Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Eval Notes:	Surf Prescriptions Surfboards 17671 Metzler Ln., A-10 Huntington Beach, CA 92647 (714) 842-4550 On site to conduct new hazardous waste generator inspection. The inspection was conducted with business owner, Jeff Lausch. An EPA ID# form was filled out during the inspection and faxed to DTSC. The facility generates spent acetone from cleaning brushes. Two quart size plastic containers storing spent acetone are kept in a parts washer type stand with a lid. According to owner the acetone is used until it is too dirty to use and then mixed with foam dust to harden and dispose of in municipal trash. I explained that mixing foam dust to harden the acetone is considered treating hazardous and this process must be discontinued. The facility has a empty 55 gallon that will be used to for storing the spent acetone. A label was provided to be placed on the drum. Please be advised that the "accumulation start date" should be written on the label when the drum [Truncated]

Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-30-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with owner Jeff Lausch of Surf Prescription. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste (Waste Acetone) generated was properly stored and labeled. -- Waste manifests were not available. Please send me copies of the last few pickups in order to abate the violation. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Eval Notes: On site to conduct a Hazardous Waste Inspection. Met with Jeff who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: 55 gallon drum of used acetone. Jeff indicated that the prior 55 gallon drum was stolen from facility. Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) It is required to have all hazardous waste picked up by a registered hauler, the manifest are required to be on site for review. .

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Violation Date: 02-08-2024
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 04/01/2024. Observed two 55-gallon drums of Waste Carbide Sludge Filters with an accumulation start date of October 2022 and November 2022 which is past the allotted 180 day accumulation time frame.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Maria Nelson, manager for the site. Facility is a small quantity generator of waste oil/water and grinding sludge waste. Inspected the facility, perimeter, and the hazardous waste storage area. Inspected the municipal trash for hazardous waste. No hazardous waste was observed in the dumpster. Observed hazardous waste management practices and reviewed documentation including manifests and emergency response plan. A copy of this report will be sent to maria@actincorporated.com.

Eval Notes: On site to conduct a routine Hazardous Waste (HW) inspection. Consent to inspect was granted by Angie Herceg. Walked throughout the facility and observed hazardous waste storage areas. - Containers were closed and properly labeled. - Manifests were available and reviewed. Signed copies from the designated facility were obtained during the inspection. - Employees are reported to be trained. - Emergency plan is posted on site. - No hazardous waste or universal waste observed in the dumpster/enclosure area. A copy of this inspection report will be e-mailed to reports@actincorporated.com.

Eval Notes: On site to conduct routine hazardous waste inspection. I walked through the facility and perimeter. I did not observe any hazardous waste in trash cans. Oil/water (1) and carbide sludge (1) drums are stored closed and labeled. Discussed the "start accumulation date" to store waste longer, with office manager, Maria. Manifests were reviewed. An emergency card was provided to be filled out and posted.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Registry ID: 110062909116

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with owner Harold Moore of Moore Manufacturing. Consent was provided to enter and conduct inspection activities. Per Mr. Harold Moore, he will be closing his business within the next few months. I advised him of getting all hazardous waste hauled off and contacting this agency in order to inactivate his hazardous waste account. The following was observed on this date: -- Hazardous waste generated was properly stored and labeled. -- Waste manifests for all waste streams were available for review. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI). The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS database may contain additional details for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Violation Notes: Returned to compliance on 11/06/2019. OBSERVATION: Facility generates more than 100 kg/month of RCRA hazardous waste and has not obtained a federal EPA ID number to ship their hazardous wastes. Currently, the facility is using a California EPA ID number. CORRECTIVE ACTION: Please apply for and obtain a federal EPA ID number via <https://rcrainfo.epa.gov>. Please obtain your EPA ID number within 30 days.

Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: Returned to compliance on 10/29/2019. OBSERVATION: Facility has not made a waste determination to identify if the rinse from the etch process is a hazardous waste. In addition, the facility has not determined if the waste solder mask ink is a hazardous waste prior to curing it in the oven. CORRECTIVE ACTION: Obtain a representative sample of rinse water and send it to a state certified laboratory to test for CAM 17 Metals. Also, obtain a representative sample of the waste solder mask ink and have a state certified lab conduct a fish bioassay (toxicity) test. Provide both test results to this agency for review within 30 days.

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Son Pham, president of the site. Facility is a small quantity generator of etching wastes. Inspected the facility, perimeter, and the hazardous waste storage area. Inspected the municipal trash for hazardous waste. No hazardous waste was observed in the dumpster. Facility has excess (off-spec) solder mask ink that is dried before disposing of it in the municipal trash. The site needs to conduct a waste determination to determine if the ink is hazardous waste prior to letting the material dry or placing in an oven to cure. A violation for waste determination will be cited. Observed hazardous waste management practices and reviewed documentation including manifests and emergency response information. A copy of this report will be sent to sonpham@soldermask.com.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste (HW) inspection. Consent to inspect was granted by Son Pham, President. Also present was Trevor Freeman of OCHCA. Facility is a small quantity generator of printed circuit board manufacturing waste. Rinse waters from the Ferric Chloride etch process is closed loop and hauled away with the spent concentrated Ferric Chloride bath solution via manifest. Pumice dust wastewater from the polishing rinse sinks is pumped to the back storage area tanks and settles, where wastewater is then discharged to sewer on a discharge permit issued by OC Sanitation District and settled pumice dust is then hauled via manifest. Facility also dries excess solder mask ink for disposal to the municipal trash. Facility's consultant and this Agency have reviewed the facility's process and determined that the unused solder mask ink is non-hazardous per SDS and generator knowledge. Walked throughout the facility and observed hazardous waste storage areas. - No haz

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct an annual routine Hazardous Waste Inspection. Met with Son who explained the process, escorted me through the site and gave consent to enter/inspect. Currently no hazardous waste stored on site. Son indicates he labels all drums with the required information once waste is generated. Etching process, Ferric chloride is stored in machine and is taken out periodically. Oxidation of circuit boards. Pumice dust is rarely generated about every 5 years it is cleaned out of the tanks. Any ink that is used is scraped cleaned from containers and containers are disposed of in the municipal trash. Electro polishing, contains Sulfuric Acid and Phosphoric acid. About every 3 years it is disposed of. Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. [Truncated]

Eval Notes: Spoke with Son Pham and consultant on 10/28/19 via phone. Consultant and Son Pham stated they have made a determination, based on generator knowledge - using safety data sheets, that the unused solder mask is not hazardous waste. In addition, Son Pham and his consultant have clarified that the rinse waters from the Ferric Chloride etch process is closed loop and is hauled away with the concentrated bath solution via manifest. For this reason, violation I325 will be voided. After further review of the amount of RCRA hazardous waste generated in the last 12 months, the facility generates more than 100 kg/month of federal hazardous waste. Based on this amount, the facility needs to obtain a federal EPA ID number. Please obtain a federal EPA ID number by applying online via <https://rcrainfo.epa.gov>. Violation I352 will be cited below. A copy of this report will be sent to sonpham@soldermask.com.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

date: -- Hazardous waste generated was properly stored and labeled. The antifreeze containers were missing bung caps. The caps were ordered during this inspection. -- Waste manifests for all waste streams were available for review. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

Eval Notes: On site to conduct a Hazardous Waste Inspection. Met with Laticia (owner) who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: waste oil, waste oil filters, and used antifreeze Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. Hazardous Waste Emergency Response [Truncated]

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violations:

Site ID: 410106
Site Name: PRIMO POWDER COATING
Violation Date: 10-30-2024
Citation: 22 CCR 12 66262.17(a)(1)(D) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.17(a)(1)(D)
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 10/30/2024. Observed the following hazardous wastes stored open during the inspection: - One 275 gal tote bin of under coating waste stored inside the north building. - One 275 gal tote bin of sand blast media waste behind the powder coat/sand blasting units.

Violation Date: 02-17-2016
Citation: 22 CCR 15 66265.35 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 10/18/2017. Adequate aisle space is not maintained for the hazardous waste storage areas. Aisle space must be maintained to allow unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to an area of facility operation in an emergency. Violation must be corrected immediately. A follow-up inspection will be conducted within 30 days of this report.

PRIMO POWDER COATING & SANDBLASTING (Continued)

S113466806

Violation Description: 15, Section(s) 66265.16
Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 03/16/2020. OBSERVATION: Documented training of personnel was not available at the time of inspection. CORRECTIVE ACTION: Locate training documentation or conduct training with applicable personnel and document it. Submit a copy of the training documentation to the CUPA.

Violation Date:	02-15-2018
Citation:	HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description:	Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.
Violation Notes:	Returned to compliance on 02/15/2018. The manifest review process and discussion with Mr. Regan indicated that hazardous wastes generated between 3/8/2017 and 8/7/2017 were stored on site over the allowed 90 days accumulation period. Mr. Regan states hazardous waste are generated daily and storage starts the same week as the last pick-up. Discussed the 90 days accumulation time allowance with Mr. Regan. The current hazardous waste stored on site is within the allowed accumulation time period. Violation corrected at the time of the inspection.

Eval Notes:	INSPECTOR COMMENT: On site for a follow-up RCRA Large Quantity Generator hazardous waste inspection, accompanied by Terry Carrier, Supervising Hazardous Waste Specialist. Consent to enter and inspect was given by Dan Regan, Owner. The inspection included a walk of the sandblasting and color-coating area, perimeter check, hazardous waste storage area, and trash storage areas. Sandblasting activities are still conducted inside a temporary structure located outside of the main building, in the side yard of the facility. Accumulation of the sandblasting waste were observed outside of the enclosed sandblasting area, around equipment and walls of the sandblasting unit in small piles. This Agency took three sets of split samples of the sandblast waste that accumulated on the ground, outside of containment. The first sample was taken at the base of the west door of the sandblasting unit. The second sample was taken at the base of the east side of the sandblasting unit. [Truncated]

Eval Notes:	INSPECTOR COMMENT: On site for a follow-up RCRA Large Quantity Generator hazardous waste inspection, accompanied by Dean Freed, Hazardous Waste Specialist. Consent to enter and inspect was given by Dan Regan, Owner. The inspection included a walk of the sandblasting and color-coating area, perimeter check, hazardous waste storage area, and trash storage areas. Mr. Regan stated the plan to build a new sandblasting unit indoor is no longer happening. Instead, they will be building the new unit outdoor, same location as the current unit. An approximate completion time was not given. Aisle space at the hazardous waste storage area was not sufficient to walk through and view all containers. Hazardous waste containers that were visible were labeled with the required hazardous waste labeling information. The dumpster area was inspected. Waste sandblasting dust were observed inside the dumpster. Discussed aisle space management and trash management with Mr. Regan. [Truncated]

Eval Notes: INSPECTOR COMMENT: Received laboratory results for the waste sand blast dust samples collected on 9/15/2016 during the follow-up inspection. The test results indicated that the samples were hazardous for chromium, a California regulated heavy metal. Copies of laboratory results are included in this report to the facility. A one-gallon container of 2K Epoxy Prime-N-Seal, approximately 20% full, was found in the dumpster. The content was found to be ignitable. Facility failed to conduct proper hazardous waste determination before disposing of hazardous materials. Facility also failed to use a hazardous waste manifest when disposing of hazardous waste. Discontinue allowing waste sand blast dust to be emitted from the sand blast booth or dust collection system. Hazardous waste determination must be made before disposing of hazardous materials and proper documentation must be used for hazardous waste disposal. The following violations remain [Truncated]

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-29-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes:

Regional Board staff conducted a compliance inspection of the above facility on May 29, 2019. Staff met with Mr. Curtis Allen, the LRP. The SWPPP and training records were reviewed and up to date. The SWPPP was dated December 2018 and storm water training was dated March 2019. The facility is currently in Level 1 for Zinc. The facility collected three storm water samples this reporting period. A site walk was conducted and the facility collects a sample from one outfall. Absorbent socks are used as per the facility's Level 1 ERA Report. Housekeeping is conducting once a week. Drums containing flammable liquids are stored outside on secondary containment along with a rank of propane tanks. The facility is currently working to switch their NOI permit to a NEC permit. No violations were observed at the time of the inspection.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-11-2008
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes:

Materials and fluids are stored outside of the facility, and wash water was being discharged to the storm drain at the time of the inspection. No SWPPP for the site.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-01-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes:

Weather: hot and sunny. Contact could not produce a SWPPP; directed to

develop a SWPPP. Observed bar soap scrap waste stored outside in plastic waste barrels; some are open. Most are closed but a few are filled so that a lid cannot be attached securely. Contact advised to ensure lids can be secured. Discussed sample points; advised that there was no need to separately sample roof downspouts unless there was a need to investigate the source of a benchmark excursion. Must continue to sample at curb/gutter of drive entrance.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information
