Description: Per reporting party, a resident reported a sheen to a harbor lifeguard boat. Upon investigation, the lifeguards observed the sheen, which appeared to be contained within a pocket. The Huntington Beach Fire Department was contacted and also inspected the source of the sheen. The lifeguards noted that the sheen seemed smaller than when it was first encountered, indicating that it appears to be dissipating or evaporating on its own. The reporting party believes this is not an active release.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 12/23/2004
Comments: DTSC approved the Final Removal Action Workplan on December 23, 2004. The selected removal action is excavation of about 7,000 cubic yards of PCB contaminated soil in a 2-acre area of the Site and disposal of the soil to landfills. The State Lands Commission is in the process of purchasing the Site from Hearthside Residential Corporation so it can be included in the Bolsa Chica Wetlands Restoration Project. U.S. Fish and Wildlife Service is directing the Restoration Project and plans to have its contractors perform the cleanup early in 2005. DTSC determined that the selected removal action will have no impact on the environment due to the small volume, the limited area, and the short duration of the project. This finding was documented in a Notice of Exemption which was approved on December 23, 2004.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information.
