

Finding Aid
H. Clay Kellogg Papers
 1880-1950

Accession Number:	2008.3
Creator:	Kellogg, H. (Hiram) Clay
Extent:	6 boxes and approximately 800 maps
Location:	Building 1.104.000000005
Archival Arrangement:	This collection is arranged in six series: 1. Correspondence (1880-1922) 2. Professional files (1894-1941) 3. Reporter's transcripts 4. Publications (1884-1928) 5. Photographs 6. Maps
Scope and Content:	This collection is comprised primarily of the professional life of H. Clay Kellogg and his work in the County of Orange, California, from around 1885 until his death in 1921. Included are: correspondence (chronological), professional projects; reporter's transcripts from a case he was involved (Santa Ana River Development Co., et al vs. James Long, et al); certain publications collected; newspaper clippings not yet processed, and numerous plats, maps and blueprints partially processed. In addition to maps, plats and blueprints or bluelines created during the lifetime of H. Clay Kellogg, a large number of same created for his descendants (and others) exist, dating from 1883 to 195_.
Access Restrictions:	No access restrictions.
Biography/Profile:	Noted civil engineer H. Clay Kellogg designed cities, dams, reservoirs, roads, bridges, and extensive systems for water, sewer, and flood control throughout Southern California, as well as in Hawaii, Arizona, and other western states. Born Sept. 9, 1855, near St. Helena, California, he was the oldest of the nine children of Benjamin Franklin and Mary Orilla ("Lillie") Kellogg. In 1869, the family came overland to an area just south of Anaheim. There, they purchased 640 acres from the Abel Stearns Rancho, which they developed into a cattle and dairy ranch. Kellogg's early education was in the public schools. After that, he opened a sundries store with his brother and made enough money to pay for college. During college, he had a job with the Coast Survey, working out the triangulation of the survey of Wilmington and San Pedro harbors. Kellogg graduated from Wilson College, in Wilmington, California in 1879 as a Civil Engineer. After graduating, he spent about four years setting out vineyards in Anaheim, Placentia and Pasadena. Kellogg's first noteworthy contract as an engineer was to lay out the town of Elsinore, California in 1883. A year later, he became Chief Engineer for the Anaheim Union Water Company. He continued his association with this agency – variously as an employee or as a consultant – for the rest of his life. He also worked as the engineer for the Anaheim Irrigation district until it was disbanded, and was Chief Engineer for the Santa Ana Valley Irrigation Company (SAVI Co.) Kellogg usually held multiple job positions (appointed, elected, hired, etc) at any one time. In 1885, Kellogg became a Deputy County Surveyor for Los Angeles County. On May 20, 1886, he married Victoria Charlotte Schultz, an Iowa native. That same year, Kellogg laid out the town of South Riverside, (now known as Corona). Victoria died shortly after giving birth to their only child, Victoria Sibyl in 1891. Kellogg remarried in 1895, to distant relative, Helen V. Kellogg. H. Clay and Helen Kellogg had four more children, Helen, Hiram Clay, Jr., Leonard Franklin and Oahu Rose. Over the course of his career, Kellogg designed dams, canals, sewer systems, roads, railroad extensions, a mausoleum, and entire flood control and drainage districts. He worked on projects from the Santa Ana River Valley to San Bernardino, and from Hawaii to Arizona. In 1894 he was elected Orange County Surveyor. He served in this post until his election as Santa Ana's city engineer in January 1899. As city engineer, Kellogg developed Santa Ana's sewer system, and many of its roads. In 1898, he designed and built his own home at 122 Orange St., Santa Ana. (The house was later moved to 3101 W. Harvard St. and is now part of the Centennial Heritage Museum.) Kellogg was a member of various fraternal and professional organizations, including the Masons, the Native Sons of the Golden West, and the Technical Society of Civil Engineers of the Pacific Coast. He was also a recognized authority on water rights and was often called upon as an expert witness in trials. H. Clay Kellogg died in 1921. Timeline: 1855 – Hiram Clay Kellogg is born Sept. 9th, near St. Helena, Napa County, California. 1869 – The Kellogg family moves to a ranch south of Anaheim. 1879 – Graduates from Wilson College in Wilmington, California 1883 – Lays out the town of Elsinore, California – his first important contract. 1884 – Becomes Chief Engineer for the Anaheim Union Water Company. 1885 – Becomes a Deputy

1880-1950

County Surveyor for Los Angeles County. 1886 – Marries Victoria C. Schultz, a native of Iowa. 1886-87 – Lays out South Riverside, now Corona. He remains water engineer for that community until 1900. 1888 – Surveys and builds railroad running from San Bernardino, through Colton to Riverside and operating it for eight months. 1889 – County of Orange established. 1891 – His wife, Victoria Kellogg, dies of peritonitis in February. She leaves a one-month-old daughter, Victoria Sibyl Kellogg. 1894 – Is the constructing engineer for the dam at Gila Bend, Arizona. 1894 – Upon returning from Arizona, is elected county surveyor of Orange County. 1895 – Marries a distant cousin, Miss Helen V. Kellogg in Portland, Oregon. 1897 – Daughter Helen is born in California. 1898 – The Kellogg House is built at Orange and Walnut in Santa Ana. 1899 – Begins service as the elected city engineer of Santa Ana in January. Simultaneously give ups his post as county surveyor. Son Leonard Franklin Kellogg is born. 1900 – Travels to Honolulu and is hired as chief engineer by the Wahiawa Water Company. Builds two immense reservoirs by damming both forks of the Kaukonahua River. Son Hiram Clay Kellogg, Jr. is born. 1903 – Daughter Oahu Rose Kellogg is born. 1905 – Employed as consulting engineer to make a report on, and revise the plans of the Naunna Dam above Honolulu, which he had designed earlier. 1906 – Appointed engineer for the new Newbert Protection District, a flood control district for the Santa Ana River south of Santa Ana. He held this position for the rest of his life. 1907 – Becomes engineer of the new Santa Ana River Development Company, a holding company for Santa Ana Valley Irrigation Company and the Anaheim Union Water Company. 1910 – Returns to Corona to plan and re-build the city's storm drains and sewers. 1918-1919 – Builds a mausoleum in Oakland, California. 1921 – H. Clay Kellogg dies in Orange County in December. 1963 – Helen V. Kellogg dies.
