This will dictate whether you have 1 or 2 processes. I know your desire is to treat the each of the 2 containers of TDI as separate processes that are individually below TQ, and get out of the CalARP program. If the storage scenario at the business is such that the 2 containers could be involved in a single release, you will have to treat TDI as a single process and you would be regulated under the CalARP program. If you are able to implement a storage scheme that sufficiently isolates the 2 containers from one another, and demonstrate that the 2 containers are not co-located (and therefore could not be involved in a single release), you will not be subject to the CalARP [Truncated]

Eval Notes: E-mail from Urethane Products with CALARP questions. My response: Hope: Thanks for the SDS s. 1) TDI is regulated at 500 pounds. Therefore, one tote has 2,250 pounds of product with 22% TDI = 495 pounds. If the business never has more that one 270 gallon tote of the product, you are not subject to CALARP. If at any one time, the facility has more than one tote, you will be subject to CAL ARP regulations. 2) You are subject to the inspection fee and need to send it in. 3) You do need to send me the regulated substances form . 4) You do not need to send the new facility form, I have already filed that paperwork. 5) The next step is to have your consultant perform a worst case off site consequence analysis. Once I see that calculation, I will be able to direct you as to what else may be required. Call me if you have any other questions.

You stated the volume of each container would not exceed 495 pounds of TDI (I don't believe you provided the concentration of TDI in solution). Process/use (i.e. One container of TDI below TQ connected to manufacturing equipment via hose/pipe), 2. Storage (i.e. One container of TDI, stored closed, no contents removed, decanted, etc., to be used only when the container in process #1 becomes empty). Jameson of Urethane Products Inc. Consent to enter and conduct the CalARP audit was granted. The regulated substance that is in question is 2,4-toluene Diisocyanate (2,4-TDI). the threshold Quantity of 2,4-TDI = 500 pounds. Currently, the facility purchases a 250-gallon tote of UPC-9200 A-Side. Based on the SDS from the manufacturer, the %wt of 2,4-TDI ranges from 12% - 22% wt. The facility only has (1) tote of product at all times. (1) tote = 2,250 lbs (per Hope Jameson). At the highest percentage of 2,4-TDI (22%), the total quantity of 2,4-TDI would be: - 2,250 lbs x 0.22 = 495 pounds 2,4-TDI. This is below the CalARP threshold of 500 pounds. Based on this conclusion, the facility will be removed from the CalARP program. If the facility increases production and as a result increases the quantity of 2,4-TDI (>500 lbs), you will be required to prepare and implement a Risk Management Plan per [Truncated]

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
