Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will

likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Violation Notes: SWPPP had conflicting information, does not include all waste storage areas, site map did not include all required information.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-03-2015
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Adam Fischer and Barbara Barry met with Brian Kim, director of operations, who told employees Eddie and Christian to provide a tour of the facility. Christian takes storm water samples but said he didn't collect samples during the last rain event because he wasn't there. Ms. Barry said to ensure that there are additional personnel available to sample. The SWPPP was missing required elements, had conflicting information concerning potential pollutants and their location, said that there were no storm water drains located at the facility, and the site map was not complete. Only one sampling location is indicated on the site map. An additional sample needs to be taken to capture runoff from the soy waste storage area. See attached photos for details of the inspection.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.

The FINDS: database may contain additional details for this site.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-12-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On-site for a CalARP routine inspection. Met with Ernesto Solorzano, Sidra Javand, and Dan Sparks this date and obtained consent to conduct the inspection. This is a Program Level 2 facility that uses anhydrous ammonia in a chiller system. The total charge of the system is 5,280 pounds of anhydrous ammonia. The RMP was certified on 07/24/13 by Jesus Valdez, the Plant Superintendent. Brett Bohlander is now the Facility Leader and was present during the inspection. Hazard Assessment: Completed on 07/15/13 by SCS Tracer. The assessment contains a worst case and alternate case scenario for a release of the anhydrous ammonia. The assessment also includes information on sensitive and environmental receptors. Seismic assessment: Completed in July of 2013 and listed three (3) recommendations. All of these recommendations have been completed. Hazard review: Conducted in June of 2013. There were 21 recommendations all of which appear to have [Truncated]

Eval Notes: On-site for a routine CalARP inspection. Met with Dan Sparks and Greg Noland of Cargill. EHS manager Kimberly Cruz was not available during this inspection. Also present was Brandon Aprahamian of OCHCA. This facility is regulated under CalARP Program Level 2 requirements for Anhydrous Ammonia. The facility maintains (1) processes that has a maximum ammonia charge of approximately 5,280 pounds. Cargill operators along with C&L Refrigeration Inc operate the anhydrous ammonia system. The Program Level 2 RMP was reviewed. The following were observed: -- RMP Certification: The RMP was last certified on 7/24/2013. The RMP needs to be revalidated every 5 years. Your RMP revalidation was due on 7/24/2018. The RMP information is no longer current and needs to be updated. See violation below. -- The Executive Summary was reviewed and was complete. -- The Worst-Case Release Analysis was reviewed and appeared accurate based on model parameters. -- The Alternative [Truncated]

Eval Notes: On site to conduct a routine hazardous materials inspection. Consent

to enter and inspect was granted by Greg Noland, Facility Leader. The hazardous materials observed onsite were consistent with the hazardous materials inventory submitted in the California Environmental Reporting System on 2/29/2024. As a reminder, the facility is responsible for identifying all hazardous materials, including hazardous wastes, whose quantities exceed the disclosure thresholds (55 gallons - liquid; 500 lbs - solid; 200 cu.ft. - flammable gas; and 1,000 cu.ft. - non-flammable gas). Documented employee training was verified. Verified HMBP components in CERS submittal dated 2/29/2024. No hazardous materials violations were observed during the inspection. Emailed a copy of the report to greg_noland@cargill.com.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

Violations:

Site ID: 593745
Site Name: Pulmuone Foods USA Inc
Violation Date: 11-03-2023
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95,
Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the
business plan is complete and accurate on or before the annual due
date.
Violation Notes: Business failed to annually certify HMBP.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 11-03-2023
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: According to the CERS database, your business remains out of
compliance with the annual certification requirement and a violation
is being cited. Businesses are required to annually review and certify
that their information in the California Electronic Reporting System
(CERS) is complete, accurate, and in compliance by March 1st. Please
visit <https://cers.calepa.ca.gov/> to access CERS and submit your
completed HMBP forms. Failure to submit HMBP forms is a violation of
the California Health & Safety Code and California Code of
Regulations. Progressive enforcement will be taken by this Agency if a
submittal/certification has not been completed within 30 days of this
report. If you have any questions regarding this violation, please

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-19-2023
Violations Found: No
Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine inspection. Consent to enter, inspect,
and take photos of the facility was given by Daniel No, EHS
Specialist. Observed the facility and inspected hazardous materials
storage. The following materials were observed in amounts that meet or
exceed the minimum volumes required for disclosure: - propane - argon
- aqua serv 4939 - lead acid batteries - R448 Requirement for
certification of HMBP is due annually between January 1st- March 1st:
- Business Activities - Owner/Operator Information - Hazardous
Materials Inventory - Site Map - Emergency Response Plan - Employee
Training Plan HMBP certified 1/5/2024. Violation 1010008 (Annual
Review / Certification) corrected. The facility is responsible for
identifying all hazardous materials, to include hazardous wastes,
which are above disclosure thresholds If there is a change in the type
or amount of chemicals that are maintained on site, submit revised
documents in CERS within 30 days of the change. Hazardo

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS database may contain additional details for this site. Please contact your EDR Account Executive for more information.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS database may contain additional details for this site.

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Site History: Former Keyes Fibre was a manufacturer of Styrofoam food containers. PCE and TCE were used for the manufacturing process. Soil contamination in the areas north and south of the parking lot were detected. Several environmental investigations were conducted for the upper saturated zone (aka A-Zone) which occurs in laterally discontinuous sand up to 25 feet deep. Various technologies used for treatment of soil and groundwater at the A-Zone. Another contaminant, 1,4-Dioxane, was discovered with concentrations up to 400 g/L in the A-Zone. The consultant provided the rationale that because of very low hydraulic conductivity at that zone and a very good sealing provided by the A/B aquitard, 1,4-Dioxane mass will not be harmful to

any nearby groundwater resources with a beneficial use. A site closure for the A-Zone was granted in July 2004. During investigations for the A-Zone, it was discovered that the lower saturated zone (aka B-Zone) has also been contaminated with PCE and TCE. The B-zone occurs in interbedded silts and clays with relatively continuous sand to a depth of 55 feet. Geomatrix conducted pilot testing for an in-situ bioremediation approach for the Site. Corn syrup was used to enhance the microbial activities at the subsurface. Two injection wells BIO-2 and BIO-3 were used for this purpose. Some decrease of PCE and TCE concentrations was observed in the two wells. However, the breakdown product was only 1,2-DCE. No vinyl chloride or ethene was detected which suggests that biodegradation was not completed as expected. Groundwater flow direction for the B-zone is toward west/northwest. Additional investigation was conducted in September and October 2009. High concentrations of PCE and TCE were found in the source area. They were also detected in the downgradient area of the Site. Additional investigation in the downgradient areas and a focused FS was conducted in 2010. The lateral delineation of the implicated groundwater was completed. The FS proposed in-situ bioremediation as the most viable alternative for the groundwater cleanup. An extensive treatability study in the form of in-well BioTrapsbench was conducted in 2011 to determine the most promising amendment for the ISB. A pilot test is scheduled for early 2012.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-09-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Alex Silva, manager. Walked throughout the facility. Observed hazardous waste storage areas. All containers of hazardous waste were closed and the solvent waste was properly labeled and the spray booth filters container did not have the word hazardous waste, generator information, content composition, physical state hazardous properties, and accumulation start date. Manifests were available and reviewed for their solvent waste. Alex stated that Pacific Coast Lacquer doesn't give him a manifest for his spray booth filters. Discussed needing to get a manifest for their spray booth filters. Employees are reported to be trained. Emergency plan information is not posted. The dumpster/enclosure was observed, no signs of dumping.

Eval Notes:	Gabriel Navarro and then Alex Silva (Manager) consented to/assisted with this routine, annual haz waste inspection. Onsite this date to investigate a postal return for an earlier date. This agency has recorded a PO Box 2006, Fullerton 92837 , mailing address that trigger a postal return. Both Gabriel and Alex reported that Dan Stenz, president, was out of town. Alex reported: -the mail address should be the same as the shop address; - the shop address should be 148 S. Lloyd Avenue, suite E, Fullerton, 92833 . - phone calls to the shop phone number are automatically connected to a Manager. I used a compliance checklist review haz waste disposal documents and to survey haz waste management: - name/phone # of a haz waste emergency co-ordinator posted for employee use; - training log/training procedures for employees regarding haz waste management; - disposal documents/training records available for review; - haz waste stored in closed containers that are marked [Truncated]

Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a drive-by inspection for the above facility on October 2, 2019. The facility is still in operation and thus the Annual Report is required to be submitted.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-20-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect, and take photos of the facility was given by Tony Salazar, Corporate Training & Development Manager. Also present for the inspection was Dylan Brazil of Van Law Food Products. Walked the facility, perimeter, and inspected the hazardous waste storage area. Inspected the municipal trash for hazardous waste. No hazardous waste was observed in the dumpster. Manifests and emergency response information was reviewed. Maintain copies of your manifests available for review for 3 years. Employees are reported to be trained. No hazardous waste violations were observed this date. Hazardous waste(s) must be labeled with the following information: 1. The word "Hazardous Waste" 2. Generator Name and Address 3. Accumulation Start Date 4. Physical State/Hazardous Properties 5. Chemical Contents

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-15-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: VIOLATIONS NOTED

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 366594

Site Name: SUREBUILT CONCRETE FORM & ACCESSORIES

Violation Date: 08-30-2016

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 01/07/2019. Per Mr. Araya, the hazardous waste has been accumulated on-site since the beginning of the year. There are four full drums of flammable hazardous waste present on-site. Please obtain an EPA-ID number and dispose of these drums immediately and provide a copy of the manifest to this agency within 30 days.

Eval Date: 08-09-2023
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: According to the CERS database, your business remains out of compliance with the annual certification requirement and a violation is being cited. Businesses are required to annually review and certify that their information in the California Electronic Reporting System (CERS) is complete, accurate and in compliance by March 1st. Your business was notified via email on 5/4/23 that your facility was out of compliance with this requirement. Please visit <https://cers.calepa.ca.gov/> to access CERS and submit your completed HMBP forms. Failure to submit HMBEP forms is a violation of the California Health & Safety Code and California Code of Regulations. Progressive enforcement will be taken by this Agency if a submittal/certification has not been completed within 30 days of this report.

No hazardous waste label were present on the drums. Per the President, the business is in the process of obtaining a new EPA ID and the waste has been generated on-site since the beginning of the year. Upon enquiring again about the paint booth filters, Mr. Araya notified us that the paint booth filters were being replaced every week. Walked the perimeter of the site, and there were some drums of stain debris that were present on-site. The common dumpster outside the shop was checked and no hazardous waste was observed. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine hazardous waste inspection. Inspection was conducted with John O'Neel and Roberto Lara of Surebuilt Concrete Form and Accessories. A change of ownership occurred in 2020. Walked the facility, perimeter, and inspected the hazardous waste storage area. Inspected the municipal trash for hazardous waste. No hazardous waste was observed in the dumpster. Manifests and emergency response information was reviewed. Maintain copies of your manifests available for review for 3 years. Employees are reported to be trained. As a Small Quantity Generator (SQG) of hazardous waste you must: - label all hazardous waste containers/tanks - keep hazardous waste containers/tanks closed except when in use - maintain hazardous waste manifest/consolidated manifest on site for a minimum of three years - do not store hazardous waste on site greater than 180 days - maintain an EPA ID number - maintain contingency plan

Eval Notes: On site for a routine hazardous waste inspection. Consent to take any necessary photos, enter and inspect the facility was granted by Tom Zolzer, EHS Coordinator. This facility is owned by WS Packaging Group, Inc. and currently has 200 employees. Per Tom Zolzer, hazardous waste storage areas are currently inspected daily and employees receive annual training for handling hazardous waste. The spill team and the ink team receive more in-depth response training. Per Tom Zolzer, the parts cleaner is currently out of service and the facility is in contact with the OC Sanitation District regarding implementing an industrial wastewater treatment system. Observed the sink where doctor blades with ink residue are currently cleaned with isopropyl alcohol and Yellow Magic 7. Per Tom Zolzer, the rinse water is currently disposed directly to the sewer. Hazardous waste manifests for the last three years were available for review during today's inspection. The emergency [Truncated]

Eval Notes: Regional Board Staff conducted a compliance inspection for the above facility on September 19, 2018. Staff met with Mr. Thomas Zolzer, DAR. Larry Grove, the LRP, is no longer with the facility. The facility is currently in Level 1 for TSS. The SWPPP was reviewed and the Pollution Prevention Team needs to be updated to reflect staff changes. Employee training records were available from 2016. Mr. Zolzer noted that employee training will be conducted on Monday as well as training on the Level 1 requirements for the permit. A site walk was then conducted. Housekeeping is conducted daily. Tarps were observed covering some exposed industrial material around the facility. Exposed industrial material was still observed and Mr. Zolzer noted they were working to either have it covered or moved indoors. Metal roll-off bins were observed and are covered during rain events.

Eval Notes: On site for a routine hazardous waste inspection. Consent to take any necessary photos, enter and inspect the facility was granted by Tom Zolzer, EHS Coordinator. This facility is owned by WS Packaging Group, Inc. and currently has 200 employees. Per Tom Zolzer, hazardous waste storage areas are currently inspected daily and employees receive annual training for handling hazardous waste. The spill team and the ink team receive more in-depth response training. Per Tom Zolzer, the parts cleaner is currently out of service and the facility is in contact with the OC Sanitation District regarding implementing an industrial wastewater treatment system. Observed the sink where doctor blades with ink residue are currently cleaned with isopropyl alcohol and Yellow Magic 7. Per Tom Zolzer, the rinse water is currently disposed directly to the sewer. Hazardous waste manifests for the last three years were available for review during today's inspection. The emergency [Truncated]

Eval Notes: On-site for routine hazardous waste inspection. Facility is a printing shop and generates waste washer solvent, oil, ink, developer rolls and chiller water. Facility is a non-RCRA Large Quantity Generator (LQG). Be advised facility may be required to complete required documentation under SB14 (Source Reduction) if facility generates more than 12,000kg of non-exempt waste in next recording year, 2022. Walked throughout facility and observed hazardous waste storage areas. Hazardous waste containers were observed to be stored closed. No evidence of illegal disposal was observed.

Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a compliance inspection for the above facility on September 19, 2018. Staff met with Mr. Thomas Zolzer, DAR. Larry Grove, the LRP, is no longer with the facility. The facility is currently in Level 1 for TSS. The SWPPP was reviewed and the Pollution Prevention Team needs to be updated to reflect staff changes. Employee training records were available from 2016. Mr. Zolzer noted that employee training will be conducted on Monday as well as training on the Level 1 requirements for the permit. A site walk was then conducted. Housekeeping is conducted daily. Tarps were observed covering some exposed industrial material around the facility. Exposed industrial material was still observed and Mr. Zolzer noted they were working to either have it covered or moved indoors. Metal roll-off bins were observed and are covered during rain events.
