Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-27-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes:

On site to conduct a routine Hazardous Waste inspection. Met with Mike Harma, Office Manager. The facility is a Small Quantity Generator of automotive repair hazardous wastes from maintenance of the facility's fleet vehicles. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There were no signs of illegal disposal. Hazardous waste manifests were available for review. The facility has an active EPA ID number, CAL000291696. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to lori@cranerentalservice.com.

-----Original Message----- From: Krall, Joyce Sent: Thursday, October 17, 2013 10:02 AM To: 'Jody Bonner' Subject: RE: Emailing: ABOVE GROUND PETROLEUM STORAGE 9-27-13 Hi Jody, Thank you for Crane's APST statement. I looked it over. I believe that Crane also has several more containers storing a petroleum that should be identified. We're interested in all petroleum storage containers 55 gallon or larger. Do you have any waste oil, motor oils, ATF (anything with a petroleum component) stored in a 55 gallon or greater on site? Please confirm for me. Please contact me if you should have any questions. Thank you, Joyce Krall, REHS Hazardous Waste Specialist Environmental Health Department Orange County Health Care Agency 1241 E. Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Jody Bonner, office manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included two 1000 gallon diesel, one 500 gallon red diesel, and one 300 gallon waste oil above ground tanks, along with oil product 55 gallon drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 2-11-13. The plan was on site and available for review. SPILL CONTROL: Secondary containment and spill response equipment was provided as described in the plan. INSPECTIONS: Inspections were reportedly conducted as described in the plan. [Truncated]

Eval Notes: On site to conduct a routine Aboveground Petroleum Storage Tank (APST) inspection. Met with Mike Harma, Office Manager. The facility is a Tier I Qualified Facility of aboveground petroleum storage. The following petroleum storage capacity was observed: - (2) 1,000 gal double-walled tanks - 500 gal double-walled red-dye diesel tank - 300 gal single-walled waste oil tank with secondary containment - (2) 240 gal double-walled motor oil tanks - (8) 55 gal drums of various oils All APSTs on site have appropriate secondary containment. The 1,000 and 500 gallon tanks have tertiary containments which were observed without liquid or debris. The facility's Spill Prevention Control and Countermeasures (SPCC) Plan, dated 2/27/19 was available for review and is complete. Monthly inspection and test logs for APSTs were available for review. Employee training records for employees conducting petroleum handling were available for review. This inspection report was sent to lori@cranerentals

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

EPA ID Number

LABEL IMPRESSIONS INC (Continued)

S113143857

Violation Notes: Returned to compliance on 07/14/2016. Numerous containers sized 5 gallon and less were open and "air drying" behind the facility prior to disposal via the trash. The containers were marked laminating adhesive, gloss UV, matte UV, tints, etc.. In several of the containers, I observed dried shriveled pucks of the container's former contents. The hazardous liquids within the containers had been hazardous waste. The treatment of hazardous waste by evaporation into the air is not allowed. Cease this practice. Prior to open container storage and disposal via the trash, pour-able liquid waste must be removed from these small containers and added to the proper hazardous waste storage containers. On site I was informed by management that the violation would be corrected immediately.

Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 408691
Site Name: LABEL IMPRESSIONS INC
Violation Date: 05-25-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violation Notes: Returned to compliance on 07/14/2016. The hazardous waste accumulated and stored on site had exceeded its allowable storage time. The last documented removal was over 9 months ago. Approximately ten 55 gallon drums of hazardous waste was on site this date. Have the hazardous waste removed by a registered hauler for proper recycling/disposal. Submit a copy of the removal records to this Agency within 30 days.

facility s hazardous waste were not marked with the required information. All containers storing hazardous waste must be marked with the required identifying information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 05-31-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Looked into issues, discussed with supervisor
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 07-14-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: This Agency received the facility's certificate of return to compliance, signed and dated 6-21-16. We also received copies of the manifests for the removal of nonRCRA hazardous wastes (265 gallons of solvent mixture waste, 55 gallons of UV ink waste, and 10 gallons of used oil waste) as supporting documentation. The violations (I400, I053) cited in the 5-25-16 inspection report were corrected.

Eval Division: Orange County Environmental Health

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with George Van Over, General Manager. The facility conducts flexography printing. Operations routinely generate small quantity amounts of waste alcohol for cleaning ink off equipment, and waste ink. The facility has a laundering service for waste rags used to clean ink off parts with alcohol. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site, spill response notification was discussed. Annual employee training records were available for review. No hazardous waste violations were observed this date. This inspection report was [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-25-2016
Violations Found: Yes
Eval Type: Routine done by local agency

Eval Notes: On site for a routine hazardous waste inspection. Mike Ornelas, director of production, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk behind the building. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. We discussed the required information to be marked on containers storing hazardous waste, universal waste, and excluded recyclable material (ERM). The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records were reviewed. We reviewed the proper storage times for a small quantity hazardous waste generator (SQG). We discussed the allowable storage time for satellite hazardous waste accumulation. We discussed the handling of the shop's used oil. We discussed the self-transport of the [Truncated]

Eval Notes: From: Krall, Joyce Sent: Thursday, July 14, 2016 3:17 PM To: 'Mike Ornelas' Subject: RE: HAZARDOUS WASTE INSPECTION Hello Mike, Thank you for your follow up. Attached is the report acknowledging Label Impressions compliance. I ve also attached a State s fact sheet regarding emptied containers simply as a FYI. It talks about handling containers sized less than 5 gallons. For what an empty container is refer to page 2. For how to dispose of the container refer to pages 3-4. Please contact me if you should have any questions. Regards, Joyce Krall, REHS

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Violations:

Site ID: 402597
Site Name: Southern Counties Lubricants LLC
Violation Date: 06-19-2014
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to adequately discuss facility tank car and tank truck loading/unloading rack within the plan.

Violation Notes: Returned to compliance on 07/08/2014. The SPCC states that "spill kits" are to be used in all "loading and unloading areas". There are two kits located inside the building. One of these kits had no absorbent equipment. Also, the outside loading area (east driveway) were tankers unload their petroleum, has no spill kits available on the outside. Immediately have the one kit resupplied and have a new kit placed near the east driveway.

Violation Program: APSA
Violation Source: CERS,

Site ID: 402597
Site Name: Southern Counties Lubricants LLC
Violation Date: 09-23-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 10/17/2016. Two unmarked 5 gallon containers were in use to store hazardous waste oil in the warehouse. Four unmarked drums were in use to store hazardous oily absorbents waste. Containers storing hazardous waste must be marked with the required information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Eval Notes: On site to conduct the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Southern Counties Lubricants/Gibson and Moss. Covered the following SPCC elements: SPCC was on site and available for review. It was written on 12-2-2012. The 5-year re certification is due on/before 12-2-2017. Technical amendments were made to add secondary containment and the amendment section was completed. The facility is planning on adding 4 more 3,000 gallon, double walled ASTs. Be sure to have the PE review these ASTs and amend the SPCC prior to being put into use. Management support and Substantial Harm forms were signed by management. The facility has 30 aboveground storage tanks (ASTs) on site. All are inside the building. AST #1-22 are single walled tanks located in a concrete berm for secondary containment. Tanks #23-30 are double walled and also located inside the concrete berm for tertiary containment. The AST sizes from [Truncated]

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Jeffrey Lee, Director of Safety and Compliance. The facility is an oil distributor, and generates Small Quantities of hazardous waste. Walked throughout the facility and observed the facility's Hazardous Waste storage areas. There is one 180 day storage location, and the facility has satellite waste drums within the warehouse. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to leeje@scoil.com.

Eval Notes: Received and reviewed the facility's SPCC Plan certified by a Professional Engineer on 11/18/19. The plan is acceptable. The facility has an approximate storage capacity of 467,000 gallons of aboveground petroleum. The PE has classified the 6,000 gallon double-walled tanks with tertiary containment as Category 1 tanks, meaning the STI SP001 inspection will be done annually by the business and every 20 years by a certified STI SP001 inspector. Will need to obtain installation dates of the tanks.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Registry ID: 110070316619

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Sergeant Ryan Pierce of Orange County Sheriff s Department. Consent was provided to enter and conduct inspection activities. Hazardous waste generated onsite is limited to air filters/solids collected from (3) on-site gun ranges. Air filters/solids contain lead residue and are considered a RCRA Hazardous Waste. Filters are handled, managed, and transported by HCI Environmental & Engineering Services. Hazardous Waste manifests were available for review. Manifests are consolidated and sent to Mr. Doug Campbell at an off-site location. Please note that manifests (3-yr history) must be available for review when requested by this agency. It was discussed that lead mining occurs at the gun ranges at this facility by TMC Shooting Range Specialists (TMC) of Santa Clarita. Per discussion with Sergeant Pierce, TMC sucks out the rubberized material containing lead, removes the spent lead, and replaces the [Truncated]

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/24/2016. The drums storing hazardous used paint booth exhaust filters and used oil were either unmarked partially marked with the required information. Containers storing hazardous waste must be marked with the required information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 410865
Site Name: CAL WEST MACHINING INC
Violation Date: 09-20-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 10/24/2016. The facility had accumulated hazardous waste on site for over the allowable accumulation storage time. The facility's removal records showed that the last removal of hazardous waste was on 1-8-15. Have the waste removed by a registered hauler by a registered hauler for recycling / disposal immediately. Submit a copy of the removal record to this Agency within 30 days.

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Jorge Buenrostro, Shop Manager. The facility is a Small Quantity Generator of coolant and oil waste generated from CNC machining. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to jorge@cw-machine.com.

Eval Notes:

On site for a routine hazardous waste inspection. Jorge Buenrostro, shop facilities, was present for the inspection and provided consent to inspect. The facility s operations and the waste generated were discussed. The inspection included a walk of the outside lot. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. We reviewed the proper storage times for a small quantity hazardous waste generator (SQG). We discussed the facility s handling of used oily absorbents. The facility maintains absorbents in a container for use when needed. When an adsorbent is saturated with the hazardous waste so that it takes on the characteristics of the hazardous waste, then it must be stored and disposed of as hazardous waste. The records for the removal of the facility's hazardous waste were on site and available for inspection. The records were reviewed. Written spill response [Truncated]

CERS Description: Industrial Facility Storm Water

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-11-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a no exposure certification (NEC) inspection of the above facility on January 11, 2016. No industrial activity is exposed to storm water and thus the facility meets the requirements of the NEC as defined in the IGP. At the time of this inspection, the facility is in compliance with the IGP.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

S112941983

Violation Date: 05-19-2020
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 06/08/2020. HW stored too long
Violation Division: Anaheim City Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 273128
Site Name: Jabil Circuit Inc.
Violation Date: 02-26-2015
Citation: HSC 6.11 25404.1 - California Health and Safety Code, Chapter 6.11, Section(s) 25404.1
Violation Description: Failure to obtain and/or maintain an active hazardous waste generator permit.
Violation Notes: Returned to compliance on 11/16/2016.
Violation Division: Anaheim City Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 273128

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 08/06/2019. One 55 gallon drum of corrosive waste and one cubic yard box of lab pack waste was observed without an accumulation start date on their labels. The date was filled into the labels and this violation is corrected on site. Please ensure containers are labeled as hazardous waste with an accumulation start date once waste accumulation begins.

Violation Date: 06-17-2014
Citation: HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description: Failure to properly dispose of hazardous waste at an authorized location.
Violation Notes: Returned to compliance on 09/14/2015. Dust generated by operations within Filler Room 1 is collected by the dust collector. The dust collector's waste was determined to be hazardous waste by laboratory analysis. Laboratory analysis of the dust collector's waste reported barium at 7,100 mg/kg and silver at 620 mg/kg. Inspection today observed hazardous dust waste generated by operations within Filler Room 1 was in the trash can within the room. Approximately 1/8 cup of dust was visible on top of the trash. Photo was obtained. Photo is attached. The dust waste in the trash can was generated from the same materials and processes as the dust collected by the room's dust collector system. The facility must cease disposal of hazardous waste within the trash. The hazardous dust observed within the trash must be removed and handled correctly. The director informed me that this practice would cease. He informed me that the hazardous dust that was in the trash can, apparently from cleaning of the room, would be [Truncated]

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 06/19/2014. Several drums of hazardous waste liquids were stored open with funnels positioned in their openings. The drums were unattended. Containers storing hazardous waste must be stored closed, except during the addition or removal of waste. The funnels were removed during the inspection, their caps used, and the drums made closed. Violation was corrected during the inspection.

Violation Date: 08-28-2018
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 08/28/2018. OBSERVATION: Five 1 liter amber glass bottles containing triethylamine and/or phosphorus oxychloride were noted in the facility's dumpster. The amber glass bottles were not completely emptied and pourable amounts of liquids were noted. CORRECTED ON SITE: The glass bottles were immediately remove from the trash and will be re-rinse before disposal. According to Eileen Oblea (Environmental Health and Safety Manager) all empty containers containing chemicals are to be triple rinsed and glass containers broken placed in the glass disposal bin and the other containers return to the manufacturer. Ms. Oblea will conduct a housekeeping/container handling and disposal briefing with the staff to ensure the facility's procedures are being followed.

Violation Source: CERS,

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 06-17-2014
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Edwin called to discuss the report. He wants to know when and how the violation will be "taken off". I clarified that my inspection yesterday found that they had corrected the violation. I will provide him a F03 for the re-inspection. The hazardous waste determination is what they are now electing to do. I asked him the composition of the material used in the processes that generate the powder. He claims that it is only glass, methanol, and water. He does not know why heavy metals were detected in the powder waste. I asked for a copy of the initial report showing Ba and Ag HW.

Eval Date: 06-18-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to review the 6-17-14 inspection report with Kerr and to conduct a re-inspection. The re-inspection was to confirm proper handling of the grinding room / filler #1 operation's dust waste. Paul Sloup, plant manager, was present and provided consent to inspect and obtain regulatory related photos. The hazardous waste dust generated by operations within Filler Room 1 had been removed from the trash can within the room. A bagged sample of waste dust had been collected for a hazardous waste determination. A labeled hazardous waste storage container was provided for the waste dust within filler room 1 and was in use. Violation W001 was corrected. The environmental health and safety manager expressed interest in re-conducting a hazardous waste determination of the dust waste generated from operation processes on site. Previously, the dust collector's waste was determined to be hazardous waste by laboratory analysis. Laboratory analysis of the dust collector's waste [Truncated]

Edwin' Subject: RE: HAZARDOUS WASTE DETERMINATION OF IMPRESSION MATERIAL Hello Edwin, Thank you for your email. Kerr is using generator s knowledge in their hazardous waste determination of the impression compound waste. I ve discussed the information provided, along with an MSDS for Kerr Corp.s impression compound (obtained off the internet), with my supervisor. We highly recommend that Kerr evaluate the compound waste as a California recognized hazardous waste by the fish toxicity test. Please contact me if you should have any questions. Regards, Joyce Krall, REHS Hazardous Waste Specialist Environmental Health Department Orange County Health Care Agency 1241 E. Dyer Rd., Suite 120 Santa Ana, CA 92705-5611 jkrall@ochca.com 714 433-6236 (desk) 714-754-1768 [Truncated]

Eval Notes:

On site to conduct a routine Hazardous Waste inspection. Met with Patricia Becker, EH&S Manager. The facility is a LQG of RCRA hazardous wastes generated from manufacturing dental products such as composites and adhesives. A walkthrough of the facility was conducted and the following areas were inspected: production room (yellow room), synthesis lab, grinding room, waste storage area, quality control lab, and research and development lab were inspected. The following was observed. Containers of five gallons or less in capacity are rinsed with methanol. Methanol waste rinsate is stored in 55 gallon drums and frequently hauled offsite. Several satellite waste accumulation containers were observed throughout the facility within proper accumulation time limits. Containers were properly labeled and stored closed. Municipal trash dumpsters were observed and there is no sign of illegal disposal at this time. The following documents were available for review: - [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-09-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Patricia Becker, EH&S Manager. The facility is a Large Quantity Generator of RCRA hazardous wastes from manufacturing dental products such as composites and adhesives. A walkthrough of the facility was conducted and the following areas were inspected: production room, synthesis lab, grinding room, waste storage area, quality control lab, and research and development lab. Several satellite waste accumulation areas were observed with containers within proper accumulation time limits. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpsters were observed. There were no signs of illegal disposal. The following documentation was available for review: - Hazardous waste manifests, active EPA ID number CAR000011155 - Emergency contingency plan - Employee training records - SB14 for 2019 - Biennial report for 2022 - Weekly inspe

Eval Notes: On site for a routine RCRA LQG hazardous waste generator inspection. Edwin Varela, environmental, health and safety manager, was present for the inspection and provided consent to inspect and take regulatory related photos. The inspection included a walk of the outside perimeter of the building and the facility's trash storage areas. Hazardous waste was not observed in the trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. Hazardous waste was stored in a designated hazardous waste storage area and satellite accumulation storage locations in the work areas. The storage containers were closed and labeled with the required information, except as noted above. Proper accumulation time for waste storage was observed. Adequate aisle space was observed. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The bill of ladings for the removal of the facility's [Truncated]

Eval Notes: reviewed HW determination lab report results of impression material with sup. From: Krall, Joyce Sent: Tuesday, July 09, 2013 2:40 PM To: 'edwin.varela@sybrondental.com' Subject: HAZARDOUS WASTE DETERMINATION OF IMPRESSION MATERIAL Hello Edwin, Thank you for taking the time to work with me on Kerr s hazardous waste inspection. I have a question. For the hazardous waste determination of the impression material, which is being removed as non-hazardous waste, laboratory analysis of EPA method 8260B was conducted, correct? Your facility s file reported that for the hazardous waste determination; generator s knowledge regarding regulated metals, reactivity, and flammability was also used. Did you conduct a fish toxicity test? Please advise. Thank you, Joyce Krall, REHS

Eval Notes: On site for a routine RCRA large quantity generator (LQG) hazardous waste generator inspection. Met with environmental manager Eileen Oblea and Lisa Cortez of Kerr. Consent to enter and collect photos was granted by Ms. Oblea/Cortez. The facility's operations and the waste generated were discussed. The storage of the facility's hazardous waste was inspected. Hazardous waste is stored in a designated hazardous waste storage area along with satellite accumulation storage locations throughout the work areas. The following were observed on this date: 1. Proper accumulation time for waste storage was observed. 2. Satellite drums were located throughout the facility and in the control of the operator. All hazardous waste containers were properly stored closed and labeled. Ensure that a second date is placed on the drum once it is deemed full. Maximum time allowed for a satellite drum to be on site is 360 days from the accumulation start date. The inspection [Truncated]

EDR ID Number
EPA ID Number

Database(s)

U001577665

Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Violation Date: 04-27-2023
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 08/03/2023. Valve Not activated at 95%

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Claim Number: 2854, E0041, S0503
Claim Status: Active, Ineligible, Active
Site History: The Site was formerly utilized as a parcel delivery facility that contained a 6,000-gallon underground storage tank (UST) used for unleaded gasoline and later for diesel fuel, and a 10,000-gallon UST used for leaded gasoline, and later for unleaded gasoline. The 6,000-gallon UST was removed from the Site in August 1988, and the 10,000-gallon UST was removed from the Site in February 1998. Wayne Perry Construction conducted a preliminary site assessment in October 1986. One slant boring (B-1) was drilled to a total depth of 55 feet below ground surface (bgs). The boring was angled underneath a 6,000-gallon fiberglass fuel UST (installed in 1976). Hydrocarbon contamination was detected in soil samples collected between 25 and 55 feet bgs. Reports show that the 25-foot sample contained 22,000 milligrams per kilogram (mg/kg) of total petroleum hydrocarbons (TPH) and the 55-foot sample contained 12 mg/kg of TPH. The 6,000-gallon UST was removed in August 1988. Aqua Science Engineers, Inc. (ASE) conducted an additional site assessment in March 1989. Boring N-1 was drilled in the center of the former location of the removed 6,000-gallon UST to a total depth of approximately 65 feet bgs. Two other soil borings (N-2 and N-3) were drilled on opposite sides of the initial boring to depths of approximately 35 feet bgs. Laboratory analyses indicated the presence of hydrocarbon-impacted soil

S118236425

underlying the former UST pit between 15 and 65 feet bgs. TPH as gasoline (TPHg) was detected in soil sample N-2-25' at a concentration of 12,000 mg/kg and in soil sample N-1-65' at 730 mg/kg. TPH as diesel (TPHd) was detected in soil sample N-1-25' at 12,000 mg/kg. According to ASE, the 6,000-gallon UST contained unleaded gasoline from 1976 to the early 1980's, and then diesel fuel until 1986 or 1987. Based on results of the previous assessments, the Orange County Health Care Agency (OCHCA) directed Norco to conduct an additional site assessment to determine the vertical and lateral extents of hydrocarbon-impacted soil and groundwater. In August 1989, five soil borings were drilled and sampled as part of the assessment. Borings NT-1 and NT-5 were drilled to depths of approximately 90 feet bgs; boring NT-4 was to 85 feet bgs; and borings NT-2 and NT3 were drilled to 80 feet bgs. Groundwater was encountered at 75 to 85 feet bgs during drilling. Laboratory analyses indicated the presence of impacted soil underlying the Site from 30 to 75 feet bgs. TPHg concentrations remained below detection limits in all but one sample (2,600. mg/kg in soil sample NT1-40'). The soil sample with the highest benzene concentration (11,000 parts per billion [ppb]) was NT1-40'. Groundwater grab samples were collected from the boreholes prior to backfilling. Aromatic hydrocarbons were detected in groundwater samples collected from all five boreholes. Benzene-in-groundwater concentrations ranged from 2,200 ppb in sample NT-5 to 69,000 ppb in sample NT-1. A soil vapor extraction/heat injection system was installed and put into operation in June 1990 by ASE. The system operated until October 1994. Throughout its operational history, ASE estimated that approximately 45,000 gallons of gasoline was removed from the subsurface soil. ASE conducted another subsurface assessment in February 1990 based on an OCHCA directive. Three groundwater monitoring wells (GMW-1 through GMW-3) were installed at the Site. Two soil samples from each boring (one from the capillary fringe zone and one from the saturated zone) were collected during drilling and analyzed for TPHg and for benzene, toluene, ethylbenzene, and xylenes (BTEX). All results were below detection limits. A groundwater pumping and treatment system was installed in November and December 1990. The system was started in February 1991. Groundwater from GMW-1 was extracted and treated using air stripping and carbon filtration. The system was stopped in May 1991 due to decreased benzene concentrations in groundwater. The system was restarted in April 1993 following an increase of benzene concentrations. Alternating between wells GMW-1 and GMW-2, groundwater was pumped and treated until October 1994. Throughout its operational history, ASE estimated that approximately 400,000 gallons of groundwater was pumped and treated. ASE conducted an additional site assessment in May 1994 to evaluate if there was a release from an existing 10,000-gallon gasoline UST. Two angle soil borings were advanced beneath the UST to linear depths of approximately 30 and 40 feet bgs B-1 and B-2, respectively. TPHg in soil concentrations were observed at low levels, primarily between 30 and 35 feet bgs. The maximum TPHg concentration was 11 mg/kg in sample B2-35'. The maximum detected benzene concentration in soil was 410 micrograms per kilogram (g/kg) in sample B2-35'. The integrity of the UST was also tested at that time, with results showing it was "tight;" as a result, ASA asserted that it likely did not contribute to any subsurface release. The 10,000-gallon UST was removed in February 1999. A subsurface assessment was conducted by Levine-Fricke (LFR) in June and July 1995 under contract with the SARWQCB. The purpose of the

NORCO DELIVERY SERVICE, INC. (Continued)

S118236425

assessment was to determine if the contamination found underlying the Site was due to an up-gradient source. Two soil borings (LF-1 and LF-2) were drilled to 110 feet bgs. Both boreholes were subsequently converted to groundwater monitoring wells (MWLF-1 and MWLF-2). Concentrations of TPHd remained below detection limits in all soil samples. There were two detectable TPHg concentrations, both from boring LF-1. The 75-foot sample contained 0.18 mg/kg TPHg and the 83 foot sample contained 0.14 mg/kg TPHg. Periodic groundwater sampling conducted over a one-month period showed benzene concentrations in groundwater ranging from below the detection limit (0.3 micrograms per liter [g/L]) to 300 g/L (MWLF-1). On January 16 and 17, 2001 and on June 4, 5, and 6, 2001, SGI conducted site assessment and well installation activities. Two new upgradient wells (TSG-MW-4 and TSG-MW-5) were installed in January 2001 to further investigate the upgradient extent of dissolved hydrocarbons. The three new downgradient, off-site monitoring wells (TSG-MW-6, TSG-MW-7, and TSG-MW-8) were installed in June 2001 to investigate the downgradient extent of dissolved hydrocarbons. Beginning in the Second Quarter 2002, a quarterly groundwater monitoring and sampling (M&S) program was initiated by SGI under the direction of the SARWQCB. The M&S program initially included biweekly liquid-phase hydrocarbon (LPH) removal from select wells. Additional assessment activities were conducted in June and July 2003, including drilling and sampling of five boreholes to depths ranging from 100 to 110 feet bgs and one borehole to a depth of 75 feet bgs. All five 100-foot boreholes were then converted to dual-nested groundwater monitoring wells, and the 75-foot borehole was converted to a single-casing groundwater monitoring well. Monitoring well GMW-2 was drilled out and abandoned due to its screened interval being entirely below top of groundwater. Between February and December 2006, SGI conducted additional assessment activities as directed by the SARWQCB following their review of SGI's January 9, 2004 assessment report. These activities included drilling and sampling of five soil borings (SGI-B-1 through SGI-B-5) to approximately 85 feet bgs. Groundwater grab samples were collected from four of these borings (SGI-B-1 through SGI-B-4). Borings SGI-MW-13 through SGI-MW-17 were also drilled, and sampled during this assessment. The boreholes were advanced to depths between 100 and 105 feet bgs. Crossgradient boreholes SGI-MW-13 and SGI-MW-16 and downgradient borehole SGI-MW-15 were converted to dual-nested groundwater monitoring wells. A second, shallower borehole was drilled adjacent to upgradient borehole SGI-MW-17, and these two boreholes were converted to dual-completed well cluster. Downgradient borehole SGI-MW-14 was converted to a single-casing groundwater monitoring well. Further assessment was conducted to adequately define the extent of hydrocarbon-affected groundwater at the Site and site vicinity, as well as further assess the shallow soil vapor plume to the north of the former USTs. Groundwater monitoring well SGI-MW-18S/D was installed within the 1547 South State College Boulevard building, situated between TSG-MW-4 and SGI-MW-17S/D. Two discretely zoned soil vapor probes (SGI-VP-1S and SGI-VP-1D) were also installed within the borehole for SGI-MW-18S. Also, a linear transect of ten shallow soil vapor probes (SGI-VP-2 through SGI-VP-11) were installed at an approximate 50-foot spacing along the northern boundary of the property (adjacent to the railroad right-of-way), in the vicinity of well SGI-MW17S/D. An additional groundwater monitoring well was installed southwest of well SGI-MW-15S/D. Well SGI-MW-19S/D was installed on the southeast corner

of the Westside property, (located at 1111 East Howell Avenue, Anaheim, California). Groundwater samples collected from well SGI-MW-19S/D provide general downgradient plume delineation. A soil vapor survey was conducted using the vapor probes, and select soil samples were analyzed from the soil borings advanced for the monitoring well installations. Between 2002 and 2015, various free product removal technologies were employed at the Site and a reported 61 gallons of free product were removed. From May 2013 to May 2014 another SVE system was operated at the Site. The results of this SVE operation suggested a more powerful SVE system was necessary, and a new SVE system was installed and full scale operation started in July 2015. As of June 2016, the new SVE system had reportedly removed 60,878 pounds of hydrocarbons. The SVE system operation ceased on June 29, 2016 per AQMD Rule 1147 requirements for nitrogen oxides (NOx) testing. The SVE System was restarted in April 2020.
