scheduled to be conducted in August 2012. The northeast catch basin inlet is covered in sediment and debris. BMPs (ie drip pans) needed under buses that are parked in the southern portion of the facility (staging area). The oil servicing/changing area requires improved BMP implementation. Bus washing area is plumbed to a clarifier then ultimately discharges to the sewer. Lawn mowers are rinsed off on the grassy area. Staff requested that the SWPPP be certified, all records maintained in one location (ie SWPPP), and that BMPs be implemented in the deficient areas.

Samples appear to be getting drawn from areas where permitted industrial activity does not occur: namely NE corner inlet. Site is neat and orderly overall. Some leaf litter observed in trench drains along garage entrance. Found engine block stored in outside next to a protected area. Found partially-collapsed inlet filter near NW portion of site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Email as follows: "Good Morning Eveling, The attachment you sent is good for the fuel waste, but I also need a manifest/receipt for the hauling of the fuel filters. Can you send the document that indicates removal of the fuel filters? If they have not yet been hauled, arrange for hauling and submit the manifest ASAP. It does not matter if the container is full, as this type of waste must be hauled within 1-year of beginning accumulation. The accumulation start dates (there were multiple dates on the container) indicated a start in 2014, making them long overdue for pickup. Thank you,"

Explained the source of the liquid (fuel leak in sump) and why the waste would have to be hauled as RCRA. He said it was not characteristic waste, but understood that the fuel had been mixed with water. He said he would arrange to have the liquid waste hauled as RCRA and also pick up the fuel filters, likely next week.

Eval Notes: On site to conduct routine hazardous waste inspection. I walked through the facility and perimeter. I did not observe any hazardous waste in the trash cans. Used oil is stored in an aboveground storage tank and is labeled. Waste antifreeze drum is stored closed and labeled. One used oil filter drum is stored closed and labeled. The second drum with used oil filter label contained waste oil and was relabeled during the inspection. A part washer drum that does have a lid is storing oil filters. The contents of this drum was transferred to another drum that has lid and that drum was labeled during the inspection. I explained to owner, Raffi, that used oil filters (cartridges) that do not have metal in them must be stored in another drum and be managed as hazardous waste (oily solids). A label was provided for the container that will be storing this type filters. Manifests were reviewed. There are no current manifests for the used oil filter or waste The last [Truncated]

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
