Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Evaluation:

Eval General Type:	Other/Unknown
Eval Date:	02-10-2016
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Facility has complied with 2016 reporting requirement. The following documents were received and ACCEPTED on E-submit: Business Activities Form Business Owner/Operator Form Chemical Inventory for 2 chemicals Facility Site Map
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-17-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Mardonio Rosal, EHS Manager. Observed the facility and inspected hazardous materials storage. The inventory submitted in CERS matches what is observed on site. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds (200cuft compressed gas, 55 gal liquid, 500 lbs solid). If there is a change in the type or amount of chemicals that are maintained on site, please electronically submit revised documents within 30 days of the change.

Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	0.92
Year:	2021
Gepaid:	CAL000024912
TSD EPA ID:	ARD981057870
CA Waste Code:	213 - Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.)
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.2502
Year:	2021
Gepaid:	CAL000024912
TSD EPA ID:	CAT080013352
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	0.252
Year:	2020
Gepaid:	CAL000024912
TSD EPA ID:	AZR000521146
CA Waste Code:	352 - Other organic solids
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)

EBERHARD EQUIPMENT (Continued) **S113030646**

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Section Seven Tracking System (SSTS) tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.
Registry ID: 110002721920

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

SEACREST ENVIROMENTAL INC (Continued) **1000180839**

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

TSD EPA ID: ARD981057870

R & D QUALITY FINISHING (Continued) **S113110189**

CA Waste Code:	212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.1815
Year:	2014
Gepaid:	CAL000218799
TSD EPA ID:	AZR000501510
CA Waste Code:	141 - Off-specification, aged or surplus inorganics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.22935
Year:	2013
Gepaid:	CAL000218799
TSD EPA ID:	CAD008364432
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.7

The CA HAZNET: database contains 30 additional records for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-27-2023
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS Onsite to conduct routine aboveground petroleum storage tank APST inspection. Consent to inspect and take photos if necessary was granted by Clement Chan, Network Assurance Engineer. The following were observed: 2500-gallon diesel back-up generator 8000-gallon diesel back-up generator Tanks have adequate secondary containment. Training records and monthly inspection records were reviewed. The SPCC plan was reviewed. SPCC plan is PE certified and was re-certified in March of 2017. Review and recertification of SPCC plan is required every 5 years and is currently overdue. See violation. Mr. Chan explained that Jeff Hollenbeck would recertify the plan when he returns from vacation in a couple of weeks. Please certify SPCC plan within 60 days to avoid further enforcement action.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 412952
Site Name: KAGA INC
Violation Date: 10-18-2021
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 10/18/2021. No HMBEP was submitted for 2021. Assisted Mr. Aung with CERS submission on site. Violation abated on site.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 07-11-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Reviewed HMBEP submittal on E-submit. Facility has disclosed 8 chemcials (2 waste). All forms were accepted.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP

KAGA U S A INC (Continued) **S113091445**

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS The facility inspection was conducted with Htin Aung, Manager. Walked the interior and exterior of the facility to inspect the hazardous waste storage area and dumpster. Observed hazardous waste management practices and documentation including training records, manifests and contingency plan. No violation observed on this date.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS CERS ID: 10539493 Facility inspection conducted with Htin Aung, Manager. Chemicals observed on this date match the CERS submission on 1/22/2019. No HMBEP was submitted for 2021. Assisted Mr. Aung with CERS submission on site. Violation abated on site. Reviewed BEP and the site map with the business. CERS information verified. Reminder: Please re-certify your HMBP on or before March 1 at www.cers.calepa.ca.gov
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-29-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Sonny Aung of KAGA Inc. Observed the facility and inspected hazardous materials storage. Hazardous Materials observed on site match what is reported in CERS. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds (200cuft compressed gas, 55 gal liquid, 500 lbs solid). If there is a change in the type or amount of chemicals that are maintained on site, please electronically submit revised documents within 30 days of the change.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-29-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Sonny Aung of Kaga Inc. Walked throughout the facility. Observed hazardous waste storage areas. Containers are properly managed and labeled.

KAGA U S A INC (Continued) **S113091445**

Manifests were available and reviewed. Employees are reported to be trained. Verified Ownership. Verified number of employees. No hazardous waste or universal waste observed in the dumpster/enclosure area.

Eval Division: Orange County Environmental Health

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D040
Waste Description:	Trichloroethylene
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane,

KAGA USA INC (Continued) **1000472938**

Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

KAGA USA INC (Continued) **1000472938**

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site.

Eval Notes: According to the CERS database, your business remains out of compliance with the annual certification requirement and a violation is being cited. Businesses are required to annually review and certify that their information in the California Electronic Reporting System (CERS) is complete, accurate and in compliance by March 1st. Your business was notified via email on March 27, 2024 that your facility was out of compliance with this requirement. Please note the following important details: 1) Complete submittal includes the HazMat Inventory AND the Emergency Plan / Training sections. Both sections must be submitted. 2) If your business qualifies (see below) you may submit 2024 via the Certify option available on CERS. You must be logged in to use. HMBP Certify: A business may use the Certify option button located on their forms page if: 1) A previous, complete submittal was made the prior year, and 2) The business is not subject to the Federal EPCRA reporting requirements, and 3) Th

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order

TRAIL RITE INC (Continued) **S106104970**

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

BRIXEN AND SONS INC (Continued) **S117311227**

Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 04/05/2019. No HMBEP was submitted in CERS. Assisted with CERS submission on site. Violation abated on site.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 372354
Site Name: BRIXEN & SONS INC
Violation Date: 05-03-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/27/2016. There are two 55-gallon drums, multiple 5-gallon containers, and many 1-gallon containers of ink waste that are not labeled with the required information. Please label all containers of hazardous waste with the required information as soon as the waste begins to accumulate. A reinspection will be conducted in approximately 60 days to assess facility compliance. If the waste is hauled by a registered hazardous waste hauler before that time, the facility may contact this Agency regarding an earlier reinspection.

Eval Notes: FA0062799 Brixen & Sons Inc, 2100 S Fairview St, Santa Ana 92704 INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Scott Northrop. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Propane - Ink, silk screen - Ink, digital - Screen wash cleaner - Emulsion remover cleaner - Ink waste The facility is responsible for identifying and disclosing all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. Disclosable amounts of hazardous materials are as follows: 55 gallons or more of liquid, 500 pounds of solid, and/or 200 cubic feet of gas. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. REQUIREMENT [Truncated]

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection. Consent to enter and inspect was given by Son Nguyen. Observed the facility and inspected hazardous waste storage. There are two 55-gallon drums of ink waste that are not labeled with the required information. In addition, the hazardous waste storage area is filled with one-gallon and five-gallon containers of ink waste. None of these containers is labeled with the required information. No evidence of hazardous waste spillage or runoff was observed. Manifests are available for review. Emergency plan was updated during the inspection.

Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 06-30-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site for follow up inspection. Consent to enter and inspect was given by Scott Northrop. The facility was previously inspected on 5/3/16. A violation was cited because the hazardous waste storage area was filled with containers of ink waste that were not labeled with the required information. The following conditions were observed: - 55-gallon drums of waste have been labeled with the required information - Many of the smaller containers of waste have been consolidated into 55-gallon drums with labels - Several 5-gallon containers of waste ink and other chemicals remain unlabeled Mr. Northrop stated that these containers were to be repackaged and hauled as hazardous waste, but removal was delayed due to an inactive EPA identification number. The number has since been reactivated and the waste is scheduled to be hauled next week. A reinspection will be conducted in approximately 30 days to assess facility compliance. Please be aware that second and/or [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/06/2014. Multiple containers of hazardous waste were not labeled with the physical state and hazardous property. Please label all containers of hazardous waste, including those at satellite accumulation sites, with the required information as soon as the waste begins to accumulate.

Violation Source:	SMARTS,
Site ID:	77967
Site Name:	TTM Technologies North America, LLC
Violation Date:	06-10-2014
Citation:	HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description:	Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.
Violation Notes:	Returned to compliance on 08/26/2014. The facility is handling the container of dross solids with lead as an excluded recyclable material. It must be labeled as "excluded recyclable material with the required information.
Violation Division:	Orange County Environmental Health

Violation Program: HWLQG
Violation Source: CERS,

Site ID: 77967
Site Name: TTM Technologies North America, LLC
Violation Date: 06-10-2014
Citation: 22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description: Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes: Returned to compliance on 07/28/2014. The closure plan that the site has developed is intended to meet the requirements specified for facilities with standardized permits (66265.112). The closure plan that is required for sites regulated under permit by rule is specified in 67450.3(c)(11). Please revise the closure plan so that it meets the requirements for PBR facilities. Submit a copy of the revised closure plan to this Agency within 60 days.
Violation Division: Orange County Environmental Health
Violation Program: PBR
Violation Source: CERS,

Site ID: 77967
Site Name: TTM Technologies North America, LLC
Violation Date: 06-10-2014
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate

TTM TECHNOLOGIES NORTH AMERICA, LLC (Continued) **S110736996**

evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 10/07/2014. The waste analysis records are not available for all of the hazardous wastes that are treated in the onsite treatment systems (PBR units). Please conduct sampling according to the revised waste analysis plan. Submit a copy of the records to this Agency within 30 days.

Citation: 22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)

Violation Description: Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.

Violation Notes: Returned to compliance on 07/28/2014. The waste analysis plan does not contain all of the required elements. Please revise the waste analysis plan so that meets the requirements specified in 66265.13(b) [as required by 67450.3(c)(8)(a)]. Submit a copy of the revised plan to this Agency within 60 days.

Violation Date: 06-10-2014
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business

TTM TECHNOLOGIES NORTH AMERICA, LLC (Continued) **S110736996**

plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.

Violation Notes: Returned to compliance on 08/26/2014. One 55 gallon drum of used solder with lead is hauled for recycling using a generic receipt. The container contains solid pieces of solder with liquid in the bottom. Mr. Klueckman stated that the liquid is flux, and that it should not be in the container with the metal solids. The recycling facility that receives the material, Salvage 1, stated that they would not accept the drum with the liquid flux in it. Please do not mix hazardous wastes with excluded recyclable material. Recyclable materials that require reclamation prior to recycling may not be excluded from regulation as hazardous waste.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-07-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection. Consent to enter, inspect, and take photographs was given by Bill Litten. The facility generates sufficient quantities of federally-regulated hazardous waste to be regulated as a RCRA large quantity generator (LQG). The facility is regulated under the PBR tier for treatment of aqueous wastes with metals. Observed the facility and inspected the process areas, treatment area, and hazardous waste storage areas. The following conditions were observed: - Hazardous waste containers were stored closed. - Multiple containers of hazardous waste were not labeled with the hazardous property. - All containers of hazardous waste are dated within the maximum accumulation time. - Process area floors were damp. Mr. Litten stated that they are cleaned daily. - No evidence of hazardous waste spillage or runoff was observed. - No hazardous waste was observed in the dumpster. The following documents were for [Truncated]

Eval Notes: This Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The Surety Rider has Department of Toxic Substances Control listed as the "Obligee." Please be advised that this Agency, Certified Unified Program Agency, must be listed as the "Obligee." A corrected Surety Rider (original enclosed) must be submitted to this Agency by 3/27/14. In addition, the salvage value of the assets has not been changed from the value listed in 2009. The salvage value of your assets must be reviewed on an annual basis to be sure that depreciation and changes made to your inventory of equipment are reflected in the salvage value estimate. If you believe that your salvage value has remained the same since 2009, be sure to maintain documentation reflecting your estimated salvage value.

Eval Notes: Inspector Comments: Your business is required to submit an Annual Permit Renewal package and Certification Of Financial Assurance for the treatment of hazardous waste. On January 28, 2015, date on certified mail return receipt, your company received the Annual Renewal Package and Certification Of Financial Assurance package for your facility. The package included instructions for completing the forms as well as notification that your renewal for financial assurance would be due by March 2, 2015. You were instructed to complete the forms and return them to this agency by the due date. To date, this agency has not received your documents. Required documents must be submitted to this Agency by 5/26/15. Failure to submit the required documents by the due date, could result in a fine of twenty-five thousand dollars ($25,000) for each day of the violation pursuant to Section 25189 of the California Health & Safety Code (H&SC).

Eval Notes: INSPECTOR COMMENTS Onsite for follow-up inspection. During the routine inspection on 6/10/14, multiple violations were cited. Consent to enter and inspect was given by Khris Bonilla. Also present for TTM was Charles Nehrig. The following conditions were observed today: - All hazardous waste labels that were observed had an accumulation start date that was within the maximum allowable accumulation time. - Some of the accumulation dates on the labels were not clearly marked and were difficult to read. - Universal waste containers were labeled with the required information. - One storage area in the yard had stacked totes of hazardous waste. The stacking and storage of adjacent containers prevented observation of container storage conditions and labeling for each hazardous waste container. - Multiple containers of hazardous waste were not labeled with the hazardous property and/or physical state. - Used solder with lead is being labeled as an excluded recyclable [Truncated]

Eval Notes: Received email inquiry regarding the PE certification requirements. Response as follows: From: Berg, Susan Sent: Thursday, July 7, 2016 1:58 PM To: 'Litten, Bill' <Bill.Litten@ttmtech.com> Subject: RE: Tank Assessment Report Hello Bill, The PE with mechanical discipline can typically do the tank and secondary containment certification, with the exception of the seismic portion. The seismic calculations must be certified by a PE with civil, structural, or geotechnical discipline. The seismic analysis is part of each certification (initial and subsequent 5-yr) and is not a one-time assessment. If the calculations from an earlier certification remain valid, the calculations may be included with the 5-year recertification, in which case a civil, structural, or geotechnical PE would need to add their name, stamp, and engineer certification to the document. Respectfully, Susan Berg, REHS, MS Hazardous Waste Specialist III Hazardous Materials Surveillance [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-30-2014
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: I met with Khris Bonilla, the Environmental Health and Safety Supervisor and Training Coordinator for TTM Technologies. The SWPPP was dated December 12, 2014. No deficiencies observed. Reviewing the sampling data I notice some of the runoff samples exceeded the holding time. I reminded Ms. Bonilla to deliver samples to lab before holding time is exceeded. Facility has two city sewer permits, No. 51-1-366 and 51-1-359. I told contact that runoff samples were exceeding benchmark levels and explained the new permit Numeric Action Levels. Contact said an outside company services forklifts and disposes of oil and that sweeping occurs daily. See attached for photos and details of the inspection. Several chemical storage areas were not covered and exposed to storm water but had secondary containment. Eastern most building had water treatment facility outdoors but underneath a roof. The concrete surrounding this area was stained white, indicating spills occur. Best management practices or treatment of runoff water need to be improved to reduce concentrations of pollutants.

Violation Date:	06-10-2014
Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan

TTM TECHNOLOGIES NORTH AMERICA, LLC (Continued) **S110736996**

shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 10/07/2014. The waste analysis records are not available for all of the hazardous wastes that are treated in the onsite treatment systems (PBR units). Please conduct sampling according to the revised waste analysis plan. Submit a copy of the records to this Agency within 30 days.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-07-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for routine hazardous waste inspection. Consent to enter, inspect, and take photographs was given by Bill Litten. The facility generates sufficient quantities of federally-regulated hazardous waste to be regulated as a RCRA large quantity generator (LQG). The facility is regulated under the PBR tier for treatment of aqueous wastes with metals. Observed the facility and inspected the process areas, treatment area, and hazardous waste storage areas. The following conditions were observed: - Hazardous waste containers were stored closed. - Multiple containers of hazardous waste were not labeled with the hazardous property. - All containers of hazardous waste are dated within the maximum accumulation time. - Process area floors were damp. Mr. Litten stated that they are cleaned daily. - No evidence of hazardous waste spillage or runoff was observed. - No hazardous waste was observed in the dumpster. The following documents were for [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: This Agency has received and reviewed the PE certification for the hazardous waste tanks and containment dated 12/8/16. The certification appears to meet regulatory standards. Violation (I516) has been corrected. Please note that a new sludge tank has been installed at building 1 but has not been plumbed into the system and is not yet in service. The PE assessment mentions this new tank but does not include it as part of the assessment. When the tank is put into use, the assessment must be amended to include the details and evaluation for this tank.

Eval Notes: This Agency received and reviewed the PE certification for the hazardous waste tanks and secondary containment dated 7/3/16. The PE assessment is incomplete for the following components: - The PE assessment was conducted by a mechanical engineer, a discipline that is not recognized as being able to sign for the entire system. - Seismic calculations as part of the design consideration for tank stability were not provided. DTSC has specified that only Civil, Structural, and Geotechnical registered professional engineers may sign for entire systems. In cases where a Civil, Structural, or Geotechnical registered professional engineer is not signing off for the tank system assessment, then all engineers contributing to the assessment must sign. These other registered engineers can sign off only for parts of a tank certification within their specific discipline. Certifications must include the name and license number for each engineer who is approving a section or [Truncated]

Eval Notes: Called OC Sani/Chavez for status update. He said that he finished 10 days of sewer sampling. All PH and metals were within OCSD allowable levels. The sewer did have high levels of "solids" but they appeared to be polymer solids. Chavez feels the solids were from TTM using too much polymer in the WWT process and not from heavy metals. H told the site that they have been watched and passed but to be aware in the future and "keep within permit levels". Business aid AOK. I called Santa Ana City (informant)/Thomas Lo 714-335-5516. That was the phone # for TTM. Called Santa Ana. Thomas Los # is 714-647-5659. Called Lo. discussed the case. He is OK with closing the case and he will call directly if they find more chemical vapors while sewer cleaning in the future.

Eval Notes: On site for routine Permit By Rule inspection. Consent to enter, inspect, and take photographs was given by Gary Klueckman. Also present was Darwin Cheng of OCHCA. Spent process solutions and rinses with heavy metals are processed in four treatment systems, two at building 1 and two at building four. The treatment units are labeled with the required information. Mr. Kleuckman confirmed that there have been no changes to the system and no releases in the previous three years. The following documents were available for review: inspection log, inspection schedule, waste analysis plan, waste analysis records, annual PBR notification forms and Agency acknowledgment letter, closure plan, sewer agency permit and discharge records, and PE certification for hazardous waste tanks and secondary containment dated. The PE certification is dated 6/18/10. It must be conducted every 5 years. The annual tiered permitting notification documents were received for 2014. The [Truncated]

Eval Notes: Received email inquiry regarding the PE certification requirements. Response as follows: From: Berg, Susan Sent: Thursday, July 7, 2016 1:58 PM To: 'Litten, Bill' <Bill.Litten@ttmtech.com> Subject: RE: Tank Assessment Report Hello Bill, The PE with mechanical discipline can typically do the tank and secondary containment certification, with the exception of the seismic portion. The seismic calculations must be certified by a PE with civil, structural, or geotechnical discipline. The seismic analysis is part of each certification (initial and subsequent 5-yr) and is not a one-time assessment. If the calculations from an earlier certification remain valid, the calculations may be included with the 5-year recertification, in which case a civil, structural, or geotechnical PE would need to add their name, stamp, and engineer certification to the document. Respectfully, Susan Berg, REHS, MS Hazardous Waste Specialist III Hazardous Materials Surveillance [Truncated]

Eval Notes: This Agency has reviewed the PE certification for hazardous waste tanks and secondary containment dated 9/8/16. The document specifies that the certification is contingent upon implementation of recommendations found in the report. The following actions are required: - Conduct daily inspections as spill prevention and leak detection measures. Inspections are to be logged - Sumps are to be maintained dry at the end of the day - Flocculation tank TTM-3 is to

TTM TECHNOLOGIES NORTH AMERICA, LLC (Continued) **S110736996**

be monitored for rust, and repaired if rust increases - Steel support frames are to be replaced for two sludge tanks - Two anchor clips are to be installed on neutralization tank - Four steel brackets with anchor bolts are to be installed on precipitation tank Please complete recommended items and submit documentation that they have been completed to this Agency by November 14, 2016. Violation (I516) will remain outstanding until the documentation has been received. Thank you.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: I met with Khris Bonilla, the Environmental Health and Safety Supervisor and Training Coordinator for TTM Technologies. The SWPPP was dated December 12, 2014. No deficiencies observed. Reviewing the sampling data I notice some of the runoff samples exceeded the holding time. I reminded Ms. Bonilla to deliver samples to lab before holding time is exceeded. Facility has two city sewer permits, No. 51-1-366 and 51-1-359. I told contact that runoff samples were exceeding benchmark levels and explained the new permit Numeric Action Levels. Contact said an outside company services forklifts and disposes of oil and that sweeping occurs daily. See attached for photos and details of the inspection. Several chemical storage areas were not covered and exposed to storm water but had secondary containment. Eastern most building had water treatment facility outdoors but underneath a roof. The concrete surrounding this area was stained white, indicating spills occur. Best management practices or treatment of runoff water need to be improved to reduce concentrations of pollutants.

Violation Description:	Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes:	Returned to compliance on 07/28/2014. The closure plan that the site has developed is intended to meet the requirements specified for facilities with standardized permits (66265.112). The closure plan that is required for sites regulated under permit by rule is specified in 67450.3(c)(11). Please revise the closure plan so that it meets the requirements for PBR facilities. Submit a copy of the revised closure plan to this Agency within 60 days.

Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is

TTM TECHNOLOGIES NORTH AMERICA, LLC (Continued) **S110736996**

required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 10/07/2014. The waste analysis records are not available for all of the hazardous wastes that are treated in the onsite treatment systems (PBR units). Please conduct sampling according to the revised waste analysis plan. Submit a copy of the records to this Agency within 30 days.

Eval Notes: INSPECTOR COMMENTS On site for routine tiered permitting inspection with Michael Palazzola and Laura Adourian. Consent to enter, inspect, and take photographs was given by Bill Litten of TTM Technologies. The process lines and treatment units were inspected. Spent process solutions and rinses with heavy metals are processed in 5 treatment systems, two at building 1 and three at building 4. An Electrowinning unit is also at building 1. A sludge drying unit was recently added, however it is not operational yet. The treatment units are labeled with the required information. The treatment units were properly maintained and inspected on a proper schedule. The sludge dryer is no

TTM TECHNOLOGIES NORTH AMERICA, LLC (Continued) **S110736996**

longer going to be added to the facility. The dryer will be sold due to complaints of smell. The facility has notified for 5 PBR units: - Clarifier, building 1 - Batch Treatment, building 1 - Clarifier, building 4 - Batch treatment, building 4 - Sludge Dryer, building 4 - (copper), [Truncated]

Eval Notes: Inspector Comments: Your business is required to submit an Annual Permit Renewal package and Certification Of Financial Assurance for the treatment of hazardous waste. On January 28, 2015, date on certified mail return receipt, your company received the Annual Renewal Package and Certification Of Financial Assurance package for your facility. The package included instructions for completing the forms as well as notification that your renewal for financial assurance would be due by March 2, 2015. You were instructed to complete the forms and return them to this agency by the due date. To date, this agency has not received your documents. Required documents must be submitted to this Agency by 5/26/15. Failure to submit the required documents by the due date, could result in a fine of twenty-five thousand dollars ($25,000) for each day of the violation pursuant to Section 25189 of the California Health & Safety Code

Eval Notes: Received email inquiry regarding the PE certification requirements. Response as follows: From: Berg, Susan Sent: Thursday, July 7, 2016 1:58 PM To: 'Litten, Bill' <Bill.Litten@ttmtech.com> Subject: RE: Tank Assessment Report Hello Bill, The PE with mechanical discipline can typically do the tank and secondary containment certification, with the exception of the seismic portion. The seismic calculations must be certified by a PE with civil, structural, or geotechnical discipline. The seismic analysis is part of each certification (initial and subsequent 5-yr) and is not a one-time assessment. If the calculations from an earlier certification remain valid, the calculations may be included with the 5-year recertification, in which case a civil, structural, or geotechnical PE would need to add their name, stamp, and engineer certification to the document. Respectfully, Susan Berg, REHS, MS Hazardous Waste Specialist III Hazardous Materials Surveillance [Truncated]

Eval Date: 12-30-2014
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: I met with Khris Bonilla, the Environmental Health and Safety Supervisor and Training Coordinator for TTM Technologies. The SWPPP was dated December 12, 2014. No deficiencies observed. Reviewing the sampling data I notice some of the runoff samples exceeded the holding time. I reminded Ms. Bonilla to deliver samples to lab before holding time is exceeded. Facility has two city sewer permits, No. 51-1-366 and 51-1-359. I told contact that runoff samples were exceeding benchmark levels and explained the new permit Numeric Action Levels. Contact said an outside company services forklifts and disposes of oil and that sweeping occurs daily. See attached for photos and details of the inspection. Several chemical storage areas were not covered and exposed to storm water but had secondary containment. Eastern most building had water treatment facility outdoors but underneath a roof. The concrete surrounding this area was stained white, indicating spills occur. Best management practices or treatment of runoff water need to be improved to reduce concentrations of pollutants.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP

TTM TECHNOLOGIES, INC (Continued) **1001231405**

IDENTIFY DUPLICATE OR MISSING FACILITIES
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D011
Waste Description: Silver

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except

SPS TECHNOLOGIES - HARBOR BLVD (Continued) **1000133494**

From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-30-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS Facility inspection conducted with Elizabeth Long of Liquid Graphics Inc. Observed hazardous materials on site. In your CERS submission for this facility, please add TABS II (Degreaser) to your inventory and please remove the Spot Remover from your inventory. Reviewed BEP and the site map with the business. Reminder: Please re-certify your HMBP on or before March 1 at www.cers.calepa.ca.gov No violation observed on this date.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-27-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Liquid Graphics Inc 2701 S Harbor Blvd Unit A Santa Ana, CA 92704 INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Elizabeth Long, Human Resources. Spoke with Mrs. Long and Mr. Hyman, CFO, about the information to submit in CERS as they are in a new facility. Observed the facility and inspected hazardous materials storage. There are less materials and waste than usual as the facility is just settling in from the facility transition from Irvine. Business emergency plan is on site and available for review. Employee training records are current and available for review. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds (200cuft compressed gas, 55 gal liquid, 500 lbs solid). If there is a change in the type or amount of chemicals that are maintained on site, please [Truncated]

Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: According to the CERS database, your business remains out of compliance with the annual certification requirement and a violation is being cited. Businesses are required to annually review and certify that their information in the California Electronic Reporting System (CERS) is complete, accurate and in compliance by March 1st. Your business was notified via email on March 27, 2024 that your facility was out of compliance with this requirement. Please note the following important details: 1)

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-09-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS CERS ID: 10724782 Facility inspection conducted with Tiffany Jenkins, Controller. Chemicals observed on this date match the CERS submission on 5/23/2023, however, the quantities are all incorrect. Please make changes to the chemical inventory in CERS to reflect an accurate quantity of each hazardous material. Reviewed BEP and the site map with the business. CERS information verified and assisted with some changes to personnel. Reminder: Please re-certify your HMBP on or before March 1 at www.cers.calepa.ca.gov
