Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.
Violation Notes: Returned to compliance on 03/07/2016. Facility was not conducting SPCC plan inspections. Conduct the required SPCC inspections and maintain inspection records available for review. Submit a copy of your first inspection record to this Agency for our review within 30 days.

were observed in the municipal trash. Hazardous waste manifests were reviewed from the previous three years. The emergency response plan was observed in the office. A copy of this report was sent to jered.r.deal@kingplastics.com.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-25-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes:

On site for a routine hazardous waste inspection. Jered Deal, compliance manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. I noted that the facility's hazardous waste storage drum, which I was informed contained waste compliance thinner (acetone), was marked to contain waste tetrachloroethylene. I also noted that the facility's manifests recorded the removal of waste tetrachloroethylene. We discussed following up on the correct identification of the hazardous waste. We discussed the required information to be marked on storage containers of hazardous waste. We reviewed the allowable accumulation time for the facility's hazardous [Truncated]

Eval Notes: Emailed Jared Deal of King Plastic in regards to open violations at the facility. Hello Jared, Thank you for sending these manifests. I cannot correct the violation for exceeding accumulation times until you send me the manifest for the grindings so please send that. Also continue to follow up with the APSA violations: The 5 year review must be completed, the tank inspections must be submitted, and the appropriate amendments must be made to update the plan. Provide me documentation of corrective actions as soon as possible so I can close the violations. Thank you

Eval Type: Routine done by local agency
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Jered Deal, compliance manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included shop machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 17-20-14. The plan was on site and available for review. >>The SPCC plan did not identify machine reservoirs that store 55 gallons or more of a petroleum product. Confirm storage capacities and revise the SPCC plan to be accurate. SPILL CONTROL: Secondary containment was provided as described in the plan. INSPECTIONS: We discussed [Truncated]

Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violation Notes: Returned to compliance on 03/07/2016. The 10 gallon container storing hazardous metal dust waste was full and unmarked with an accumulation start date. There were no records for the removal of hazardous metal dust waste removal available for inspection. Hazardous metal dust waste was also noted stored on site 1-13 during routine inspection. The allowable satellite accumulation storage time of one year has been exceeded. In addition, approximately 600 gallons of used oil was on site in a 2,000 gallon AST. There were no records of used oil removal for 2015 to present. The AST was marked with an accumulation start date of 5-11-15. The allowable SQG storage time of 180 days has been exceeded. Have these hazardous wastes removed by a registered hauler for recycling /disposal immediately. Submit a copy of the removal manifests to this Agency for our review within 30 days.

Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Jered Deal, compliance manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included shop machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 17-20-14. The plan was on site and available for review. >>The SPCC plan did not identify machine reservoirs that store 55 gallons or more of a petroleum product. Confirm storage capacities and revise the SPCC plan to be accurate. SPILL CONTROL: Secondary containment was provided as described in the plan. INSPECTIONS: We discussed [Truncated]

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site.

Site ID: 150797
Site Name: Sanders & Wohrman
Violation Date: 10-24-2023
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: Not reported
Violation Division: Orange City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-18-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. John Wohrman, president, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Oversight Agreement
Completed Date: 06/10/2009
Comments: Signed agreement sent (FedEx) to District.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/10/2009
Comments: On July 10, 2009, fieldwork was completed per District's consultant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/03/2009
Comments: Via email on 07/03/2009, DTSC noted that the site sampling plan appeared consistent with discussions with the District's consultant and provided comments on the site sampling plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 10/22/2009
Comments: DTSC did not review the Environmental Assessment Summary Report since the District terminated the EOA (August 2009) prior to receipt of the Report. The report summarized the soil and soil vapor sampling results from fieldwork conducted in July 2009. Maximum concentrations in soil gas include the following: 0.15 ug/l of naphthalene; 580 ug/l of PCE; 20 ug/l of TCE. The risk evaluation estimated the cancer risk due to chlorinated compounds via the vapor intrusion pathway as 1.5 x 10⁻⁵ and the total hazard index as 17. PCE is the primary contributor to risk and hazard.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 07/07/2009
Comments: Via email on July 7, 2009, DTSC received a final copy of the Field Work Notice and was informed that the Notice was posted at the 1010 and 1016 E. Katella properties and delivered to properties within the line of sight of the proposed school property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Agreement Terminated Notification
Completed Date: 08/17/2009
Comments: On August 17, 2009, DTSC received a letter from the District, dated August 12, 2009, with notification that the District is terminating the Agreement effective immediately. The letter also indicates, however, that a summary data report will be submitted to DTSC when ready.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Oversight Agreement
Completed Date: 06/10/2009
Comments: Signed agreement sent (FedEx) to District.
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/10/2009
Comments: On July 10, 2009, fieldwork was completed per District's consultant.
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/03/2009
Comments: Via email on 07/03/2009, DTSC noted that the site sampling plan appeared consistent with discussions with the District's consultant and provided comments on the site sampling plan.
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 10/22/2009
Comments: DTSC did not review the Environmental Assessment Summary Report since the District terminated the EOA (August 2009) prior to receipt of the

Report. The report summarized the soil and soil vapor sampling results from fieldwork conducted in July 2009. Maximum concentrations in soil gas include the following: 0.15 ug/l of naphthalene; 580 ug/l of PCE; 20 ug/l of TCE. The risk evaluation estimated the cancer risk due to chlorinated compounds via the vapor intrusion pathway as 1.5×10^{-5} and the total hazard index as 17. PCE is the primary contributor to risk and hazard.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 07/07/2009
Comments: Via email on July 7, 2009, DTSC received a final copy of the Field Work Notice and was informed that the Notice was posted at the 1010 and 1016 E. Katella properties and delivered to properties within the line of sight of the proposed school property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Agreement Terminated Notification
Completed Date: 08/17/2009
Comments: On August 17, 2009, DTSC received a letter from the District, dated August 12, 2009, with notification that the District is terminating the Agreement effective immediately. The letter also indicates, however, that a summary data report will be submitted to DTSC when ready.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Cost Recovery Closeout Memo
Completed Date: 10/23/2009
Comments: On 10/23/2009, DTSC prepared & transmitted the project close out Cost Recovery Unit Memorandum.

Year: 2021
Gepaid: CAD982459471
TSD EPA ID: NVT330010000
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 18.15

Year: 2021
Gepaid: CAD982459471
TSD EPA ID: CAT080013352
CA Waste Code: 221 - Waste oil and mixed oil
Disposal Method: H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons: 0.62836

Year: 2021
Gepaid: CAD982459471
TSD EPA ID: AZR000521146
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.075

Year: 2021
Gepaid: CAD982459471
TSD EPA ID: CAD982052797
CA Waste Code: 131 - Aqueous solution (2 < pH < 12.5) containing reactive anions ...
Disposal Method: H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons: 1.60551

Year: 2020
Gepaid: CAD982459471
TSD EPA ID: AZR000521146
CA Waste Code: 135 - Unspecified aqueous solution
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-24-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes:

Regional Board staff conducted a compliance inspection of the above facility on July 29, 2019. Staff met with Ms. Blanca Barajas. The SWPPP and training records were reviewed and up to date. Storm water training was dated May 2019. A site walk was conducted and the facility collects storm water samples from two outfalls. Ad Hoc Reports were not created for the 2018-2019 reporting year and Ms. Barajas indicated the facility collected one sample during the reporting period. Ms. Barajas noted she would be inputting the sampling results into SMARTS by the end of business day. Zinc levels were above the NAL for the storm water sample, so the facility is now in Level 1 for Zinc. Housekeeping is conducted once a week. A hazardous waste area is located outdoors, in a bermed area under permanent shelter. A spill kit is located inside the gated area. No violations were observed during the inspection.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Site History:	The first report "Environmental Assessment Summary Report" was prepared by LFR, Inc. on September 3, 2009, for the Anaheim City School District, for the purpose of evaluating the Site's suitability as the location for a school facility. LFR found that tetrachloroethylene (PCE) exists in soil vapor at a maximum concentration of 580 micrograms per liter (8g/L) at the Site (Enclosure 1). Trichloroethylene (TCE) and 1,1,1-trichloroethane (TCA) were also detected in soil gas at concentrations of 20 and 17 I 8g /L, respectively. The PCE concentration in soil vapor was significantly above+ the California Human Health Screening Levels (CHHSLs) for shallow soil vapor for commercial and industrial land use. Based on the results from the first round of sampling at the Site by LFR, the owner of the Site then decided to conduct further investigation of soil and soil vapor at the Site. Tait Environmental Services (Tait) conducted the sampling on November 16 through 19, 2009. A total of 30 soil vapor borings and 6 soil borings were completed on the northwest side of the Site, adjacent to the Brownco facility. Soil vapor samples were collected from 5, 15 and 30 feet below ground surface (bgs). Soil borings were advanced to depths ranging from 48 to 80 feet bgs. Tait issued the "Soil Vapor Screening and Soil Sampling Report" for the Site on January 13, 2010. The report indicates that high concentrations of PCE and TCE were detected in soil and soil vapor. The PCE concentrations in soil vapor ranged from 43 to 4,200 8g /L. PCE concentrations in soil ranged from non-detect to 4.4 micrograms per kilogram (8g /kg). The reported maximum PCE concentration in soil vapor at the Site is 4 orders of magnitude higher than the CHHSLs and as such can indicate a threat to human health through vapor intrusion into a nearby facility. The maximum concentration of PCE in soil is approximately twice the Regional Screening Level (RSL) for soil at the industrial sites. The highest concentrations of PCE in both soil and soil vapor samples were detected in sampling points that were located immediately on the east side of the Site boundary with the Brownco property. Additionally, the iso-concentration contours for soil vapor that were presented in the report for the depths of 5, 15 and 30 feet bgs consistently show a pattern that indicates a source of PCE in soil on the west side of the Jaycox/Brownco boundary. The isoconcentration contours provided for PCE in soil at the depths of 5, 15, 35, and 45 feet bgs (Enclosure X) show a similar pattern. Tait has made the observation that PCE and TCE were present in higher concentrations in the finer grade silt units and in lower concentrations in the

intervening sand units. This observation may indicate that the subsurface soil contamination was caused by an older release of solvents at the surface, in the vicinity of former operations at 1000 East Katella facility. After our review of the information provided by Mr. Van Vlear, Brownco authorized PRWE, Inc. to perform a SVS to confirm if there was merit to the claims made by Mr. Van Vlear in his letter. The SVS was performed at this site on April 23, 2010 under the direct supervision of a Professional Geologist properly licensed in California. The results of the SVS indicate elevated soil vapor concentrations at five foot depths of Perchloroethylene (PCE), Tetrachloroethylene (TCE), and 1,1,1-Trichloroethane (1,1,1-TCA) on the Brownco site. 1,1-Dichloroethene (1,1-DCE) a breakdown product of TCE and 1,1,1-TCA, was also present in two samples. Two soil borings were advanced to groundwater and subsequently converted to triplenested SVE wells. An undisturbed soil sample was collected every 5 feet to groundwater using stainless steel rings and via EPA Method 5035 and analyzed per EPA Method 8260B per the request of the RWQCB. Each soil boring was continuously cored for lithological description. Images recorded during the soil borings and SVE well installation at SB1 are presented on Figure 5. Groundwater was encountered at approximately 81 feet below ground surface (bgs) based only on field measurement. The well elevations have not been surveyed. A groundwater grab sample (along with a split for the RWQCB and a duplicate sample for quality assurance reasons) was collected from each soil boring location after a temporary well casing was installed to allow sufficient groundwater to be collected. Each soil Boring was completed as triple-completed SVE wells with 20 feet of slotted screen at the bottom of each casing. Soil Boring and Well Completion Logs are included in Appendix A. Soil samples from SB1 were collected at 5 foot intervals during advancement to groundwater and a temporary well casing was installed to collect a grab groundwater sample on June 1, 2011. As the groundwater infiltration rate was very slow, the temporary well was left in the secured borehole until June 2, 2011 when the groundwater grab samples were collected. The borehole was subsequently converted to triple-nested SVE wells. On June 3, 2011, soil samples from SB2 were collected at 5 foot intervals during advancement to groundwater and a temporary well casing was installed to collect a grab groundwater sample. As the groundwater infiltration rate was very slow, the temporary well casing was left in the secured borehole until June 6, 2011 when the groundwater grab samples were collected. The borehole was subsequently converted to triple-nested SVE wells, as shown on the well construction diagrams on the boring logs in Appendix A, on Jun 6, 2011. The laboratory analytical results for soil collected from SB1 and SB2 indicated that there was PCE present in all samples to groundwater. The highest concentrations of PCE detected in SB1 and SB2 were both at 10 ft bgs. The PCE concentrations were detected at 2,760 and 1,490 8g/kg, for SB1 and SB2, respectively. The laboratory analytical results for soil collected from SB1 and SB2 indicated that TCE was not present in all samples in either boring. The highest concentrations of TCE detected in SB1 and SB2 was 119 8g/kg at 30 ft bgs, and 70 8g/kg at 70 ft bgs, respectively. 1,1-DCE was only detected in one sample (SB1 at 70 feet) above the laboratory reporting limit. The concentration of 1,1-DCE detected in SB1-70 was 6.6 8g/kg. 1,1,1-TCA was detected only in one sample (SB2 at 45 feet) above the laboratory reporting limit. The concentration of 1,1,1-TCA detected in SB2-45 was 12 8g/kg. The laboratory analytical results

for grab groundwater samples collected from SB1 and SB2 indicated that only PCE and TCE were detected above laboratory practical quantification limits. Results of analysis of the grab groundwater sample collected from SB1 indicated that there was a detectable concentration of 1,500 8g/L of PCE and 140 8g/L of TCE in the groundwater sample. Results of analysis of the grab groundwater sample collected from SB2 indicated that there was an approx average concentration of 700 8g/L of PCE and 195 8g/L of TCE in the groundwater sample. Three groundwater monitoring wells (MW-1, MW-2 and MW-3) were installed at the site on November 2 and 3, 2011, according to the plan presented in the SVE well installation letterreport (PRWE, 2011b). The wells were installed after being permitted by the City of Anaheim, whose inspector visited the site on the morning of November 2, 2011. All work was performed under the direct supervision of a Professional Geologist currently registered in the State of California. The three groundwater monitoring wells were constructed with 4-inch Sch. 40 PVC slotted with 0.010 inch screen from 70 to 90 feet bgs and blank well casing from 70 feet bgs to the well vault at grade. The concentrations of PCE and TCE detected in the groundwater samples collected from MW-1 during this monitoring event were considerably lower than the concentrations detected in the groundwater grab sample collected through the temporary well installed in soil boring SB-1 (subsequently converted to VE-1) in June 201. MW-1 is located within 10 feet of the location where soil boring SB-1 (subsequently converted to VE-1) was advanced to groundwater and the concentrations of PCE and TCE can be compared. The concentrations of PCE and TCE in MW-1 are 63 and 22 8g/L, respectively; compared to 1,400 and 131 8g/L, respectively.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES,

RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Rakesh Prashar, Owner. The facility is a Small Quantity Generator of fuel contaminated wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage areas. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpsters were observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility has an active EPA ID number, CAL000418949. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to jamil.hershewe@7-11.com.

Eval Notes: Our accounting dept. sent me an ARUR citing a change in ownership. Note: city of orange e-submit never notified us of an ownership change. I inspected facility and noted no change in all contacts, mailing addresses, and dba in the paperwork. I did note a change in the EPA ID number. So I contacted Sandy Huff, OE compliance coordinator (800 441-4451 ext 9) for clarification. She stated that the owners only did a name change. All the players and addresses were not changed. The stated that the name change for all other 83 stores were not treated as a change in ownership. She is sending me over the name change docs for my review. She was told that she needed a new EPA ID number so she simply obtained one.

Eval Type: Routine done by local agency
Eval Notes:

On site for a routine hazardous waste inspection. Shaukat Chaudhry, manager, was present for the inspection. The business owner was identified as CST California Stations, Inc. Valero California Retail Company completed a name change to CST California Stations, Inc. on 2-28-13. Sandy Huff, compliance coordinator, submitted supporting documentation. The inspection included a walk of the station s grounds. I did not observe hazardous waste as run off on the ground. The storage of the facility's hazardous waste was inspected. The storage container was closed and labeled with the required information. The signed off manifests and receipts for the removal of the facility's hazardous waste was on site and available for inspection. The 2013 records were reviewed. Spill response directions and emergency contact information were posted for the employees. report copy PDF to Sandy.Huff@CSTBrands.com

Eval Notes: worked with acct. on billing issue. From: Krall, Joyce Sent: Friday, October 04, 2013 8:31 AM To: Harper, Lai Cc: Tran, Cathy; Farrell, Pat Subject: FW: FA0049933 Hi Lai, I just finished talking to Pat regarding this subject. I m cc-ing everyone involved to hopefully avoid confusion. Please reverse the late fees for IN0946936. Thank you! Joyce Krall From: Krall, Joyce Sent: Friday, October 04, 2013 8:17 AM To: Tran, Cathy Subject: RE: FA0049933 Hi Cathy, Please reverse the penalty charge since we are the ones who mailed their paid fee back! Thanks, Joyce From: Tran, Cathy Sent: Wednesday, October 02, 2013 7:57 AM To: Krall, Joyce Subject: FA0049933 Joyce, We received a check from CST California Stations Inc. (Valero California Retail Co) but the staff here accidentally returned the check back to the company thinking there was an ownership change, so the penalty charge hit. Can you please email me authorizing us to reverse [Truncated]

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Eval Notes:	On site for a routine above ground petroleum storage tank (APST) inspection. Shae Howell, safety, security, and environmental affairs manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included shop machine reservoirs and storage drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 1-29-13. The plan was on site and available for review. SPILL CONTROL: Secondary containment and spill response equipment was provided as described in the plan. INSPECTIONS: We discussed the required SPCC inspections. EMPLOYEE TRAINING: We discussed the required annual SPCC training for the [Truncated]

Eval Notes: On site for a routine hazardous waste inspection. Shae Howell, safety, security, and environmental affairs manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The facility's outside lot and dumpster area were walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were requested and provided for inspection. The records for the last year were reviewed. The storage of the facility's hazardous waste was inspected. We discussed the required information to be marked on containers storing hazardous waste. We discussed marking the designated area or bin holding various small closed containers of hazardous waste paint and such with the required identifying information. We discussed the marking of satellite hazardous waste storage containers with the required information. [Truncated]

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 01-11-2002
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes:

Arrived at site vicinity approximately 1300 hours. Clear skies, approximately 72 degrees F. Walked along railroad tracks (north side of business) to the Bitterbush flood control channel. Observed moist soil along fence behind site (back perimeter), with some moss growing on the soil (area is above the flood control channel). A. Buck and P. Copeland climbed down into flood control channel and found three storm drains leading into the flood control channel from the West American Rubber Co. (WARCO) site. The northern-most and southern-most drains appeared to be concrete enclosed corrugated pipe, approximately 18-inches in diameter, draining into the bottom of the flood control channel. The central drain was located closer to the top of the channel (see photographs). Observed some black material deposited on the sides of the northern-most concrete drain leading into the flood control channel from WARCO. Observed a blackish-grey material covering the rocks and soil between the northern-most and southern-most drains. Observed deposit of unidentified pinkish, fibrous substance at the outfall from the southern-most drain into the flood control channel. Water was flowing from the central drain into the flood control channel. A. Buck tested the pH of the water and it appeared to be neutral. Collected samples of the black material (S-1, 1320 hrs, northern-most drain) and the other unidentified material (S-2, 1340 hrs, southern-most drain). Turned the samples and photographs over to the investigations and enforcement unit (SARWQCB).

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes:

Dry and sunny at time of inspection. Review of SWPPP showed a poor sampling location on the site map. Discussed preferable location. SWPPP showed 2 prior WDIDs of 011510 and 004451. Prior inspection and NOV in April/May 2001. Some of same missing and inadequate BMPs as well as poor housekeeping were evident. See 14 pages of photos. White material mixed with water was released onto pavement, but had not left the facility. This appeared to be from a paint clean up operation. The housekeeping was poor in this maintenance area on the south side of the building. Rock filter beds are used on the SW corner of the facility to trap carbon black before it leaves to the flood control channel. These are changed once a year in April according to site personnel. They were very black in color. In the nearby storage area some large old pipes had leaked oil onto the pavement. Grease and oil coated an exposed axle/pipe and rubber drippings coated some iron

racks. One open drum was half full of oil with no secondary containmnet. On the other side of the building, one SD inlet was plugged and black water had ponded there. A sample was taken and a split given to WARCO. The water also had an oily sheen. Between 2 large buildings there was a series of at least 3 SD inlets and a mop bucket and other leaks were draining in this area. Art thought they drained to the sewer, and said he would try to verify this. It appeared to inspectors they were obviously SDs. A look in the chanel showed a discharge at the middle outlet form the facility.

Eval Notes: General housekeeping has improved since last inspection. No unauthorized discharges were seen. There was a small spill of ZEP cleaner to be cleaned up. Another improvement is that there was less old equipment stored outdoors. A final determination is still to be made by Environ as to the connection of 3 storm drains in the center alley of the facility to the sanitary sewer of to the flood control channel. Art was very helpful and glad to see that the improvements were noted. He said new ownership is working hard to improve environmental compliance. A letter will be written to Art Ruben thanking him for improvements, encouraging them to continue, and requesting info on center drain's final destination.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that

the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.12
Year:	2021
Gepaid:	CAD982370132
TSD EPA ID:	CAD008488025
CA Waste Code:	792 - Liquids with pH <= 2 with metals
Disposal Method:	H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons:	3.44037
Year:	2021
Gepaid:	CAD982370132
TSD EPA ID:	NVT330010000
CA Waste Code:	791 - Liquids with pH <= 2
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.22936

Violation Description: Failure to provide initial and annual training to employees, who handle cyanide process solutions, cyanide-containing rinse waters, or manage cyanide-containing aqueous waste, on how to reduce wastes in the production area, including, but not limited to, procedures to: 1. reduce drag-out of plating baths, 2. minimize contaminants in process baths, 3. extend process bath life, 4. minimize chemical spills and splashes from process and rinse solutions handling practices, and 5. respond to chemical spills to reduce waste and minimize releases from process and rinse solutions handling practices.

Violation Notes: Returned to compliance on 05/13/2020. Annual employee training records for employees handling cyanide were not available for review. The most recent training records were dated 4/17/18. Within 60 days have the employees trained and maintain training records for a minimum of three years. Training documentation should consist of: topic and date of training, employee name, signature and title/responsibilities.

Eval Date: 09-11-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct a California Accidental Release Program Level 1 reinspection. Met with Nithesh Paramesh, Director of Operations. Violation I570 was cited during a routine inspection on 12/11/18 due to the storing over 100 lbs of potassium cyanide in storage and plating baths without a Risk Management Plan in place. The facility has provided calculations of cyanide concentrations in copper cyanide plating baths in tanks 13, 14, and 15, showing 73 lbs of cyanide. A walkthrough of the facility was conducted and observed chemical storage areas. At this time the facility is below process thresholds for potassium cyanide. The facility has arranged with their chemical supplier to receive cyanide in 90 lb containers. Mr. Paramesh will ensure there is not at any point over 100 lbs of cyanide in storage at any one time. Please note the facility will be subject to the requirements of a Risk Management Plan per Title 19 Division 2 Chapter 4.5 of the California Code of [Truncated]

Eval Date: 09-13-2017
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a compliance inspection of the above facility on September 13, 2017. Ad Hoc Reports from 2016-2017 showed very high levels of Nitrite + Nitrate of 204.04 mg/L (0.68 mg/L). The SWPPP was reviewed and needs to be re-written to be in compliance with the General Permit. A Monitoring Implementation Plan, Site Map, and all appendices were missing from the SWPPP. The Pollution Prevention Team needs to be updated and properly trained on sampling and monitoring requirements. The last training records that were provided were from 11/24/2015. A site walk was conducted and an uncovered boneyard with used industrial equipment was observed at the northeast corner of the site. Ms. Falcone noted the used industrial equipment will be cut up to scrap metal in the next couple of weeks. Evidence of unauthorized non-storm water discharges from the chiller in the eastern portion of the facility was observed during the inspection. Photos were taken.

Eval Notes: On site to conduct a Tiered Permitting PBR reinspection. Met with Charles Berry, Nithesh Paramesh and Jose Sanchez. The following violations cited on 12/6/18 were corrected this date: I229 - The exteriors of all tanks within the hazardous waste treatment unit are marked with the facility owner/operator name, EPA ID number and serial number. I015 - The facility's closure plan was available for review and is complete. The following violations remain outstanding: I009 - Professional engineer assessment of the treatment system is not available for review. Mr. Berry stated the engineer was on site mid December and should have the completed assessment soon. Please send me the assessment as soon as it becomes available. I011 - Tiered permitting submittal to California Environmental Reporting System (CERS). The submittal is still pending corrections. Mr. Berry stated he is waiting for management approval on the closure cost estimate before resubmitting. Please resubmit [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Tiered permitting Permit By Rule (PBR) inspection. Met with Heather Falcone, CEO, and Tyler DiBartolo, Consultant. Additionally present were OCHCA inspectors S. Berg and V. Lee. Walked throughout the facility and inspected plating lines and the hazardous waste treatment area. Process treatment floors were dry. There have been changes to the system due to closed process lines. Discussed which wastes are treated prior to disposal. Tyler DiBartolo stated the facility is no longer treating hazardous wastes due to the copper plating line being removed. The facility was operating two PBR Fixed Treatment Units (FTUs) as follows: FTU#1 Batch treatment: Aqueous rinse waters from cleaning baths on the nickel-plating line, dragout baths from the copper plating line, and rinse waters from the aluminum cleaning line are treated by pH adjustment and metal precipitation followed by filter press. FTU#2 Cyanide treatment: Tank #16 on the copper plating line with cyanide

Eval Notes: Called and spoke with Nithesh Paramesh, Director of Operations, about outstanding violations and return to compliance. The following violations remain outstanding: I162 The facility has obtained a Professional Engineer certified hazardous waste tank assessment, however the engineer stated the secondary containment is inadequate due to opening in the concrete berm. The facility stated the opening leads to a grate with a sump to capture any liquids which would escape the containment area, which would be pumped back to the tanks for treatment. Please obtain a certification for the secondary containment. I175 The contingency plan was received by this Agency but is missing components required per Title 22, 66265.52 (d-f). Immediately submit corrections to the contingency plan. This report was sent to nparamesh@thermalvac.com.

and Ad Hoc Reports have not yet been submitted for the 2017-2018 reporting period. Staff met with Sean Driscoll, Director of Operations. Mr. Driscoll did not have knowledge of where the SWPPP or training records were kept. A site walk was then conducted. Industrial materials and equipment were observed without BMP implementation in the maintenance area at the northeastern portion of the facility. Mr. Driscoll noted that tarps are deployed during rain events. 55-gallon drums containing waste oil were observed without cover or secondary containment. Scrap metal and industrial equipment were observed stored without BMP implementation at the northeastern corner of the facility. A Notice of Violation, dated September 19, 2017, was issued regarding the observations. 55-gallon drums containing unknown liquids were observed next to the property fence line without BMP implementation. Totes and 55-gallon drums of unknown liquids without BMP implementation were observed in the waste water treatment area at the northern portion of the facility. The facility's Level 1 ERA Report BMP implementation schedule notes that old equipment and materials will be removed or covered by 10/2/2017. Mr. Driscoll noted that they are planning on constructing permanent overhead cover for the maintenance and waste water treatment areas.

Process floors in plating areas were observed dry at this time. The perimeter of the facility was walked and the municipal trash dumpster was inspected, there were no signs of illegal disposal. Cyanide contaminated wastes are segregated and stored in a separate container. Waste sandblasting media is now also being stored in a container and managed as hazardous waste. The facility is no longer recycling waste acetone on site for re-use. Waste acetone is now being managed and disposed of as hazardous waste. [Truncated]

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct a Tiered Permitting Permit By Rule reinspection. Met with Heather Falcone, CEO. Walked throughout the facility and inspected the treatment unit and cyanide plating line. At this time the facility does not have holding racks or drain boards in between process tanks to contain cyanide dragout solutions. Heather stated the facility has purchased drain boards, which should be arriving to the facility within a few weeks. The following documentation was available for review: - Source reduction review of cyanide-containing process baths as part of the SB14 documentation - Inspection logs of hazardous waste tanks within the treatment unit, and logs of waste undergoing treatment, including type of waste, how much was treated and date of treatment Employee training records for cyanide treatment were not available for review at this time. Violations I019 and I362 have been corrected at this time. Violations I230 and I527 remain outstanding. A [Truncated]

Eval Notes: On site to conduct a routine Tiered permitting Permit By Rule (PBR) inspection. Met with Heather Falcone, CEO, and Exequiel Tostado, Consultant. Walked throughout the facility and inspected plating lines and the hazardous waste treatment area. Discussed which wastes are treated prior to disposal. The facility is operating two PBR Fixed Treatment Units (FTUs): FTU#1 Batch treatment Aqueous rinse waters from cleaning baths on the nickel plating line, dragout baths from the copper plating line, and rinse waters from the aluminum cleaning line are treated by pH adjustment and metal precipitation followed by filter press FTU#2 Cyanide treatment Tank #16 on the copper plating line with cyanide-containing dragout rinse water is treated by addition of hypochlorite, followed by pH adjustment, metal precipitation and filter press The exteriors of the treatment units were marked with required information. Secondary containment of the treatment unit was observed dry. [Truncated]

Eval Notes: The facility's PE assessment and contingency plan were reviewed. The assessment dated 1/24/19 is missing the certification statement listed in 66270.11(d) as required by Title 22, 66265.192 (a). Seismic calculations were missing per 66265.192 (a)(5). In the assessment the engineer has concluded that secondary containment is inadequate due to an opening in the concrete curb. Spoke with the facility whom stated the opened section of the concrete curb leads to a grate which would capture any liquids and said liquids would get pumped back to treatment. At this time the secondary containment will be deemed inadequate until the engineer concludes it is adequate. Violation I162 remains outstanding. The contingency plan is missing components 66265.52 (d f). Violation I175 remains outstanding. This report was sent to Heather Falcone at heather@thermalvac.com and Nithesh Paramesh at nparamesh@thermalvac.com.

Eval Notes:	Received an email correspondence from CW Berry of Thermal Vac regarding the quantity of Potassium Cyanide that will be utilized at the facility. Per Mr. Berry, the facility will be well below the 100 TQ threshold. Sorry for delay, I had 47 CERS filings to do!! We have reduced to amount we store below the 100 pound limit. I have confirmed the amount in the tanks is 81 pounds based on lab analysis from Western Analytical Labs. I can send lab reports if you would like. I will be at Thermal-Vac tomorrow and confirm the details of storage and send that confirmation to you. We have arranged with Miles Chemical to purchase Potassium Cyanide in smaller packaging. Thanks CW

Eval Notes: CERS ID 10517683 Tiered Permitting submittal dated 7/23/20 was declined on 7/28/20 and remains declined. Violation I011 for not providing an acceptable submittal remains outstanding. Please make the following corrections and resubmit within 30 days - Financial

Assurance documents were reviewed and not accepted since closure costs are 2018 closure costs. This facility did not submit correct closure costs for 2019 since same costs as 2018 costs were submitted. California regulations require that you adjust estimated costs for closing the treatment system by an inflation factor annually. Also, please be advised that the salvage value of your assets must be reviewed on an annual basis to be sure that depreciation and changes made to your inventory of equipment are reflected in the salvage value estimate. The following calculations must be made in order to obtain correct closure costs for 2020: 2018 closure cost estimate = \$18,450.00 - \$66,262.50 (salvage value) = - [Truncated]

Violation Description: Failure to determine if the waste generated is a hazardous waste.

Violation Notes: Returned to compliance on 07/25/2024. An aluminum etching process line was observed in Building 2. The following tanks produce a waste: - 2 (Alkaline cleaner rinse) - 4 (Alkaline etch rinse) - 6 (Acid deoxidizer rinse) - 8 (Acid deoxidizer rinse) - 9 (Acid brite drip) - 10 (Empty drip tank) - 11 (Empty drip tank) - 12 (Desalt rinse) - 13 (Rinse) A nickel etching process line was observed in Building 3. The following tanks produce a waste: - NP2 (Aqueous cleaner rinse) - NP6 (Rinse) - NP14 (Rinse) - NP22 (Triple rinse) - Rinse tank (Between NP4 and NP18) The wastes from the aluminum and nickel process lines go to a sump and then to the neutralization tank to undergo pH adjust prior to discharge to sanitation. Analytical results were not available at each point of waste generation for characteristic of corrosivity prior to neutralization.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Tiered permitting Permit By Rule (PBR) inspection. Met with Heather Falcone, CEO, and Tyler DiBartolo, Consultant. Additionally present were OCHCA inspectors S. Berg and V. Lee. Walked throughout the facility and inspected plating lines and the hazardous waste treatment area. Process treatment floors were dry. There have been changes to the system due to closed process lines. Discussed which wastes are treated prior to disposal. Tyler DiBartolo stated the facility is no longer treating hazardous wastes due to the copper plating line being removed. The facility was operating two PBR Fixed Treatment Units (FTUs) as follows: FTU#1 Batch treatment: Aqueous rinse waters from cleaning baths on the nickel-plating line, dragout baths from the copper plating line, and rinse waters from the aluminum cleaning line are treated by pH adjustment and metal precipitation followed by filter press. FTU#2 Cyanide treatment: Tank #16 on the copper plating line with cyani

Eval Notes: Called and spoke with Nithesh Paramesh, Director of Operations, about outstanding violations and return to compliance. The following violations remain outstanding: I162 The facility has obtained a Professional Engineer certified hazardous waste tank assessment, however the engineer stated the secondary containment is inadequate due to opening in the concrete berm. The facility stated the opening leads to a grate with a sump to capture any liquids which would escape the containment area, which would be pumped back to the tanks for treatment. Please obtain a certification for the secondary containment. I175 The contingency plan was received by this Agency but is missing components required per Title 22, 66265.52 (d-f). Immediately submit corrections to the contingency plan. This report was sent to nparamesh@thermalvac.com.

Eval Notes: On site to conduct a Tiered Permitting Permit By Rule reinspection. Met with Heather Falcone, CEO. Walked throughout the facility and inspected the treatment unit and cyanide plating line. At this time the facility does not have holding racks or drain boards in between process tanks to contain cyanide dragout solutions. Heather stated the facility has purchased drain boards, which should be arriving to the facility within a few weeks. The following documentation was available for review: - Source reduction review of cyanide-containing process baths as part of the SB14 documentation - Inspection logs of hazardous waste tanks within the treatment unit, and logs of waste undergoing treatment, including type of waste, how much was treated and date of treatment Employee training records for cyanide treatment were not available for review at this time. Violations I019 and I362 have been corrected at this time. Violations I230 and I527 remain outstanding. A [Truncated]

Eval Notes: On site to conduct a routine Tiered permitting Permit By Rule (PBR) inspection. Met with Heather Falcone, CEO, and Exequiel Tostado, Consultant. Walked throughout the facility and inspected plating lines and the hazardous waste treatment area. Discussed which wastes are treated prior to disposal. The facility is operating two PBR Fixed Treatment Units (FTUs): FTU#1 Batch treatment Aqueous rinse waters from cleaning baths on the nickel plating line, dragout baths from the copper plating line, and rinse waters from the aluminum cleaning line are treated by pH adjustment and metal precipitation followed by filter press FTU#2 Cyanide treatment Tank #16 on the copper plating line with cyanide-containing dragout rinse water is treated by addition of hypochlorite, followed by pH adjustment, metal precipitation and filter press The exteriors of the treatment units were marked with required information. Secondary containment of the treatment unit was observed dry. [Truncated]

Eval Notes: The facility's PE assessment and contingency plan were reviewed. The assessment dated 1/24/19 is missing the certification statement listed in 66270.11(d) as required by Title 22, 66265.192 (a). Seismic calculations were missing per 66265.192 (a)(5). In the assessment the engineer has concluded that secondary containment is inadequate due to an opening in the concrete curb. Spoke with the facility whom stated the opened section of the concrete curb leads to a grate which would capture any liquids and said liquids would get pumped back to treatment. At this time the secondary containment will be deemed inadequate until the engineer concludes it is adequate. Violation I162 remains outstanding. The contingency plan is missing components 66265.52 (d f). Violation I175 remains outstanding. This report was sent to Heather Falcone at heather@thermalvac.com and Nithesh Paramesh at nparamesh@thermalvac.com.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

WDS:

Name: INDEPENDENT FORGE COMPANY
Address: 692 N BATAVIA
City: ORANGE
Facility ID: Santa Ana River 30I004199
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: 7149977337
Facility Contact: ROSE MARY RUIZ
Agency Name: INDEPENDENT FORGE COMPANY
Agency Address: 692 N. BATAVIA
Agency City,St,Zip: ORANGE 92668

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Description: Chapter 15, Section(s) 66265.173
Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 03/26/2018. A open top tank was used to store hazardous waste liquid. This container cannot be closed and is not appropriate to store a hazardous waste liquid. Transfer this liquid out into an appropriate container that can be closed properly.

training to ensure employees are competent in the following areas:
hazardous waste management procedures (including contingency plan
implementation) relevant to the positions in which they are employed,
emergency response and emergency equipment, and procedures for using,
inspecting, repairing, and replacing facility emergency and monitoring
equipment. In addition, the owner/operator shall ensure facility
personnel take part in an annual review of the initial training and
training records training records on current personnel shall be kept
until closure of the facility. Training records on former employees
shall be kept for at least three years from the date the employee last
worked at the facility. The records shall include the following: the
job title for each position at the facility related to hazardous waste
management, and the name of the employee filling each job; a written
job description for each position, duties of facility personnel
assigned to each position, and a written description of the type and
amount of both introductory and continuing training that will be given
to each person filling a position.

Violation Date: 02-20-2014
Citation: HSC 6.5 25244.21 - California Health and Safety Code, Chapter 6.5,
Section(s) 25244.21

Violation Description: Failure of the generator to adequately complete, and maintain for
review, the following requirements of the source reduction report
(SB-14): 1) The name and location of the site; 2) Telephone number; 3)
Identification Number; 4) The SIC Code5; 5) Length of time the company
has been in business at the present site; 6) Major products
manufactured or services provided and, if necessary to convey an
understanding of the business, their general applications or examples
of their applications or end use; 7) Number of employees; 8) A general
description of site Operations/Maintenance with corresponding block
diagrams focusing on quantity and type of hazardous wastes, raw
materials, and final products produced at the site; 9) Identification
of all routinely generated hazardous waste streams that annually weigh
600 kg or more and that result from ongoing processes or
Operations/Maintenance and exceed 5 percent of the total yearly weight
of hazardous waste generated, for extremely hazardous waste, that
annually weigh 0.6 kg or more and exceed 5 percent of the total yearly
weight of extremely hazardous waste generated at the site; 10) For
each hazardous waste stream identified the report shall include all of
the following information: A) An estimate of the quantity of hazardous
waste generated, B) An evaluation of source reduction approaches
available and are potentially viable. The evaluation shall consider at
least all of the following source reduction approaches: i) Input
change. ii) Operational improvement. iii) Production process change.
iv) Product reformulation. v) Administration/ Documentation steps
taken to reduce hazardous waste generation including but not limited
to: (A) Inventory control; (B) Employee award programs; (C) Employee
training; (D) In-house policies; (E) Corporate or management
commitment; and (F) Other programs or measures, 11) Consideration of
the following factors for each measure evaluated in accordance with
subsection (10) of this section (where a specific factor does not

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 06/09/2021. One tote and one 55 gallon drum within the waste treatment area were observed full of filter cake and not stored closed. Please immediately have the containers closed and ensure all containers used to store hazardous waste in the future are kept closed when waste is not actively being poured into the container.

Violation Date:	02-20-2014
Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes:	Returned to compliance on 04/14/2016. SB 14 source reduction compliance documents were not available for inspection. Provide

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 06/09/2021. The most recent training documentation indicated employees were last trained 3/16/20. Within 60 days please train employees conducting hazardous waste handling activities and maintain documentation for review.

class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 08/25/2020. Employee training for employees conducting waste handling activities is not being conducted annually. Employee training records that were available for review are not current. Within 60 days please conduct training for these employees and have records available for review by this Agency.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 09/10/2019. Three hazardous waste containers were observed stored open as noted in the report. Hazardous waste containers must be stored closed when waste is not being added or removed. Two of the containers are unable to be stored closed and should not be used to store hazardous waste. Within 30 days, please discontinue using these containers to store hazardous waste and have the waste removed. Please obtain a cover for the filter cake hopper.

Eval Notes: An inspection was conducted on a neighboring business when staff observed a discharge to the storm drain from the facility. The company is a plater. Staff asked that the discharge of non-stormwater, originated from a yard washdown, be stopped. Mr. Ibarra agreed to do that. Based on info from Mr. Ibarra and their consultant, Mr. Anil Desai, they are working on the NOI and the SWPPP. Told Mr. Ibarra and Mr. Desai of a concern that the production area is being slopped to discharge to the storm swale and the adjacent storm drain and flood control channel. The production area shows evidence of spill of chemicals and tracks from forklifts being carried outside. The company contact stated that they would do something such as building a berm to contain the spill and would sweep the area on a regular basis. Mr. Desai showed a report of the lab analysis of a storm water taken the previous weeks. All the results looked within the benchmark ranges.

Eval Notes: Please be advised that this Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2014 Adjusted Closure Cost Estimate (CCE) was not properly calculated since it appears that the 2012 CCE was used. There is a comment "same as last year 2013 & inflation factor" on the attached Estimated Closure Cost (ECC). However, the copy of ECC submitted is from 2012. This Agency received a new closure cost and salvage value in 2013 (enclosed). The 2014 CCE is your 2013 CCE (\$7,784.19) multiplied by a factor of 1.014 which is \$7,893.17 - salvage value (\$6,698.09). Revised Certification Of Financial Assurance Form and Estimate Closure Cost (enclosed) must be submitted to this Agency by 3/27/14.

Eval Notes: On site to conduct a RCRA Hazardous Waste Large Quantity Generator reinspection. Met with Adan Ibarra, President. The following violations were cited during a routine inspection on 3/20/19: I070 - Weekly inspection logs of hazardous waste containers were not available for review. At this time records of weekly inspections for hazardous waste containers were still not available for review. Mr. Ibarra stated the inspections are being done, but he was unsure where the records were being kept. Within 30 days please maintain the records for review by this Agency. I145 - Hazardous waste containers, which were unable to be stored closed as required by Title 22 regulations, were observed storing waste. A walkthrough of the facility was conducted this date. All hazardous waste containers were observed stored closed at this time, violation I145 is corrected. This inspection report was sent to brandycorona13@yahoo.com and richardamezaga@hotmail.com.

Eval Notes: On site to conduct a routine Hazardous Waste inspection, accompanied by Dean Freed. The facility's consultant, Bart Hamlett, was present for the inspection. The facility is a Large Quantity Generator of RCRA hazardous waste. Walked throughout the facility and observed hazardous waste generation points and storage areas. Waste generation and operations were discussed. There are two areas where plating is conducted. Nickel and Tin plating is conducted in one suite of the building and zinc plating and anodizing are conducted in another suite. Both process floors are said to be cleaned everyday using vacuum pumps and waste is batch treated. Several process tanks along the zinc plating, anodize, and alkaline zinc plating lines are plumbed to three respective lift stations, which are plumbed to the continuous treatment system. Hazardous waste containers and tanks were observed. One tank labeled ZC-7 in the process line is being used to store waste floor wastewater. [Truncated]

Eval General Type: Other/Unknown
Eval Date: 03-27-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Evaluation concludes 4 tanks and no containers to be the correct count

for the continuous treatment unit. However, clarification is necessary as to the operation and use of the batch treatment tank. Also, the tour along with the review of the 6-29-12 PE tank assessment report confirmed that the batch treatment tank, which was also in use as a pre-treatment tank for the continuous flow, was not included in the 6-29-12 PE assessment report. The drum rinsing is itself a separate unit. If batch treatment tank is a pretreatment tank for the continuous flow unit, then that adds one tank for the continuous flow unit. The waste to be treated within the batch treatment unit must be confirmed. If the batches are different in content, then each treatment process would be unique and require its own unit identification.

wastes generated from metal plating and anodizing operations. Walked throughout the facility and observed hazardous waste generation points, storage areas, and the waste treatment area. Nickel and tin plating, zinc plating and anodizing, and waste treatment are conducted in different suites. The nickel and tin plating area was observed. OC Sanitation District has not permitted waste treatment operations from this plating line. When wastes are generated they are pumped into totes and moved to the treatment unit. The waste treatment suite was inspected. Rinse waters from the suite with zinc plating and anodizing are plumbed to respective lift stations, which then get pumped to the continuous treatment system. Waste process floor waters, rinse waters from the nickel and tin plating area, and container rinse waste get batch treated. I walked thro

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-20-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine PBR inspection. The PBR units were FTU #1 (Continuous WW treatment), FTU #2 (Batch Treatment). Antonio Garcia, office manager, was present for the inspection and provided consent for the inspection and regulatory related photos. The secondary containment beneath units FTU #1 and FTU#2 was dry. The facility had replaced the batch treatment unit s tank. The former tank was still present. It contained approximately 5 gallons of liquid, which was reported to be water captured from spillage from the above mixing of flocculent. Required documentation was not reviewed this date. Richard Amezaga, environmental representative, was not present due to illness. He requested by phone that documentation review be conducted at a later date so that he could participate. I requested that he contact me once he returns to schedule the document inspection date. I never received a return call. An inspection was then attempted 3-13-14. The 2:45 pm inspection [Truncated]

Eval Notes: On site for a routine RCRA hazardous waste large quantity generator (LQG) hazardous inspection. Antonio Garcia, office manager, was present for the inspection and provided consent for the inspection and regulatory related photos. The inspection included a walk behind the building and the facility's trash storage areas. A half full spray can of rustoleum metallic finish was observed in an inside trash container. The can was removed for further use; or proper disposal as a hazardous waste. Hazardous waste was not observed as run off on the ground. The storage of the facility's hazardous waste was inspected. We discussed the required identifying information to be marked on containers and tanks storing hazardous waste. Adequate aisle space was observed. Required documentation was not reviewed this date. Richard Amezaga, environmental representative, was not present due to illness. He requested by phone that documentation review be conducted at a later date so [Truncated]

Eval Notes: On site for a follow-up inspection. Met with Brandy Corona of Cadillac Plating. Consent was provided to conduct inspection activities and to take photos. The following was observed: - Electricity for the entire facility has been restored. - Treatment operations have been ongoing sporadically. The treatment system was not operating. - (1) 275-gallon tote containing floor waste was dated 6/15/2017 is past the 90-day accumulation time (see violation I125 below). - (1) open-topped tank was full of liquid floor waste. Hazardous must be stored closed (see violation I145 below). - hazardous waste manifests were not available as they are under the control of Richard Amezaga.

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given

Violation Date: 05-05-2021
Citation: 22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.

Violation Notes: Returned to compliance on 06/09/2021. This violation is cited for two instances: 1) The waste process floor was being utilized as a hazardous waste tank by storing waste process floors for longer than a day and reportedly up to a week. Immediately begin removing waste process floor waters at least daily or per shift or obtain a PE certified Hazardous Waste Tank Assessment for the process floor. 2) Waste process floor water was being stored in an uncertified tank on the process line. This is a repeat violation from the routine inspection in 2019, in which the facility agreed this tank would be used to store excess process material water, and not waste process floor water. Immediately discontinue using this tank to store hazardous waste or obtain a PE certified Hazardous Waste Tank Assessment.

Violation Date: 02-20-2014
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 04/14/2016. SB 14 source reduction compliance documents were not available for inspection. Provide documents for inspection.

Violation Description:	Failure to comply with general tank operating requirements: (a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. (b) The owner or operator shall useing appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: (1) spill prevention controls (e.g., check valves, dry discount couplings); (2) overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and (3) maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.

Violation Date:	03-09-2020
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 08/25/2020. Employee training for employees conducting waste handling activities is not being conducted annually.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 09/10/2019. Three hazardous waste containers were observed stored open as noted in the report. Hazardous waste containers must be stored closed when waste is not being added or removed. Two of the containers are unable to be stored closed and should not be used to store hazardous waste. Within 30 days, please discontinue using these containers to store hazardous waste and have the waste removed. Please obtain a cover for the filter cake hopper.

Citation: 22 CCR 15 66265.193 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.193
Violation Description: Failure of the LQG and/or TP generator, on all new and existing hazardous waste tank systems and ancillary equipment, to meet the following secondary containment requirements: 1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and 2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed. 3) Constructed of or lined with materials that are compatible with the waste(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrological forces), physical contact with the waste to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation (including stresses from nearby vehicular traffic); 4) Placed on a foundation or base capable of providing support to the secondary containment system and resistance to pressure gradients above and below the system and capable of preventing failure due to settlement, compression, or uplift; 5) Provided with a leak detection system that is designed and operated so that it will detect the failure of either the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the existing detection technology or site conditions will not allow detection of a release within 24 hours; 6) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health or the environment, if removal of the released waste or accumulated precipitation cannot be accomplished within 24 hours.
Violation Notes: Returned to compliance on 04/20/2017. Written logs documenting the inspections conducted were not available for inspection. Provide the logs for review.

Eval Notes: On site to conduct a reinspection. The facility has completed their Summary Progress Report and Hazardous Waste Management Performance Reports for their SB14 documentation. Violations I047 and I079 cited on 12/4/18 are corrected. Please note, September 1, 2019 is the next reporting period. The batch treatment tank now has an overfill prevention device. Violation I545 cited on 3/23/17 is corrected. Two emergency eyewash/shower stations were observed functioning properly with plumbed water. Violation I068 cited on 3/26/18 is corrected. All outstanding violations have now been corrected. This inspection report was sent to Richard Amezaga at richardamezaga@hotmail.com.

Eval Notes: On site for a routine RCRA large quantity generator (LQG) hazardous waste inspection. Met with Owner Adan Ibarra and Wastewater Treatment Operator Richard Amezaga of Cadillac Plating. Also present was Timothy Grogan of OCHCA. Consent to enter and collect photos was granted by Mr. Ibarra. Bri Dewey of OCHCA collected photos. The facility's operations and the waste generated were discussed during this inspection. The facility is composed of 4 different Units in a building complex. Each Unit serves a different purpose in the operation of Cadillac Plating. Mr. Amezaga stated that the batch treatment line had been shut down on January 23, 2017 by the Sanitation District due to faulty/missing equipment. The storage and management of the facility's hazardous waste was inspected. The majority of the facility's hazardous waste is stored in the northernmost building (Nickel and Tin Plating also conducted in this building periodically). Hazardous waste however, was also [Truncated]

Eval Notes: An inspection was conducted on a neighboring business when staff observed a discharge to the storm drain from the facility. The company is a plater. Staff asked that the discharge of non-stormwater, originated from a yard washdown, be stopped. Mr. Ibarra agreed to do that. Based on info from Mr. Ibarra and their consultant, Mr. Anil Desai, they are working on the NOI and the SWPPP. Told Mr. Ibarra and Mr. Desai of a concern that the production area is being slopped to discharge to the storm swale and the adjacent storm drain and flood control channel. The production area shows evidence of spill of chemicals and tracks from forklifts being carried outside. The company contact stated that they would do something such as building a berm to contain the spill and would sweep the area on a regular basis. Mr. Desai showed a report of the lab analysis of a storm water taken the previous weeks. All the results looked within the benchmark ranges.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine RCRA LQG hazardous waste generator inspection. Richard Amezaga, manager, was present for the inspection and provided consent to inspect and take regulatory related photos is needed. The inspection included a walk behind the facility. Hazardous waste was not observed in the trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. We discussed the required information to be marked on containers storing hazardous waste. We discussed maintaining the bins of hazardous filter cake waste closed when not actively adding waste. We discussed the hazardous waste management training provided to employees. We discussed the maintenance of the plating line area s floor. The floor during line operation was wet and accumulating liquids. The manager reported that the floor is drained every morning to be dry. He stated that the collected waste water was then transferred to the PBR unit for treatment and [Truncated]

Eval Notes: On site to conduct a RCRA Hazardous Waste Large Quantity Generator reinspection. Met with Adan Ibarra, President. The following violations were cited during a routine inspection on 3/20/19: I070 - Weekly inspection logs of hazardous waste containers were not available for review. At this time records of weekly inspections for hazardous waste containers were still not available for review. Mr. Ibarra stated the inspections are being done, but he was unsure where the records were being kept. Within 30 days please maintain the records for review by this Agency. I145 - Hazardous waste containers, which were unable to be stored closed as required by Title 22 regulations, were observed storing waste. A walkthrough of the facility was conducted this date. All hazardous waste containers were observed stored closed at this time, violation I145 is corrected. This inspection report was sent to brandycorona13@yahoo.com and richardamezaga@hotmail.com.

Eval Date:	03-20-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine Hazardous Waste inspection, accompanied by Dean Freed. The facility's consultant, Bart Hamlett, was present for the inspection. The facility is a Large Quantity Generator of RCRA hazardous waste. Walked throughout the facility and observed hazardous waste generation points and storage areas. Waste generation and operations were discussed. There are two areas where plating is conducted. Nickel and Tin plating is conducted in one suite of the building and zinc plating and anodizing are conducted in another suite. Both process floors are said to be cleaned everyday using vacuum pumps and waste is batch treated. Several process tanks along the zinc plating, anodize, and alkaline zinc plating lines are plumbed to three respective lift stations, which are plumbed to the continuous treatment system. Hazardous waste containers and tanks were observed. One tank labeled ZC-7 in the process line is being used to store waste floor wastewater. [Truncated]

Eval Type:	Other, not routine, done by local agency
Eval Notes:	compared inspection findings with PE tank count. New batch tank was not assessed in report. Old batch tank and the flocculant mixing tank were assessed. The 3 rinse water collection sumps in the next room were assessed. Total tanks were not the same as forms.
Eval Division:	Orange County Environmental Health
Eval Program:	PBR
Eval Source:	CERS,
Eval General Type:	Other/Unknown
Eval Date:	03-27-2014
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Evaluation concludes 4 tanks and no containers to be the correct count for the continuous treatment unit. However, clarification is necessary as to the operation and use of the batch treatment tank. Also, the tour along with the review of the 6-29-12 PE tank assessment report confirmed that the batch treatment tank, which was also in use as a pre-treatment tank for the continuous flow, was not included in the 6-29-12 PE assessment report. The drum rinsing is itself a separate unit. If batch treatment tank is a pretreatment tank for the continuous flow unit, then that adds one tank for the continuous flow unit The waste to be treated within the batch treatment unit must be confirmed. If the batches are different in content, then each treatment process would be unique and require its own unit identification.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-16-2002
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a routine compliance inspection of the above facility on May 16, 2002. The SWPPP has not been recertified since August 30, 2000. The plan also needs to be updated to include new staff as the pollution prevention team, as well as, the observation logs. All industrial activities are conducted indoors. Staff asked Mr. Ibarra to continue monitoring and implementing the program. Once the Regional Board office receives the facility's annual report, staff may recommend coverage under the General Permit be terminated.

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Adan Ibarra The facility is a Large Quantity Generator of RCRA hazardous wastes generated from metal plating and anodizing operations. Walked throughout the facility and observed hazardous waste generation points, storage areas, and the waste treatment area. Nickel and tin plating, zinc plating and anodizing, and waste treatment are conducted in different suites. The nickel and tin plating area was observed. OC Sanitation District has not permitted waste treatment operations from this plating line. When wastes are generated they are pumped into totes and moved to the treatment unit. The waste treatment suite was inspected. Rinse waters from the suite with zinc plating and anodizing are plumbed to respective lift stations, which then get pumped to the continuous treatment system. Waste process floor waters, rinse waters from the nickel and tin plating area, and container rinse waste get batch treated. I walked thro

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine PBR inspection. The PBR units were FTU #1
(Continuous WW treatment), FTU #2 (Batch Treatment). Antonio Garcia,
office manager, was present for the inspection and provided consent
for the inspection and regulatory related photos. The secondary
containment beneath units FTU #1 and FTU#2 was dry. The facility had
replaced the batch treatment unit s tank. The former tank was still
present. It contained approximately 5 gallons of liquid, which was
reported to be water captured from spillage from the above mixing of
flocculent. Required documentation was not reviewed this date. Richard
Amezaga, environmental representative, was not present due to illness.
He requested by phone that documentation review be conducted at a
later date so that he could participate. I requested that he contact
me once he returns to schedule the document inspection date. I never
received a return call. An inspection was then attempted 3-13-14. The

Eval Notes: On site for a routine RCRA hazardous waste large quantity generator
(LQG) hazardous inspection. Antonio Garcia, office manager, was
present for the inspection and provided consent for the inspection and
regulatory related photos. The inspection included a walk behind the
building and the facility's trash storage areas. A half full spray can
of rustoleum metallic finish was observed in an inside trash
container. The can was removed for further use; or proper disposal as
a hazardous waste. Hazardous waste was not observed as run off on the
ground. The storage of the facility's hazardous waste was inspected.

Eval Notes:

On site for a follow-up inspection. Met with Brandy Corona of Cadillac Plating. Consent was provided to conduct inspection activities and to take photos. The following was observed: - Electricity for the entire facility has been restored. - Treatment operations have been ongoing sporadically. The treatment system was nt operating. - (1) 275-gallon tote containing floor waste was dated 6/15/2017 is is past the 90-day accumulation time (see violation I125 below). - (1) open-topped tank was full of liquid floor waste. Hazardous must be stored closed (see violation I145 below). - hazardous waste manifests were not available as they are under the control of Richard Amezaga.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that

Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174

Violation Description: Failure to inspect weekly areas where hazardous waste containers are stored. The owner or operator must look for leaking containers and for deterioration of containers caused by corrosion or other factors.

Violation Notes: Returned to compliance on 08/04/2016. Records of weekly hazardous waste storage area inspections were not available for inspection. Weekly inspections are required. A written log of inspections is recommended. Submit a copy of the current inspection log to this Agency within 30 days.

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 08/04/2016. A drum storing hazardous waste debris was open with no lid, and located in an unattended area adjacent to the PBR unit's hazardous rinse water holding tanks. Containers storing hazardous waste must be stored closed, except when actively adding or removing waste. Provide closed hazardous waste storage container for the waste immediately. Once corrected, notify this Agency.

Violation Date:	10-24-2013
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 06/04/2014. The paint booth over spray hazardous debris waste, which was observed on 6-19-13, was removed. However, the waste was not removed as a hazardous waste and could not be located this date for inspection. The operator suspected that the employees had discarded the waste via the trash. The paint over spray debris waste must be handled as a hazardous waste unless demonstrated to be non hazardous. In order to make a hazardous waste determination, have a representative sample of the waste analyzed by a state certified lab for California regulated heavy metals (Title 22, CCR). Perform a Total Threshold Limit Concentration (TTLIC) analysis and if necessary, a Soluble Threshold Limit Concentration (STLC) analysis. Submit a copy of the lab analysis report to this Agency for evaluation and comment. If the waste is not analyzed, or if the lab analysis results are above Title 22, CCR hazardous waste criteria, then the paint over spray waste must be handled as hazardous waste. [Truncated]

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 08/22/2019. One cubic yard bag containing filter cake waste beneath the treatment unit s filter press was observed stored open. Containers with hazardous waste must be kept closed when waste is not being added into the container. The container was closed during the inspection, violation corrected on site.

Eval Type: Industrial Storm Water Compliance Evaluation

Eval Notes: Michelle Beckwith and I met with Jeff Bailey (owner). The SWPPP was dated 6/23/2009 and said that there are non-storm water discharges of atmospheric condensate. Mr. Bailey said that this was not accurate, and that they plumb the condensate to the treatment area. I told Mr. Bailey to update this section of the SWPPP and reminded him of the July 1st deadline for the new permit. Mr. Bailey gave consent to tour the facility and to take pictures. A small alley was present in the west of the building. Paint was observed around an open window. Mr. Bailey said they were painting inside and most likely some of the paint splashed outside. He said he would prevent this from happening in the future. I told Mr. Bailey to either remove exposure in the western part of the facility or take an additional storm water runoff sample from the southwestern edge of the exposed yard. See attached photos.

Eval Notes: On site for a routine hazardous waste RCRA LQG inspection. Jeff
Bailey, owner, was present for the inspection and provided consent to
conduct the required inspection and obtain photos. The facility's
operations and the waste generated were discussed. The inspection
included a walk outside of the building and of the facility's trash
storage areas. Hazardous waste was not observed in the trash or as run
off on the ground. The owner reported that they handle their paint
booth over spray debris waste as hazardous waste. The hazardous waste
storage container at the spray paint booth was reportedly used for the
over spray debris. The violation (W001) cited on the 10-24-13
inspection report was corrected. The facility had begun the operation

The salvage value of your assets must be reviewed on an annual basis to be sure that depreciation and changes made to your inventory of equipment are reflected in the salvage value estimate. If you believe that your salvage value has remained the same since 2013, be sure to maintain documentation reflecting your estimated salvage value.

Eval Notes: On site to conduct a routine Tiered Permitting inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility is operating one Permit By Rule treatment unit. Wastewater being treated is from anodizing process baths and is hazardous for pH and Title 22 regulated metals. Wastewater is pumped from process line tanks to two holding tanks, one for low pH and one for high pH. Wastewater from the holding tanks is pumped to a tank where pH adjust is done with sulfuric acid and caustic, and flocculation is done to precipitate out regulated metals. Sludge which settles to the bottom of the tank is then put through a filter press. Treatment tanks were properly labeled with business ownership, facility ID, and individual serial numbers, violation I. Process floors appeared to be clean. Per

Eval Notes: On site to conduct a Hazardous Waste inspection. The facility has acquired 950 and 960 N Parker St, which are part of the same building. A walk through of these locations was conducted, 960 N Parker St is used as storage space for chemicals used by Dunham Metal Processing. No hazardous waste was observed at 960 N Parker St. The facility is doing business as Tech Plate at 950 N Parker St. Per Mr. Bailey, plating is not conducted at this location. Sandblasting units for preparation of parts were observed. The sandblasting media is reported to have not been changed out of the machines or otherwise disposed of. Discussed hazardous waste management practices with Mr. Bailey and the facility is choosing to manage the blasting media as hazardous waste. Please note, you may have a Total Threshold Limit Concentration (TTL) test for Title 22 CCR regulated heavy metals done by a State Certified Laboratory to determine if the waste is hazardous. Containers of copper sulfate [Truncated]

Eval Notes: Please be advised that this Agency has received and reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2014 Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to the salvage value as well as the total closure costs. You cannot apply the inflation factor to the salvage value. The inflation factor must be applied to total cost closure and then the salvage value can be deducted. Therefore, the adjusted closure cost for this facility is \$6,960.68 (\$12,073.78 - \$5,113.10). Revised Certification Of Financial Assurance Form and Estimated Closure Cost form (enclosed) must be submitted to this Agency before 3/31/14.

Violation Date: 06-15-2016
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 08/04/2016. A drum storing hazardous waste debris was open with no lid, and located in an unattended area adjacent to the PBR unit's hazardous rinse water holding tanks. Containers storing hazardous waste must be stored closed, except when actively adding or removing waste. Provide closed hazardous waste storage container for the waste immediately. Once corrected, notify this Agency.

Violation Division: Orange County Environmental Health

Violation Date: 10-24-2013
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 06/04/2014. The paint booth over spray hazardous debris waste, which was observed on 6-19-13, was removed. However, the waste was not removed as a hazardous waste and could not be located this date for inspection. The operator suspected that the employees had discarded the waste via the trash. The paint over spray debris waste must be handled as a hazardous waste unless demonstrated to be non hazardous. In order to make a hazardous waste determination, have a representative sample of the waste analyzed by a state certified lab for California regulated heavy metals (Title 22, CCR). Perform a Total Threshold Limit Concentration (TTL) analysis and if necessary, a Soluble Threshold Limit Concentration (STLC) analysis. Submit a copy of the lab analysis report to this Agency for evaluation and comment. If the waste is not analyzed, or if the lab analysis results are above Title 22, CCR hazardous waste criteria, then the paint over spray waste must be handled as hazardous waste. [Truncated]

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Michelle Beckwith and I met with Jeff Bailey (owner). The SWPPP was dated 6/23/2009 and said that there are non-storm water discharges of atmospheric condensate. Mr. Bailey said that this was not accurate, and that they plumb the condensate to the treatment area. I told Mr. Bailey to update this section of the SWPPP and reminded him of the July 1st deadline for the new permit. Mr. Bailey gave consent to tour the facility and to take pictures. A small alley was present in the west of the building. Paint was observed around an open window. Mr. Bailey said they were painting inside and most likely some of the paint splashed outside. He said he would prevent this from happening in the future. I told Mr. Bailey to either remove exposure in the western part of the facility or take an additional storm water runoff sample from the southwestern edge of the exposed yard. See attached photos.

Eval Notes:	On site for a routine hazardous waste RCRA LQG inspection. Jeff Bailey, owner, was present for the inspection and provided consent to conduct the required inspection and obtain photos. The facility s operations and the waste generated were discussed. The inspection included a walk outside of the building and of the facility's trash storage areas. Hazardous waste was not observed in the trash or as run off on the ground. The owner reported that they handle their paint booth over spray debris waste as hazardous waste. The hazardous waste storage container at the spray paint booth was reportedly used for the over spray debris. The violation (W001) cited on the 10-24-13 inspection report was corrected. The facility had begun the operation of an electro-less nickel tank. We discussed the handling of its used filters as hazardous waste. We discussed the identification of this waste on manifests. The storage of the facility's hazardous waste was inspected. We [Truncated]

Eval Type: Routine done by local agency
Eval Notes:

On site to conduct a routine Tiered Permitting Permit By Rule (PBR) inspection. Met with Garrett Bailey, General Manager. The facility conducts continuous treatment of the following process baths: cleaner, dye rinses, waste process floors, anodize rinses, electroless nickel plating rinses. Process baths undergoing treatment are plumbed to one of two low pH and high pH hazardous waste holding tanks, or backup tanks. Waste from the tanks is plumbed to the treatment unit and feeds to the treatment continuously until a desired pH is reached. The waste undergoes treatment by pH adjustment, followed by flocculation and settling, and dewatering by filter press. Clean water at the top of the treatment unit clarifier goes to the sewer for disposal. Water separated through the filter press returns to the low pH waste tank. The exterior of the treatment unit FTU#2 was marked with required information. Secondary containment was observed dry. CERS ID 10539883

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Garrett Bailey, General Manager. The facility is a Large Quantity Generator of RCRA Hazardous Waste which conducts hazardous waste treatment, anodizing, electroless nickel plating and sand blasting operations. The facility also occupies 960 N Parker St and the property is contiguous. Walked throughout the facility and observed the following. Caustic cleaner, dye bath and rinse tanks, anodize line and electroless nickel plating line were observed. The cleaner bath and all process rinse baths are plumbed to one of two low pH and high pH hazardous waste holding tanks for treatment. There are an additional two backup holding tanks for overflow. Counter current rinsing is being utilized for the anodize and electroless nickel plating lines. Wet process floor trench waste is pumped to the low pH holding tank daily. The low and high pH wastes are pumped to the treatment unit alternately to balance pH as a [Truncated]

Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine Tiered Permitting inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility is operating one Permit By Rule treatment unit. Wastewater being treated is from anodizing process baths and is hazardous for pH and Title 22 regulated metals. Wastewater is pumped from process line tanks to two holding tanks, one for low pH and one for high pH. Wastewater from the holding tanks is pumped to a tank where pH adjust is done with sulfuric acid and caustic, and flocculation is done to precipitate out regulated metals. Sludge which settles to the bottom of the tank is then put through a filter press. Treatment tanks were properly labeled with business ownership, facility ID, and individual serial numbers, violation I. Process floors appeared to be clean. Per the facility, residual liquids on the floors are vacuum pumped to the treatment system daily. The facility has submitted Tiered Permitting Unit [Truncated]

Eval Notes: On site to conduct a Hazardous Waste inspection. The facility has acquired 950 and 960 N Parker St, which are part of the same building. A walk through of these locations was conducted, 960 N Parker St is used as storage space for chemicals used by Dunham Metal Processing. No hazardous waste was observed at 960 N Parker St. The facility is doing business as Tech Plate at 950 N Parker St. Per Mr. Bailey, plating is not conducted at this location. Sandblasting units for preparation of parts were observed. The sandblasting media is reported to have not been changed out of the machines or otherwise disposed of. Discussed hazardous waste management practices with Mr. Bailey and the facility is choosing to manage the blasting media as hazardous waste. Please note, you may have a Total Threshold Limit Concentration (TTL) test for Title 22 CCR regulated heavy metals done by a State Certified Laboratory to determine if the waste is hazardous. Containers of copper sulfate [Truncated]

Eval Notes: Please be advised that this Agency has received and reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The 2014 Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to the salvage value as well as the total closure costs. You cannot apply the inflation factor to the salvage value. The inflation factor must be applied to total cost closure and then the salvage value can be deducted. Therefore, the adjusted closure cost for this facility is \$6,960.68 (\$12,073.78 - \$5,113.10). Revised Certification Of Financial Assurance Form and Estimated Closure Cost form (enclosed) must be submitted to this Agency before 3/31/14.

Eval Notes: On site for a routine hazardous waste treatment tiered permitting permit by rule (PBR) inspection. Met with facility operator Carlos Alonso of Dunham Metal Processing. Consent to enter and collect photos was granted by Mr. Alonso. The PBR unit consists of 1 unit (FTU 2 pH adjust). FTU-2 includes (5) hazardous waste tanks. Spent process water is pH adjusted to precipitate the heavy metals. Solids go to a filter press to remove excess water. Water is directly placed into a POTW. The exterior of each unit was marked with the proper Unit #s, except the filter press (see violation I229 below). The secondary containment beneath each unit is maintained on a daily basis per Mr. Alonso. The following was observed: Copper crystals were observed on the outside of a few tanks. Tanks should be maintained relatively free of crystals. Caustic rinse line was leaking from the coupler. Crystals were observed forming on the line itself as well as (2) pvc lines below it. Eval Notes: On site for a routine RCRA large quantity generator (LQG) hazardous waste generator inspection. Met with facility operator Carlos Alonso of Dunham Metal Processing. Consent to enter and collect photos was granted by Mr. Alonso. The facility's operations and the waste generated were discussed. The storage of the facility's hazardous waste was inspected. Hazardous waste is located under the filter press. Once the sack storing the filter press is removed, it is immediately hauled off by a registered hauler. Therefore, there is no designated hazardous waste location at the facility. Occasional solids from the facility are placed in the filter cake sack and disposed of as hazardous waste. The following were observed on this date: Copper crystals were observed on the outside of a few tanks. Tanks should be maintained relatively free of crystals (see violation I333 below). Caustic rinse line was leaking from the coupler. Crystals were observed forming on the line [Truncated]

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/23/1991
Comments: SSI Report was reviewed by Region 4 staff and recommends NFA by Site Mitigation. HRS I score preliminarily 2.22. The reasons for low scoring are: Remediation of soil was completed by Orange County, Santan Ana River is not used for drinking or recreation, and present use of the property is by Nursery Supplies Inc.
