Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Regional Board staff conducted a compliance inspection of the above facility on January 29, 2020. Staff met with Bob Leaming as the LRP, Ross Bibeau, was not available. Mr. Leaming did not have access to where the SWPPP and training records were stored during the inspection. The Ad Hoc Report from the 2018-2019 Reporting Period was reviewed and pH was not sampled during the storm event. The SWPPP uploaded to SMARTS, dated July 2016, includes metal debris as a pollutant of concern in the facility's Pollutant Source Assessment. The facility is currently only sampling for the general parameters. A site walk was then conducted and housekeeping is conducted daily. Pallets are stored outdoors and a boneyard of racks are temporarily stored outside. Seacrates observed outdoors contain administrative storage. Roll-off bins contain aluminum chips from industrial processes and are covered during a rain event. The roll-off bins are picked up every 3 weeks. Some aluminum chips were observed on the ground around the bins. Racks containing industrial materials were observed around the facility.

Eval Notes: Regional Board staff conducted a compliance inspection of the above facility on January 29, 2020. Staff met with Bob Leaming as the LRP, Ross Bibeau, was not available. Mr. Leaming did not have access to where the SWPPP and training records were stored during the inspection. The Ad Hoc Report from the 2018-2019 Reporting Period was reviewed and pH was not sampled during the storm event. The SWPPP uploaded to SMARTS, dated July 2016, includes metal debris as a pollutant of concern in the facility's Pollutant Source Assessment. The facility is currently only sampling for the general parameters. A site walk was then conducted and housekeeping is conducted daily. Pallets are stored outdoors and a boneyard of racks are temporarily stored outside. Seacrates observed outdoors contain administrative storage. Roll-off bins contain aluminum chips from industrial processes and are covered during a rain event. The roll-off bins are picked up every 3 weeks. Some aluminum chips were observed on the ground around the bins. Racks containing industrial materials were observed around the facility.

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different

Pallets are stored outdoors and a boneyard of racks are temporarily stored outside. Seacrates observed outdoors contain administrative storage. Roll-off bins contain aluminum chips from industrial processes and are covered during a rain event. The roll-off bins are picked up every 3 weeks. Some aluminum chips were observed on the ground around the bins. Racks containing industrial materials were observed around the facility.

Environmental Interest/Information System:

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Eval Notes:	On 6/19/14 I spoke to Robert LaRoche and Ken Bishop in regards to the NOV s sent. Explained the following: 1This was written a few weeks ago and some of the items have been corrected, as well as some items were not included in NOV that prob should have been for example :dismantled leak detector 2Received Financial Responsibility from Ken (has been approved) 3Sensors are not to be tampered with, seems to be a history of raised sensors. (recommended periodic inspections maybe your DO could do this monthly) 4Spoke to Ken and indicated that work orders are not on site. Possible solution: alarm log can be maintained on site 5Secondary components failed components are required to be fixed within 60 days of failure. I currently have Secondary components that were tested in November that are still waiting to be fixed.

Eval Notes: Email: Hi Jennifer, The city has asked me a question regarding one of their fuel tanks at the Parks Yard. Permit attached. It is for their 550 gallon Waste Oil tank. This is not currently being used. The city is doing the maintenance on the vehicles at the Corporate Yard. Therefore, Waste Oil is not being generated. The site is in full compliance and the tank is still being monitored. The city wants to know if anything needs to be done to keep them in compliance with OCHCA. Thank you, Patty Fleming

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Eval Notes: On January 2, 2003 under clear, warm conditions, Regional Board staff conducted a routine compliance inspection of the above referenced facility. Previous analytical history showed high levels of TSS (122mg/L) and COD (293mg/L). The facility SWPPP was reviewed and found that the Certification statement was not signed. The Monitoring information was up to date and BMPs adjusted as needed. Various improvements have been made since the last rainy season. A grassy swale has been constructed where a soil filled planter area once was. A street sweeper has been purchased and is used continually to remove fugitive saw dust. Extensive baghouse utilization is employed and additional structural barriers to reduce the wind's effect on moving particulate matter off site. With the implementation of these additional BMPs, the site should substantially reduce its pollutant load associated with storm water run off. Documented training specific to storm water requirements was not documented. Additional BMPs should be implemented in the forklift service area. Equipment repair was conducted in an area exposed to storm water. However, oil and grease levels shown on the analytical report were low.

Eval Notes:	On January 2, 2003 under clear, warm conditions, Regional Board staff conducted a routine compliance inspection of the above referenced facility. Previous analytical history showed high levels of TSS (122mg/L) and COD (293mg/L). The facility SWPPP was reviewed and found that the Certification statement was not signed. The Monitoring information was up to date and BMPs adjusted as needed. Various improvements have been made since the last rainy season. A grassy swale has been constructed where a soil filled planter area once was. A street sweeper has been purchased and is used continually to remove fugitive saw dust. Extensive baghouse utilization is employed and additional structural barriers to reduce the wind's effect on moving particulate matter off site. With the implementation of these additional BMPs, the site should substantially reduce its pollutant load associated with storm water run off. Documented training specific to storm water requirements was not documented. Additional BMPs should be implemented in the forklift service area. Equipment repair was conducted in an area exposed to storm water. However, oil and grease levels shown on the analytical report were low.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
