submittal of Hazardous Materials Program documents in a letter from this Agency dated 8/8/13. A copy of the letter was also provided during the inspection. Please submit the required hazardous materials documents electronically within 30 days.
Violation Division: Orange County Environmental Health

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 03-16-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a follow up hazardous waste inspection. Consent to inspect and take any necessary photos was given by Jose Mendez, Owner. Walked throughout the facility. Observed hazardous waste storage areas. Paint dust is still not being managed as a Hazardous Waste and has not been tested for Hazardous Properties. Violation remains outstanding. Mr. Mendez stated he would just start treating it as Hazardous Waste and get a drum for it. A follow up inspection will be conducted within 30 days of receiving this report.

Eval General Type: Other/Unknown
Eval Date: 04-18-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a follow up hazardous waste inspection. Consent to inspect and take any necessary photos was given by Jose Mendez, Owner. Walked throughout the facility. Observed hazardous waste storage areas. Paint dust is still not being managed as hazardous waste. Mr. Mendez showed me the receipt and paperwork showing he has ordered the drum for the paint to be handled as waste. Mr. Mendez explained that the drum should be in by the end of this week. A follow up inspection will be conducted within 30 days.

Eval Notes: INSPECTOR COMMENTS On site for a follow up hazardous waste inspection. Consent to inspect and take any necessary photos was given by Jose Mendez, Owner. Walked throughout the facility. Observed hazardous waste storage areas. Paint dust is being correctly managed as a Hazardous Waste. Violation Abated.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-12-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS The facility inspection was conducted with Jose Mendez, President. Walked the interior and exterior of the facility to inspect the hazardous waste storage area and dumpster. Observed hazardous waste management practices and documentation including training records, manifests and contingency plan. Hazardous Waste container holding paint grinding dust was missing the accumulation start date. Violation was abated on site.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-09-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous waste inspection. Consent to enter, inspect, and take photographs was given by Jose Mendez. Observed the facility and inspected hazardous waste storage. Containers are stored closed and properly labeled. No evidence of hazardous waste spillage or runoff was observed. Manifests are available for review. Emergency plan is posted in the office.

Eval Program: HW
Eval Source: CERS,

IMPORT CRAFTERS BODY & PAINT (Continued) **S113041229**

Eval General Type: Other/Unknown
Eval Date: 09-21-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Prep for inspection
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-22-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site for routine hazardous materials and business emergency plan inspection. Permission to inspect and take any necessary photos was given by Jose Mendez, owner. Observed the facility and inspected hazardous materials storage area. The following hazardous materials was observed -Oxygen >200 cubic feet -Acetylene >200 cubic feet -Argon and Carbon Dioxide mix > 200 cubic feet The HazMat disclosure threshold of 200 cubic feet was discussed with Mr. Mendez. If the volume of gases are reduced to below 200 cubic feet per gas the material will not require disclosure. Please contact this Agency for a reinspection if a smaller container is obtained for the observed gases.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 09-22-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Reviewed 7800 report, waste stream, prior violations prior to inspection
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 10-10-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site for follow-up inspection. Consent to enter and inspect was given by Jose Mendez. The paint waste drum that was identified during the previous inspection has been hauled and was replaced with a new 30-gallon drum. The 30 gallon-volume is below the 55 gallon disclosure threshold. No other hazardous materials were observed in volumes at or above the disclosure threshold. The business will be removed from the hazardous materials inspection program, but will remain in the hazardous wastes inspection program.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the

KRAYDEN (Continued) **S124928183**

business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 05/04/2024. The Hazardous Materials Business Plan (HMBP) was not reviewed and electronically certified by the annual due date, March 1st 2024, that it is complete, accurate, and in compliance with EPCRA.

Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 04-30-2024
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: According to the CERS database, your business remains out of compliance with the annual certification requirement and a violation is being cited. Businesses are required to annually review and certify that their information in the California Electronic Reporting System (CERS) is complete, accurate and in compliance by March 1st. Your business was notified via email on March 27, 2024 that your facility was out of compliance with this requirement. Please note the following important details: 1) Complete submittal includes the HazMat Inventory AND the Emergency Plan / Training sections. Both sections must be submitted. 2) If your business qualifies (see below) you may submit 2024 via the Certify option available on CERS. You must be logged in to use. HMBP Certify: A business may use the Certify option button located on their forms page if: 1) A previous, complete submittal was made the prior year, and 2) The business is not subject to the Federal EPCRA reporting requirements, and 3) The

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

CERS:
Name: FIRST STUDENT, INC. #20462
Address: 3401 W CASTOR ST
City,State,Zip: SANTA ANA, CA 92704
Site ID: 116707
CERS ID: 10418536
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-22-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Cesar Iniguez, Maintenance Manager. Spoke with Mr. Iniguez about the information to submit in CERS by March 1st 2017. Observed the facility and inspected hazardous materials storage. Training records are current and available for review. Business emergency plan is on site and available for review. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds (200cuft compressed gas, 55 gal liquid, 500 lbs solid). If there is a change in the type or amount of chemicals that are maintained on site, please electronically submit revised documents within 30 days of the change.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 05-13-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Declined hazmat submittal in CERS due to: Chemical Disclosure For all chemicals that are combustible, please use federal hazard category fire Used antifreeze: please include the fire code hazard class: combustible III-B Site Map Please include the following elements on the site diagram: building access and exit points, emergency shutoffs (gas, water, electric), and emergency equipment
Eval Division: Orange County Environmental Health

FIRST STUDENT INC 20462 (Continued) **S119085093**

Site ID: 532047
Site Name: First Student Inc 20462
Violation Date: 01-05-2012
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Spills not being attended to immediately according to SWPPP and chronic leaks are not being addressed using drip pans. Trash can was allowed to fill to overflow and trash was blown/fell out; other trash cans alongside it were covered but not filled.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Site ID: 532047
Site Name: First Student Inc 20462
Violation Date: 12-12-2000
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Vehicle maintenance was being performed outside. Oil spills were observed. General housekeeping needed. Proper BMPs are needed to prevent spills and stains from discharging to the storm drains.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: A compliance follow-up inspection was conducted for this facility on 4-13-01. A notice of violation was sent out to this facility on January 16, 2001. A response was not received by this facility. Additionally, State board has put this facility under suspension because no one can contact the operators. At the time of the inspection, Mr. Alfred Godinez was not available. Regional Board Staff spoke with Ms. Debi Manley, Branch Manager. She stated that she was unaware of the NOV. She also stated that she would contact Jerry McElroy and Alfred regarding this matter. Later that day an fax of the NOV was sent out for their review. In a conversation following that day, Ms. Manley stated that they had not received or seen this document before. All the issues were explained to her and her consultant called back with a response to the issues. According to Ms. Mary Ellen Voitec, the issues had been taken care of because Alfred took care of them the day of the first inspection. During the second inspection, vehicle maintenance was still on going. Pans filled with oils and liquids were observed. Also an oil engine was observed. Ms. Voitec stated that they would use better BMPs to sustain any spills and take care of any possible leaks. In a conversation with Ms. Voitec all issues were identified and discussed. It appears that they will comply.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-16-2003

FIRST STUDENT INC 20462 (Continued) **S119085093**

Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a compliance inspection of the above facility on October 16, 2003. Staff determined prior to the inspection that the facility's permit had been wrongfully terminated and required an inspection to determine whether or not the facility should be permitted. Staff discussed the situation with Mr. Edward Espiritu, Shop Manager, and asked if they had any knowledge of why their permit was terminated. The SWPPP was last updated June '03. Staff asked for a copy of the 01-02 and 02-03 ARs to be placed in the facility's file, however only the 02-03 could be located. All areas of concern have been improved with BMPs.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-05-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather is warm and sunny. Asphalt was resealed about two weeks ago. SWPPP is dated 11/17/2001; states that spills are to be "immediately cleaned up". Observed various unattended spills of engine coolant and oil in front of maintenance bays; employees began cleaning after the spills were pointed out. Several other spills located in other areas where buses were temporarily parked. Several buses have chronic leaks unattended to. Employees report that they have drip pans; only one observed in use for a leaking radiator. Found overflowing trash can with trash on ground nearby in parking lot. Found rainwater in hazardous waste storage are in spite of having a fixed roof; 1/3rd full; reminded Contact to include cleanout procedure in SWPPP for this area.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-12-2000
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: A compliance inspection was conducted for this facility on December 12, 2000 at 1345. Santa Ana is also known as Laidlaw Education Services. Alfred Godinez, Shop Manager, accompanied staff during the inspection. This facility is part of a group monitoring program and will collect samples for the year 2000-2001. The facility SWPPP was not site specific and did not have a signature. Employee training records were not found in the SWPPP. Vehicle maintenance was being done on the Laidlaw buses outside without any cover. Staff indicated that this was not allowed under the General Permit and should cease immediately. Along the south side of the vehicle maintenance area a fresh oil spill was observed. Numerous other older oil spills were observed around the vehicle maintenance area. Additionally, as staff was explaining the permit to Mr. Godinez, an employee spilled approximately two buckets of an unknown liquid on the surface. This was immediately cleaned up at that time. Staff stated spill kits in areas such as the bermed area and the maintenance area in case of an accidental spill such as the one observed may be helpful. Spilled oil

FIRST STUDENT INC 20462 (Continued) **S119085093**

and debris were noted within the berms. Rims and various other equipment was noted in this area. The bermed and covered storage area and the surroundings need general housekeeping around the berms and inside the berms. An updated copy of the SWPPP with the current date, site specific information, and a signature was requested (by January 11, 2000) along with a letter describing the plan of action taken in response to the violations noted at the facility.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and

FIRST STUDENT INC #20462 (Continued) **1023220931**

reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared

PLASTIFLEX CO INC (Continued) **S104579907**

to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS ID:	10548982
CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	433438
Site Name:	American Tire Depot 127
Violation Date:	04-25-2023
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	One 55-gallon drum of waste paper filters were observed with an accumulation date of 10/3/2022. Discussed with Mr. Lefauoseu that paper filters must be removed within 180 days even if the container is not full and that metal filters must be removed within 1 year even if the container is not full.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 04-25-2023
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct an initial hazardous waste inspection. The facility has undergone a change of ownership and reported in CERS on 4/30/2022. Consent to enter and inspect was granted by Rapi Lefaoseu, Manager. The facility is a small quantity generator of automotive repair wastes. Observed the facility, perimeter, roll off dumpster, outdoor waste tire storage and inspected the hazardous waste storage areas in the shop bay and at the back of the garage. The following hazardous waste streams were observed: used oil, drained metal oil filters and waste paper filters and waste antifreeze. The containers were stored closed and properly labeled. Manifests, employee training and emergency response plan were reviewed. A copy of this report will be sent to 1118mgr.atd@bigbrandtire.com and michaelh@americantiredeport.com.

Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine hazardous waste inspection. Met with Rapi Lefaoseu. Inspected used oil, drained used oil/fuel filters, aqueous parts cleaner and waste antifreeze. Drums were provided with a lid, stored in a secure manner and appear to be in good condition. The operator completes a maintenance inspection on the drums on a weekly basis. A Hazardous Waste label was noted on all drums with the required identification. Municipal dumpster area does not appear to contain any hazardous waste. Perimeter of facility inspected - did not observe any water runoff or staining at this time. Hazardous Waste Emergency Response plan was available for review. Manifests and bills of lading for all hazardous waste streams were reviewed today. Ensure all hazardous waste manifests/disposal documents are maintained on site for at least three years from the date of transport and are available for review during normal business hours. Please continue to ensure all [Truncated]
