PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 341F-4E6A-BE20

PO # NA

Project Olson - Huntington Park

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 341F-4E6A-BE20

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

ITEMS CORRESPONDING TO SCHEDULE "B":

BY: FIDELITY NATIONAL TITLE COMPANY
4210 RIVERWALK PARKWAY, SUITE 100
RIVERSIDE, CA
ORDER NO.: 30036631-010-VR2-BAM
TITLE OFFICER: N/A
DATED: MARCH 18, 2020
AMENDED: APRIL 1, 2020

THE FOLLOWING ITEMS WERE FOUND IN SAID COMMITMENT AND ARE REFERENCED ON THIS MAP. COVENANTS AND AGREEMENTS LISTED HEREON CONTAIN NUMEROUS ITEMS THAT AFFECT THE SUBJECT PROPERTY, CONTENTS SHOULD BE REVIEWED TO DISCERN SPECIFICS

- WATER RIGHTS, CLAIMS OR TITLE TO WATER, WHETHER OR NOT DISCLOSED BY THE PUBLIC RECORDS. **THE EXTENT TO WHICH THIS ITEM AFFECTS THE SUBJECT PROPERTY CAN NOT BE DETERMINED FROM THE TITLE REPORT OR DOCUMENTS PROVIDED AND IS NOT PLOTTED HEREON.**
- EASEMENT(S) IN FAVOR OF THE PUBLIC OVER ANY EXISTING ROADS LYING WITHIN SAID LAND. **THIS ITEM AFFECTS THE SUBJECT PROPERTY, IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.**
- EASEMENT(S) FOR IRRIGATION AND DRAINAGE DITCH, RECORDING DATE: OCTOBER 24, 1903 RECORDING NO. IN BOOK 91, PAGE 24, DEEDS. **THIS ITEM AFFECTS THE SUBJECT PROPERTY, BUT THE LIES WITHIN TALBERT AVE AND NEWLAND ST AND IS NOT PLOTTED HEREON.**
- AN INSTRUMENT ENTITLED COVENANT AND AGREEMENT WITH THE CITY OF HUNTINGTON BEACH RECORDING DATE: APRIL 20, 1972 RECORDING NO. BOOK 10090, PAGE 174 OF OFFICIAL RECORDS. **THIS ITEM AFFECTS THE SUBJECT PROPERTY, IS BLANKET IN NATURE AND IS NOT PLOTTED HEREON.**
- EASEMENT(S) FOR ROAD, RECORDING DATE: DECEMBER 17, 1975 RECORDING NO. IN BOOK 11597, PAGE 1870, OFFICIAL RECORDS. **THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.**
- EASEMENT(S) FOR STREET AND UTILITY, RECORDING DATE: DECEMBER 26, 1978 RECORDING NO. IN BOOK 12976, PAGE 1018 OF OFFICIAL RECORDS. **THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.**
- EASEMENT(S) FOR STORM DRAIN, RECORDING DATE: DECEMBER 26, 1978 RECORDING NO. IN BOOK 12976, PAGE 1018 OF OFFICIAL RECORDS. **THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.**
- EASEMENT(S) FOR STREET AND PUBLIC UTILITY PURPOSES, RECORDING DATE: NOVEMBER 28, 2016 RECORDING NO. 2016000596196 OF OFFICIAL RECORDS. **THIS ITEM AFFECTS THE SUBJECT PROPERTY AND IS PLOTTED HEREON.**

ITEMS #'S SHOWN HEREON ARE STATED AS EXCEPTIONS ON ABOVE REFERENCED COMMITMENT. NO RESPONSIBILITY FOR THE COMPLETENESS, ACCURACY, OR CONTENT OF SAID REPORT IS ASSUMED BY THIS MAP.

SURVEYOR'S NOTES:

-THERE WERE NO MONUMENTS FOUND OR SET AT THE PROPERTY LINE CORNERS UNLESS OTHERWISE NOTED.
-THE INFORMATION, COURSES AND DISTANCES SHOWN ON THIS SURVEY PRINT ARE TRUE AND CORRECT. THIS SURVEY ACCURATELY REPRESENTS THE BOUNDARIES AND AREA OF THE PREMISES DENOTED ON THE TITLE ORDER REFERENCED HEREON AND IS THE SAME PROPERTY AS DESCRIBED THEREIN.
-AT THE TIME OF SURVEY, NO EVIDENCE OF RECENT EARTH MOVING WORK, BUILDING CONSTRUCTION OR ADDITIONS WERE OBSERVED UNLESS OTHERWISE NOTED HEREON.
-NO RECENT CHANGES IN STREET RIGHTS-OF-WAY WERE OBSERVED AT THE TIME OF THE SURVEY UNLESS OTHERWISE NOTED HEREON.
-THIS SURVEY HAS BEEN PREPARED FOR TITLE INSURANCE PURPOSES ONLY. THIS SURVEY DOES NOT CONTAIN SUFFICIENT DETAIL FOR DESIGN PURPOSES. THE BOUNDARY DATA AND TITLE MATTERS AS SHOWN HEREON HAVE BEEN DEVELOPED FROM THE REFERENCED TITLE REPORT ONLY.
-UNLESS THIS PLAN HAS THE SEAL AND SIGNATURE OF THE SURVEYOR RESPONSIBLE FOR ITS PREPARATION, THIS IS NOT AN AUTHENTIC COPY OF THE ORIGINAL SURVEY AND SHALL NOT BE DEEMED RELIABLE.
-JRN CIVIL ENGINEERS ASSUMES NO LIABILITY FOR THE ACCURACY OR COMPLETENESS OF ANY THIRD PARTY INFORMATION REFERENCED OR REPRESENTED HEREON. ANY OF SAID INFORMATION SHOWN HEREON HAS BEEN PROVIDED FOR INFORMATIONAL PURPOSES ONLY.
-AS OUTLINED IN SECTION 8770.6 OF THE BUSINESS AND PROFESSIONS CODE OF THE STATE OF CALIFORNIA "THE USE OF THE WORD 'CERTIFY' OR 'CERTIFICATION' BY A LICENSED LAND SURVEYOR OR REGISTERED CIVIL ENGINEER IN THE PRACTICE OF PROFESSIONAL ENGINEERING OR LAND SURVEYING OR THE PREPARATION OF MAPS, PLATS, REPORTS, DESCRIPTIONS OR OTHER SURVEYING DOCUMENTS ONLY CONSTITUTES AN EXPRESSION OF PROFESSIONAL OPINION REGARDING THOSE FACTS OR FINDINGS WHICH ARE THE SUBJECT OF THE CERTIFICATION, AND DOES NOT CONSTITUTE A WARRANTY OR GUARANTEE, EITHER EXPRESSED OR IMPLIED."

FLOOD NOTE:

ZONE - "X" PER FEDERAL EMERGENCY MANAGEMENT AGENCY MAP NO. 06059C 0253 J EFFECTIVE DECEMBER 03, 2009.

ZONE "X" DENOTES AREAS SUBJECT TO MINIMAL FLOODING

THE ABOVE STATEMENT IS FOR INFORMATION ONLY AND THIS SURVEYOR ASSUMES NO LIABILITY FOR THE CORRECTNESS OF THE CITED MAP(S). IN ADDITION, THE ABOVE STATEMENT DOES NOT REPRESENT THIS SURVEYOR'S OPINION OF THE PROBABILITY OF FLOODING.

BASIS OF BEARINGS:

THE BEARING OF N 89°36'12" E ALONG THE CENTERLINE OF TALBERT AVENUE PER MAP RECORDED IN BOOK 42, PAGE 34 OF PARCEL MAPS IN THE CITY OF HUNTINGTON BEACH, COUNTY OF ORANGE, STATE OF CALIFORNIA, WAS USED AS THE BASIS OF BEARINGS FOR THIS SURVEY.

STATEMENT OF POSSIBLE ENCROACHMENTS:

NOTE: THE FOLLOWING IS A LISTING OF OBSERVED IMPROVEMENTS THAT CROSS PROPERTY LINES, STATEMENT OF OWNERSHIP OR POSSESSION IS NEITHER IMPLIED NOR THE INTENT OF THIS LISTING.

- WOOD FENCE LIES 0.3' SOUTH OF PROPERTY LINE
- BLOCK WALL, SOUTH FACE, LIES 0.2' SOUTH OF PROPERTY LINE
- WOOD FENCE, NORTH END LIES 0.4' NORTH OF PROPERTY LINE
- BUILDING LIES OVER EASEMENT NOTE 1

EASEMENT NOTE:

- AN EASEMENT RELATING TO THE OPERATION OF A WELL AND PUMPING PLANT AS DESCRIBED BY A DOCUMENT RECORDED JUNE 24, 1952 IN BOOK 2347, PAGE 365 OF OFFICIAL RECORDS.

LAND AREA (GROSS): LAND AREA (NET):

105,826 SQUARE FEET
2.4 ACRES

89,890 SQUARE FEET
2.1 ACRES

SURVEYOR'S CERTIFICATE:

TO: INTRACORP SOCIAL-1, LLC AND FIDELITY NATIONAL TITLE INSURANCE COMPANY

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2016 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 7(A), 7(B), 7(C), 8, 9, 13, 14, 16, AND 20 OF TABLE A THEREOF. THE FIELD WORK WAS COMPLETED ON JUNE 4, 2020.

**Subject: Due Diligence Geotechnical Evaluation
Proposed Residential Development
8375 and 8371 Talbert Avenue
APN Nos. 167-531-023 & -024)
Huntington Beach, California**

In accordance with our proposal dated May 22, 2020, Leighton and Associates, Inc. (Leighton) is pleased to present this due diligence geotechnical report for the subject project. The purpose of our review was to evaluate geotechnical conditions and constraints for grading and construction of the project as currently proposed. We expect our findings and opinions will serve as a useful guide during your decision-making process to acquire and develop the property, and aid in your development of preliminary costs and budgets for the project. No subsurface exploration or laboratory testing were performed as a part of this due diligence review.

We trust that the information contained herein meets your objectives for due diligence, and sincerely appreciate the opportunity to provide our services. If you have any questions or concerns, please contact us at your convenience. The undersigned can be reached at **(866) LEIGHTON**, specifically at the phone extension and e-mail address listed below.

Respectfully submitted,

1.0 INTRODUCTION

1.1 Site Description

The subject property is located at 8375 and 8371 Talbert Avenue in the City of Huntington Beach, California (site). The site is rectangular in shape and has a relatively level ground surface. According to the United States Geological Survey (USGS) 7.5-Minute Newport Beach Quadrangle (USGS, 2018), the site surface is approximately at Elevation (El.) +45 feet mean sea level (msl). The property is composed of two roughly equal size contiguous parcels on the east and west, which encompass approximately 2.4 acres. The east and west parcels are designated 8375 and 8371 Talbert Avenue, respectively. The global coordinates for the property are latitude 33.7016°/ longitude -117.9813°.

The site is bordered by Talbert Avenue on the south, Newland Street on the east, the parking lot of a church facility on the west, and a tract of single family residences on the north. The approximate site boundaries are depicted on attached Figure 1, *Site Location Map*.

1.2 Site History

Our review of historical topographic maps, dated prior to site development, indicate the relatively level site surface has a minor westerly-descending gradient (NETR, 2020). A 1953 aerial photograph indicates the site has been developed for single family residential use throughout its history, since at least the early 1950's. Buildings include various single-story residence, detached garage and storage structures, and appurtenant concrete and asphalt paved driveways (NETR, 1953). These structures remain on the site as of the date of this report.

According to review of the ALTA/NSPS Land Title Survey for 8371 and 8375 Talbert Avenue, Huntington Beach, California, prepared by JRN Civil Engineers, Scale 1"=30', dated June 26, 2019, Note 5 *Items Corresponding to Schedule "B"* indicates a water well and pumping plant is located in the northeast corner of Parcel B as described in a Deed recorded June 24, 1952. This small outbuilding/pump house is presumed to be listed as Building G on the ALTA Survey described as a 10-foot tall, 446 square foot wood frame building. This structure is visible in the 1953 aerial photo (NETR, 2020).

A former north trending canyon visible in early 1932 topographic maps of the area daylighted along the northwest region of the site within the open dirt field on the west side of the project site. This former canyon deepened to the north below now the Good Shepard Cemetery. Anticipated depth of the canyon infill may range between 5 to 10 feet in thickness below the site.

1.3 **Proposed Development**

Our review of the current project concept plan *Talbert Avenue and Newland Street Preliminary Grading Plan Huntington Beach, CA*, prepared by Stantec, dated February 11, 2020 indicates a total of thirty-four (34) new on-grade, single-story houses will be constructed, each with an attached 2-car garage and rear patio/yard with privacy fencing. A perimeter fence (or wall) is planned along the rear (north) property boundary, to separate the development from the existing residential tract of homes. Vehicular access and egress to the development will be accommodated by entry drives at the east and west ends of the property, fronting Talbert Avenue. Units will be accessed via a main interior semi-oval spine road and lateral spur roads. No basements are currently planned. The currently proposed development (Stantec, 2020) is shown on Figure 2, *Proposed Design Concept Plan*.

1.4 **Purpose and Scope**

The purpose of our work was to evaluate the subsurface conditions through published information (Appendix A, *References*) at the site relative to the proposed development, and provide preliminary geotechnical recommendations to aid in project planning. The scope of this evaluation included the following tasks:

- **Background Review** – We reviewed readily available geotechnical reports, literature, aerial photographs, and maps relevant to the site available from our in-house library or in the public domain. We evaluated geological hazards and potential geotechnical issues that may significantly impact the site. The documents reviewed are listed in Appendix A, *References*.
- **Site Reconnaissance** – We performed a site reconnaissance to visually evaluate general site topography, drainage patterns and other general conditions. No subsurface exploration or laboratory testing was performed as a part of this scope of work.

- Engineering Analysis – The data obtained from our background review were evaluated and analyzed to develop conclusions and preliminary recommendations for proposed grading and construction.
- Report Preparation – This report presents our findings, conclusions and preliminary recommendations for the proposed development.

2.0 GEOTECHNICAL FINDINGS

2.1 Regional Geologic Setting

The site lies along the southern margin of the Los Angeles Basin upon a relatively flat coastal mesa referred to locally as Huntington Mesa. The elevated mesa is one of several similar subtly distinct emergent geomorphic features along the Orange County coastline in southern California. The irregular margins of the mesa are continually being degraded (eroded) into slope terrain descending to near sea level elevations. Storm water runoff discharging off the mesa has resulted in the entrenchment of several canyons into its margins. The mesa, or wave-cut terrace, is mantled by a deposit of unconsolidated late Pleistocene age sediments of terrestrial and marine origin, referred to as Old Paralic Deposits. The lithology of this unit typically consists of marine strandline, beach, estuarine and non-marine colluvium-derived sediments composed of silts, sands and cobbles. The Old Paralic Deposits are typically underlain at depth by shale bedrock assigned to the Miocene to Pliocene age Monterey Formation. A map showing the general distribution of surface geologic units is presented in attached Figure 3, *Regional Geology Map*.

The nearby tectonic regime is dominated by the presence of the Newport-Inglewood/Rose Canyon fault zone (NIFZ), an active right-lateral oblique fault which passes within approximately 0.7 miles of the site on the south, in its northwesterly transect. Movement along the fault is responsible for a distinctive lineament of uplifted hills and underlying oil traps.

2.2 Geologic Structure

Right-lateral oblique slip along the NIFZ has resulted in a 2- to 4-mile-wide belt of anticlinal folds and faults which disrupt the early Holocene to Late Pleistocene-age and older deposits (Barrows, 1974) characterized by structural trends attributable to right-lateral shearing of basement rocks at depth (Moody and Hill, 1956). The zone defines the boundary between the western basement complex of Catalina type schist and related rocks to the southwest and the eastern basement complex of metasedimentary, metavolcanic, and plutonic rocks to the northeast (Yerkes, et al., 1965). Right-lateral, strike-slip displacement of 3,000 to 5,000 feet has been measured in Lower Pliocene strata along the Newport-Inglewood structural zone (Dudley, 1954). Apparent vertical offset across faults of the NIFZ ranges from 4,000 feet at the basement interface, to 1,000 feet in the Pliocene strata, and 200

feet at the Plio-Pliocene boundary (Yerkes, et al., 1965). Movement along this structural zone is inferred to have been initiated during middle Miocene time (approximately 15 million years ago), with seismic activity continuing up to present time. Tilted and structurally deformed sediments have also been observed within the fault zone (Barrows, 1974).

The Newport-Inglewood fault is one of several northwest trending right-lateral strike-slip fault zones in southern California, which include the San Jacinto, Elsinore and San Andreas fault zones, the latter of which forming the boundary between the North American and Pacific plates. The June 1920 magnitude Mw 4.9 Inglewood earthquake and the 1933 Long Beach Mw 6.3 earthquake are documented examples of recent seismic activity attributed to the NIFZ.

2.3 **Site Geologic Units**

It is likely that areas of artificial fill exist on the site, relating to past residential site use. For the most part, we anticipate such fill thickness will be minor (i.e. ≤ 5 feet in thickness) with the exception of the former canyon infill located on the western portion of the project. Localized fill in this area could be as thick as 5 to 10 feet. The fill is mapped as underlain by weathered Paralic (terrace) Deposits of older Quaternary age. A description of these terrace deposits is presented as follows:

Old Paralic Deposits: Map Symbol (Qol): The late Pleistocene age paralic (terrace) deposits consist mostly of interbedded, poorly sorted, moderately permeable, reddish brown interfingering lacustrine, strandline, beach, colluvial, and estuarine deposits consisting of medium dense to dense, silty sand to clayey sand with minor gravel and very stiff to hard sandy clay. Intermixed within the matrix of these deposits are varying proportions of calcium carbonate and manganese precipitates, along with occasional shell fragments. This unit was deposited on a wave-cut abrasion platform during a high stand in sea level (oxygen isotope substage 5a), approximately 120,000 years before present (Wehmiller et al., 1977).

Our experience with Qol deposits on properties in the nearby area, indicate some generally anticipated engineering properties of these deposits are as follows.

2.3.1 Expansive Soil Characteristics

Sandy soils are generally considered to have a low potential for expansion. It is possible that layers of expansive clay could be present at the foundation elevation. If any clay beds are encountered, these layers should not be left in place. Laboratory testing for expansive characteristics is recommended as part of a design-level exploration of the site. Until future testing is performed the soil should be considered as having a moderate potential for expansion.

2.3.2 Excavation Characteristics

Based on our experience with Qol unit, we anticipate no cemented zones would be encountered during grading, and that the earth material can be graded with relative ease using conventional equipment in good working order. We anticipate site soils should be considered as Type C soil, which may be prone to raveling and collapse in deeper, unshored excavations.

As the site is not located within an active or former oil field, we do not anticipate that any oil field hydrocarbon-impacted soils would be encountered which require special handling and/or disposal.

2.4 Groundwater Conditions

The historic high groundwater depth for the project site is reported to be approximately 30 feet (CGS, 1997). In 1990, the Orange County Department of Environmental Health (OCDEH) documented groundwater beneath the site at a depth of approximately 41.5 feet bgs. The site-specific depth of groundwater measured by OCDEH is considered the more accurate representation for the site, as the CGS mapping is estimated, derived through a remote process of nearby well extrapolation.

Local fluctuations in groundwater can be expected to occur beneath the site, manifest as zones of perched water and increased soil moisture. Sources of possible groundwater may be due to periods of prolonged and/or locally intense precipitation, excessive landscape irrigation, or infiltration relating to on-site stormwater disposal systems. Based on the above, we expect groundwater will not pose any significant constraint to planned grading or construction of the above-grade development.

2.5 Surface Fault Rupture

Our review of available in-house literature indicates that no known active faults have been mapped across the site, and the site is not located within a designated Alquist-Priolo Earthquake Fault Zone (Bryant and Hart, 2007). Therefore, the potential for surface fault rupture at the site is expected to be low and a surface fault rupture hazard evaluation is not mandated for this site.

The location of the closest active faults to the site was evaluated using the United States Geological Survey (USGS) Earthquake Hazards Program National Seismic Hazard Maps (USGS, 2008c). The closest active faults to the site are the Newport-Inglewood / Rose Canyon Fault Zone, and Whittier segment of the Elsinore fault zone, located approximately 0.7 and 17.5 miles from the site, respectively. The San Andreas fault, which is the largest active fault in California, is approximately 49 miles northeast of the site. Major regional faults with surface expression in proximity to the site are shown on Figure 4, *Regional Fault and Historical Seismicity Map*.

2.6 Seismicity and Ground Shaking

The principal seismic hazard to the site is ground shaking resulting from an earthquake occurring along any of several major active and potentially active faults in southern California. The intensity of ground shaking at a given location depends primarily upon the earthquake magnitude, the distance from the source, and the site response characteristics. The site should be expected to experience strong ground shaking after the proposed project is developed resulting from an earthquake occurring along one or more of the major active faults (Figure 4).

Accordingly, the project should be designed in accordance with all applicable current codes and standards utilizing the appropriate seismic design parameters to reduce seismic risk. The 2019 edition of the California Building Code (CBC) is the current edition. Through compliance with regulatory requirements and the utilization of appropriate seismic design parameters selected by the design professionals, potential effects relating to seismic shaking can be reduced.

The following parameters should be considered for design under the 2019 CBC:

CBC Seismic Design Parameters

Categorization/Coefficients	Code-Based ^{(1) (2) (3)}
Site Longitude (decimal degrees) West	-117.9813°
Site Latitude (decimal degrees) North	33.7016°
Site Class	D
Mapped Spectral Response Acceleration at 0.2s Period, S_s	1.395
Mapped Spectral Response Acceleration at 1s Period, S_1	0.505
Short Period Site Coefficient at 0.2s Period, F_a	1.0
Long Period Site Coefficient at 1s Period, F_v	1.8
Adjusted Spectral Response Acceleration at 0.2s Period, S_{MS}	1.395
Adjusted Spectral Response Acceleration at 1s Period, S_{M1}	0.907
Design Spectral Response Acceleration at 0.2s Period, S_{DS}	0.93
Design Spectral Response Acceleration at 1s Period, S_{D1}	0.605
1. All were derived from the USGS web page: https://seismicmaps.org/ 2. All coefficients in units of g (spectral acceleration)	

The results of this analysis also indicate that the adjusted Peak Ground Acceleration (PGA_M) for this site is 0.664g. The code-based seismic analysis report is included in Appendix B, *Engineering Analyses*.

Based on the 2019 CBC Table 1613.2.3(2), the long period site coefficient should be determined in accordance with Section 11.4.8 of ASCE 7-16 since the mapped spectral response acceleration at 1 second is greater than 0.2g for Site Class D. In accordance with Section 11.4.8 of ASCE 7-16, a site-specific seismic analysis is required; however, the values provided herein may be utilized if design is performed in accordance with exception (2) in Section 11.4.8 of ASCE 7-16, with special requirements for the seismic response coefficient (C_s). The project structural engineer should review the seismic parameters.

2.7 Liquefaction Potential

The presence of groundwater, and properties of underlying soils often represent the two most significant factors in determining liquefaction susceptibility. Where groundwater is absent within 50 feet of the surface, the potential for liquefaction is essentially considered to be nil. In the same vein, the presence of a dense

sedimentary unit within the subsurface, often older than Holocene age, is a condition generally limiting liquefaction potential, whether groundwater is present or not.

The State of California Seismic Hazard Zone Map for the Newport Beach and Anaheim Quadrangles (CGS, 1997), indicates the project site is **not** located within an area susceptible to liquefaction, nor designated as an area of required investigation for liquefaction (Figure 5, *Seismic Hazard Map*). As discussed in Section 2.6 of this report, groundwater reportedly existed at a depth of 41.5 feet beneath the site in 1990 (OCEHD, 1990). According to regional geologic mapping, the site is underlain by Pleistocene age sediments consisting of alternating stiff to very stiff cohesive and medium dense to dense granular soils, assigned as Qol Deposits (CGS, 2010). Based on the above, we do not anticipate the site is susceptible to liquefaction, and thus, expect liquefaction will pose no impact to the subject development.

2.8 Seismically-Induced Settlement

Seismically-induced settlement consists of dynamic settlement of unsaturated soil (above groundwater) and liquefaction-induced settlement (below groundwater). These settlements occur primarily within low density sandy soil due to reduction in volume during and shortly after an earthquake event. Given the age of the material underlying the site, the interpreted stiff to very stiff cohesive soils and medium dense to dense granular soils below the site, seismically-induced settlement is not anticipated to be a development constraint.

2.9 Seismically-Induced Lateral Displacements

Lateral displacements of the ground surface on a site (lateral spreading), is a phenomenon which can occur in tandem with liquefaction in response to seismic shaking. For seismically-induced lateral displacements to occur, the liquefiable zone must be continuous, unconstrained laterally, and free to move along gently dipping strata of low friction toward an unconfined area, typically along a shoreline. Because liquefaction is not considered a hazard at the site, the potential for the occurrence of seismically-induced lateral ground displacements is considered remote/nil.

2.10 **Seismically-Induced Landsliding**

The potential for seismically-induced landsliding to occur at the site is considered low due to the location of the site on a stable relatively level mesa, where no slopes exist. The preexisting canyon now below the Good Shepard Cemetery to the northwest has been infilled as part of the cemetery construction. In addition, the State of California Seismic Hazard Zones Map for the Newport Beach & Anaheim Quadrangles (CGS, 1997), indicates the site is **not** located within an area of potential landslide susceptibility (Figure 5, *Seismic Hazard Map*). Slopes planned as part of the development, if any, should be engineered and constructed at a gradient of 2:1 (horizontal:vertical) or flatter.

2.11 **Flooding**

The subtle surface gradient in the site vicinity appears to follow a westerly path. Federal Emergency Management Agency (FEMA) flood insurance rate map No. 06059C0253J (FEMA, 2009), indicates the project site is located within Zone X, designated as “an area of minimal flood hazard”. As shown on Figure 6, *Flood Hazard Zone Map*, the site is **not** located within a flood hazard zone.

2.12 **Seiches and Tsunamis**

Seiches are waves occurring within enclosed bodies of water in response to ground shaking. Tsunamis are waves generated in open bodies of water (oceans) resulting from the displacement of submarine faults or other less common ground movements. Based on the absence of an enclosed water body near the site and the inland location and elevation away from any ocean, the potential for a seiche or tsunami to impact the site is not a consideration.

2.13 **Methane**

Our review of State of California Division of Oil and Gas Geothermal Resources (DOGGR) records indicate the project site is not within a 500 foot radius of any active, inactive or abandoned oil or natural gas well. Nor does the City of Huntington Beach designate the site as located within a Methane District. The location of the site with reference to nearby oil wells is depicted on attached Figure 7, *Oil Well Location Map*.

2.14 **Environmental Hazards and Hazardous Materials**

Review of publicly available information from the California State Water Resources Control Board (CSWRCB), GeoTracker website, indicates the presence of a former 550 Gallon Underground Storage Tank (UST) containing gasoline on the property, located on the western side of the site adjacent to the residence at 8371 Talbert. The records indicate minimal soil contamination (xylene and toluene) and marginal levels of xylene benzene and toluene in concentrations of 64 parts per billion (ppb) Xylene, 31ppb benzene and 69ppb toluene in groundwater samples collected. The tank was removed in compliance with state regulatory environmental testing and reporting protocol. Records indicate samples collected after removal and cleanup were lower than original concentration. Groundwater was indicated as 41.5 feet below ground surface. Although no report documenting these activities are in the file, a summary “case closure” memorandum issued by the OCDEH (1990), indicates analysis of soil and groundwater revealed no evidence of related contamination. The letter is included in Appendix C, *County of Orange Documents*.

3.0 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

No evidence of adverse geological or geotechnical hazards were noted at the site that will preclude development of the project as currently planned. Presented below is a summary of findings based upon the results of our due diligence geotechnical evaluation of the site:

- The site is not located in a designated Alquist-Priolo Earthquake Fault Zone. The active fault nearest to the site, with a potential for surface rupture and generation of strong ground shaking, occurs within the Newport-Inglewood / Rose Canyon fault zone approximately 0.7 miles southwest of the site. An earthquake along this fault zone, or others in the nearby southern California area, are likely to generate moderate to strong ground shaking at the site.
- The site is **not** located within an area shown as susceptible to seismically-induced liquefaction, lateral spreading or landslides. The potential for these hazards to occur at the site is thus considered negligible.
- A relatively thin layer of artificial fill is expected to be underlain by a sedimentary geologic unit referred to as Old Paralic Deposits of late Pleistocene age. The unit consists of an alternating sequence of dense sands and stiff cohesive sediments that are moderately well consolidated. Locally deeper fill may be encountered in northwester region of site in former north trending canyon.
- Groundwater was reportedly measured beneath the site at a depth of 41.5 feet bgs in 1990 (OCDEH, 1990). Groundwater is not anticipated to be a constraint to site grading or construction.
- The UST is reported as being removed and gasoline contamination documented onsite in the area of former UST was reported in lower concentrations after removal. Groundwater contamination was not a concern (Appendix C).
- The proposed buildings may be supported on shallow spread-type foundations (footings, mats, post-tensioned slabs, etc.) and floor slabs supported on grade. An allowable bearing pressure of 3,000 pounds per square foot may be assumed for preliminary design. The bearing pressure may be increased by one-third for temporary loading.

Future design-level subsurface exploration, sampling, laboratory testing and engineering analyses will be required by the building official to develop design geotechnical

recommendations and project permitting. In addition, the geotechnical consultant should review grading and foundation plans and specifications as they become available, to verify that the geotechnical recommendations presented in the future design-level geotechnical report(s) are incorporated into the plans.

4.0 LIMITATIONS

Leighton's professional services were performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable geotechnical consultants practicing in this or similar localities. No other warranty, expressed or implied, is made as to the conclusions and professional opinions included in this report.

As in many projects, conditions revealed in excavations may be at variance with preliminary findings. If this occurs, the geotechnical consultant should evaluate the changed conditions and additional recommendations be obtained, as warranted.

Subject: Remedial Action At 8371 Talbert, Huntington Beach, CA 92646
- O.C.H.C.A. Case #85UT121

Dear Mr. Lecrivain:

This letter confirms the completion of site investigation and remedial action at the above site. With the provision that the information provided to this Agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this Agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, please contact Peter Peuron at (714) 667-3719.

Very truly yours,

William J. Diekmann, REHS, M.S.

Soil Types: SANDY SILT

Forebay ☐ Pressure ☒ Intrusion ☐ Tidal ☐ Hills ☐ Near OCWD recharge ☐

Case Summary (Cleanup Efforts and Closure Rationale):

ORIGINAL SITE ASSESSMENT SHOWED
MINIMAL EXTENT OF SOIL CONTAMINATION
WITH NO BENZENE FOUND BEYOND LIMITS
OF EXCAVATION (XYLENE AND TOLUENE WERE
FOUND). WATER SAMPLES (2 OF
THEM) TAKEN DURING THIS SITE ASSESS-
MENT SHOWED LEVELS OF BENZENE,
XYLENE AND TOLUENE THAT WERE QUITE
MARGINAL (31 PPB BENZENE, 69 PPB TOLUENE
AND 64 PPB XYLENE). RECENT GROUND-
WATER SAMPLING (CONDUCTED 10-8-90) SHOWED

Specialist: PETER PEURON

OKDD 11-28-90

D.B.A.: JULIAN LECRIVAINCase ID# 8509121

NO DETECTABLE BENZENE, TOLUENE, ETHYLBENZENE OR XYLENE. THESE RESULTS SHOW THAT LEACHING OF ANY BENZENE IN THE SOIL OVER THE LAST 5 YEARS HAS BEEN SO MINIMAL THAT THE GROUNDWATER HAS ACTUALLY GOTTEN TO BE CLEANER. RECENT SAMPLING OF THE EXCAVATION SHOWED EXTREMELY LOW VALUES OF AROMATICS. ONLY 13 PARTS PER BILLION OF TOLUENE AND 5 PARTS PER BILLION OF ETHYLBENZENE WERE FOUND IN THE EXCAVATION. SINCE THIS WAS THE ONLY CONTAMINATION FOUND IN THE SOIL AND NO CONTAMINATION WAS DETECTED IN GROUNDWATER THE SITE CAN BE CLOSED USING LEACHING POTENTIAL CRITERIA ^(LPA.) BOTH 13 PPB TOLUENE AND 5 PPB ETHYLBENZENE ARE LOWER THAN THE MOST RESTRICTIVE LEVELS GIVEN ON THE TABLE. I CALLED JOE ALDERN AND HE CONCURRED THAT THE GROUNDWATER COULD BE WRITTEN OFF.

Specialist: PETER PEURON

CERTIFICATION

Professional Service Industries, Inc. (PSI), an Intertek company, has completed a Phase I Environmental Site Assessment of the Residential Homes and Workshop located at 8371 and 8375 Talbert Avenue in Huntington Beach, California ("the Subject Property"). PSI performed the Phase I ESA in general accordance with ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The assessment was completed at the request of Sperry Commercial ("the client") in accordance with the scope of work outlined in PSI's Proposal Number 0066-276606, which was authorized by the client on May 14, 2019.

The conclusions developed herein represent our professional judgment based on information and data available to us at the time of the assessment, and observations made at the time of our site reconnaissance. In accordance with ASTM E1527-13 § 4.6, the report is valid for a period of 180 days from the time of issuance.

Environmental Professional Certification

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Professional

1.0 EXECUTIVE SUMMARY

PSI, an Intertek company, performed a Phase I ESA of the Residential Homes and Workshop located at 8371 and 8375 Talbert Avenue, in Huntington Beach, California, 92646. PSI performed the assessment to comply with the contract between Sperry Commercial (the client) and PSI.

Our assessment included a Phase I ESA and did not include evaluation of business environmental risks that are beyond the scope of ASTM E1527 (e.g., asbestos, mold, lead based paint, radon, wetlands, etc.).

1.1 FINDINGS

A summary of findings is provided below. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

1.1.1 SITE DESCRIPTION AND CURRENT USE

The subject property consists of two parcels of land totaling 2.12-acres located at 8371, 8375 Talbert Avenue, Huntington Beach, California 92646. The site can also be identified by Assessors Parcel Numbers (APN): 167-531-23 and 167-531-24. Improvements to the subject property consist of three one-story residential buildings totaling approximately 1,600 sf, 2,400 sf, and 4,000 sf, and one one-story workshop building totaling approximately 1,900 sf. The property is also developed with asphalt paved parking areas and landscaping around the buildings.

1.1.2 ADJOINING PROPERTY DESCRIPTION AND USE

The subject property is located within a primarily residential corridor along Talbert Avenue, with a church located on the western adjoining property. No uses of concern were identified on the adjoining properties. Usage of the immediately surrounding properties is summarized in the table below.

Direction	Description of Adjoining Property Use
North	Several residential homes
East	Newland Street followed by residential homes
South	Talbert Avenue followed by several residential homes
West	St. Vincent De Paul Church

1.1.3 HISTORICAL USE OF SITE AND SURROUNDING AREA

The subject property historically consisted of vacant land from 1896 to 1902. By 1935, the site was developed with two residential structures, and by 1938 the site was developed with a third residential structure. By 1977,

a workshop building was developed at the north side of the site, and the property generally resembled the present-day layout of the site.

The adjoining properties historically consisted of vacant land from 1896 to 1935. By 1938, the properties were generally utilized for agricultural purposes. By 1963, the southern adjoining property was developed with the present-day residential structures, and the western adjoining property was developed with two structures. By 1972, the cemetery was developed on the western adjoining property, and the eastern adjoining property was developed with a school. By 1977 the northern adjoining property was developed with the present-day residential structures. By 2005, the eastern adjoining property was developed with the present-day residential homes.

1.1.4 GOVERNMENTAL RECORDS REVIEW

PSI subcontracted with EDR to provide a review of governmental database records for spill sites, tanks, hazardous waste handlers, and other facilities of potential concern within proximity to the subject property.

The subject property and adjoining properties were identified in the database search and those listings were evaluated by PSI during this assessment. These facilities are discussed in Section 7.1 of this report and the regulatory radius map report is appended.

1.1.5 SIGNIFICANT DATA GAPS

The ASTM E1527 Standard Practice defines a significant data gap as a lack of or inability to obtain information required by the practice that would limit our ability to draw conclusions with regard to RECs in connection with the subject property. Based on our experience, the information that we gathered and evaluated did not present significant data gaps that affected our ability to identify RECs in connection with the subject property.

1.2 CONCLUSIONS

PSI performed a Phase I ESA of the subject property in general accordance with the scope and limitations of ASTM Practice E 1527-13. Any exceptions to or deletions from this practice are described in Section 2.3 of this report. The following conclusions have been made with regard to evidence of RECs, HRECs, CRECs, VECs, and *de minimis* conditions on the subject property, as defined in ASTM E 1527-13.

1.2.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of RECs in connection with the subject property.

1.2.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of CRECs in connection with the subject property.

1.2.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM Standard Practice defines an HREC as a past release of hazardous substances or petroleum products that has impacted the property, but the release has been addressed to the satisfaction of a regulatory agency or meets unrestricted use criteria established by the regulatory agency without the need for institutional or engineering controls. PSI has identified the following HREC(s) in association with the subject property:

- The subject property previously had one 550-gallon UST located at the site. The tank was installed in 1967 and was utilized to store fuel. In December of 1985 a leak was identified during removal of the UST, and remedial activities were performed to remove contaminated soil from the site. Groundwater was also impacted at the site, but the levels of contamination were "lower than the most restrictive levels given on the [Leaching Potential Criteria] table" and no remediation was required. In December of 1990, The County of Orange Health Care Agency granted a 'No Further Action' letter to the subject property owner regarding the remedial actions associated with the former leaking underground storage tank.

1.2.4 VAPOR ENCROACHMENT CONDITIONS

This assessment has revealed no evidence of VECs in connection with the subject property.

1.2.5 DE MINIMIS CONDITIONS

PSI did not identify evidence of de minimis conditions on the subject property.

1.3 RECOMMENDATIONS

PSI recommends no further assessment for RECs in connection with the subject property at this time.

2.0 PHASE I ESA SCOPE AND METHODOLOGY

2.1 PURPOSE OF SERVICES

PSI performed the Phase I ESA in conformance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The purpose of the Practice was to define good commercial practice for conducting a Phase I ESA and as such, the Practice is intended to permit the user to satisfy one of the requirements to qualify for the LLPs. The goal of the processes established by the Practice is to identify RECs in connection with the property.

Based on the information provided, PSI understands that your purpose for having the Phase I ESA performed is to satisfy one of the LLPs.

2.2 PHASE I ESA METHODOLOGY

PSI performed a Phase I ESA of the subject property. The scope of our services and general methodology is presented below.

The information sources that PSI used, including published material, material obtained from commercial and other sources, is listed below and cited as it is presented in the report. The information or excerpts thereof is appended.

This assessment included the following components:

- Records review;
- Reconnaissance;
- Interviews;
- Vapor Encroachment Screen (VES) in accordance with ASTM E2600-15; and
- Preparation of this report, including our evaluation.

2.3 LIMITATIONS, EXCEPTIONS, DEVIATIONS AND DATA GAP

PSI considers that limitations, exceptions, and deviations from the Practice manifest as a lack of or inability to obtain information required by the Practice. This represents the definition of the 'data gap' contained in the Practice. PSI listed the component objectives of the Practice on the appended Data Gap Worksheet and tracked the information obtained against the objectives. Therefore the limitations, exceptions and deviations are identified in the Worksheet.

In general, when required information was incomplete, not provided, otherwise not obtained, or indicated a need for additional information, PSI attempted to use information from other sources to meet the Practices' performance objectives. When the data gaps affected the Environmental Professional's ability to identify RECs, PSI considered the data gap(s) to be significant. PSI identified significant data gaps (if any) on the Data Gap Worksheet and reported them in Section 1.1.5.

2.4 SIGNIFICANT ASSUMPTIONS

PSI made the following assumptions in developing our Phase I ESA findings and conclusions:

- Regulatory Agency Information - PSI considers all information provided by our environmental database subcontractor regarding regulatory status of facilities to be complete, accurate, and current.
- Other Regulatory Information - PSI considers all information obtained from regulatory or enforcement agencies to be complete, accurate, and current.
- Title, Lien and AUL Information - PSI considers all information provided by real estate title record review firms regarding property use or ownership, encumbrances or other limitations, if provided, to be complete, accurate and current.
- Interviews - PSI considers all information provided through interviews to be complete, unbiased and provided in good faith.
- Groundwater - PSI interpreted and inferred the direction of the shallow groundwater movement based on the information we obtained and our experience. Actual groundwater flow may be locally influenced by many factors beyond the scope of this assessment. Subsurface investigation would be necessary to determine site-specific groundwater flow direction.

3.0 USER-PROVIDED INFORMATION

PSI considers the client to be the 'User' of our assessment, defined in ASTM Practice E 1527 as "the party seeking to use ASTM E 1527 to complete a Phase I ESA of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The User has specific obligations for completing a successful application of this practice...."

3.1 USER QUESTIONNAIRE

The EPA All Appropriate Inquiry Rule (40 CFR Part 312) and ASTM E1527 Section 6 require the User to answer certain questions related to the property, in order to obtain certain LLPs from CERCLA liability. To facilitate this process, PSI provided the client with a User Questionnaire, which is provided in the Appendix if it has been returned. A summary of the required questions and client responses is provided below:

Question	Yes	No	Unknown	N/A	Client did not respond
Did a review of recorded land title records or other sources identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?			✓		
Did a review of land title records or other sources identify any activity use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place on the subject property?			✓		
Do you have specialized knowledge or experience related to the subject property or nearby properties?	✓				
Does the purchase price being paid for the property reasonably reflect the fair market value of the property?				✓	
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?				✓	

Question	Yes	No	Unknown	N/A	Client did not respond
Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of a releases or threatened releases?	✓				
Do you know of the past uses of the property?	✓				
Do you know of specific chemicals that are present or were once present at the property?	✓				
Do you know of spills or other chemical releases that have taken place at the property?	✓				
Do you know of any environmental cleanups that have taken place at the property?	✓				
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?		✓			
Do you know of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	✓				
Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	✓				

NOTES

The client returned PSI's questionnaire indicating 'UNKNOWN' to the questions: "Did a review of land title records (or judicial records where appropriate) identify any environmental cleanup liens filed or recorded against the subject property under federal, tribal, state or local law?" and "Did a review of land title records (or judicial records where appropriate) identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?" This is a limitation that is

evaluated on the appended Data Gap Worksheet. The completed questionnaire is appended.

The client indicated 'YES' to the questions: "Do you know of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?" and "Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?" The client provided documentation regarding a former leaking underground storage tank at the subject property and documentation from the regulatory agency granting closure to the site. These documents are discussed further in section 3.4 of the report.

3.2 TITLE RECORDS

Based on a review of the local tax assessor's records, the subject property is currently owned by Mary Langston (née LeCrivain) and Corine LeCrivain. Information regarding the previous owners was not included in the tax assessors records. Interviews with Mary Langston, site contact and property owner, revealed the property has been owned by the LeCrivain family since its original development.

3.3 SUGGESTED INFORMATION

The client provided PSI with the following suggested information described by the Practice.

- The reason for performing the Phase I ESA.
- The type of property and type of property transaction.
- The complete and correct address of the property.
- The scope of services desired for the Phase I ESA, including any evaluation for business environmental risk that is beyond the scope of ASTM E1527.
- Identification of all parties who will rely upon the report.
- Identification of the key site contact and contact information.

3.4 HELPFUL DOCUMENTS

The Practice requires that the environmental professional ask the property owner, the key site manager (if any is identified), and the User for certain helpful documents about the property and certain legal proceedings involving hazardous substances and the subject property. PSI mailed or e-mailed questions or performed interviews requesting this information. The responses documenting the persons we corresponded with, and relevant information obtained, are appended where practical.

Documents provided to PSI are tabulated and summarized below, and are included where practical in the Supplemental Documentation appendix. If a document is not appended, it is available for review at the PSI office that prepared this report during normal business hours.

Report Title:	Site Assessment Report
---------------	------------------------

Prepared For:	Julien LeCrivain Ranches 8371 Talbert Avenue, Huntington Beach CA
Prepared By:	Hekimian & Associates, Inc. 16571 Gemini Lane, Huntington Beach CA
Report Date:	October 18, 1990
Summary:	Hekimian & Associates performed the remedial excavation of the contaminated soil caused by the leaking underground storage tank at the subject property. The Site Assessment Report indicates an initial site assessment and sampling was conducted by an unnamed company in June of 1986 and identified elevated concentrations of TPH and BTEX in the soils surround the former underground storage tank. In January of 1988, Hekimian & Associates performed remedial actions to remove the contaminated soils from the site. Soil samples taken following the initial excavation had results that exceeded the regulatory limits, and further monitoring was required. Following the remedial efforts, two soil samples and two groundwater samples were taken from the tank location in October of 1988. The soil samples identified no TPH and trace levels of BTEX, while the groundwater samples were both non-detect for TPH and BTEX. Based on the results of the sampling, Hekimian & Associates recommended closure of the site to the regulatory agency.

Report Title:	Remedial Action at 8371 Talbert, Huntington Beach CA 92646
Prepared For:	Julien LeCrivain 8371 Talbert Avenue, Huntington Beach CA
Prepared By:	County of Orange Health Care Agency
Report Date:	December 11, 1990
Summary:	The County of Orange Health Care Agency provided a letter confirming the completion of the site investigation and remedial actions performed at the subject property and recommended 'no further action' with regard to the remediation at the site.

Report Title:	Well Completion Report
Prepared For:	Mary Langston 8371 Talbert Avenue, Huntington Beach CA

Prepared By:	County of Orange Health Care Agency
Report Date:	August 21, 2000
Summary:	The County of Orange Health Care Agency provided a well completion report following the removal of the groundwater well at the site. The well was decommissioned in August of 2000 and was filled and capped with concrete per State of California Well Standards and County of Orange Health Department Code. The location of the groundwater well was on what is now the northern adjoining property, located at 8442 Jalm Drive.

4.0 PHYSICAL SETTING

PSI reviewed a USGS topographic (topo) map, information from the USDA and/or Natural Resources Conservation Service (NRCS) and/or other information regarding the physical setting of the subject property to assist with the interpretation of subsurface water movement near the subject property. Physical setting information is summarized in the table below.

Summary of Physical Setting Information

Physical Setting Attributes	Description	Source
Subject property elevation:	Approximately 45-feet AMSL	USGS Topo Map "Newport Beach, CA" 7.5 minute Quadrangle, 2012
Topographic gradient:	The subject property and surrounding area slopes gently to the northeast direction.	EDR Radius Map Report
Closest surface water:	Pacific Ocean, located 3.2 miles southwest	EDR Radius Map Report
Other resource or physical characteristics mapped on the subject property?	No	EDR Radius Map Report
Is a flood plain mapped on the subject property?	No	EDR Radius Map Report
Predominant soil type(s) mapped on the subject property:	Myford - Sandy loam characterized by very slow infiltration rates	SSURGO Soil Survey of Orange County, California
Geology/Hydrogeology:	Quaternary Stratified Sequence	EDR Radius Map Report
Estimated depth to first groundwater:	41 feet bgs	State of California Geotracker records for a LUST case at the subject property, 8371 Talbert Avenue, Huntington Beach CA
Anticipated regional groundwater flow direction:	Northeast	EDR Radius Map Report
Oil and Gas Resources:	None mapped on or adjacent to the subject property	EDR Radius Map Report

Physical Setting Attributes	Description	Source
Mining Resources:	None mapped on or adjacent to the subject property	EDR Radius Map Report

5.0 SITE RECONNAISSANCE

The location and approximate boundaries of the subject property are illustrated on the appended figures. The legal description of the subject property, if provided to PSI, is appended.

Mary and Gordon Langston, property owners, granted PSI access to the subject property and escorted PSI during the site reconnaissance.

The ground reconnaissance consisted of observing the periphery of the subject property and viewing the subject property from accessible adjoining public access areas. Visual reconnaissance of adjoining properties was limited to areas and facilities that were readily observable from the subject property or from public access areas. PSI also systematically toured the interior portions of the subject property parcels to provide an overlapping field of view.

The peripheries of surface features and/or structures, where present on the subject property, were observed along with accessible interior common areas. PSI photo-documented selected features. The photo log is included in the Appendix.

5.1 SUBJECT PROPERTY DESCRIPTION AND CURRENT USES

General Site Information	
Subject Property Address	8371 and 8375 Talbert Avenue, Huntington Beach, California 92646
Parcel Size (acres)	2.12 +/-
Site Contact/Escort	Mary Langston / Mary Langston
Date of Reconnaissance	May 21, 2019
Building Information	
Building Description	Three residential structures with associated garages and one workshop
Size (square feet)	Residential Structures: 1,600 sf, 2,400 sf, and 4,000 sf Workshop: 1,900 sf
Number of Stories	Residential Structures: 1 with basement Workshop: 1
Approx. Construction Date	Residential Structures: early 1900s Workshop: 1970s
Utilities	
Water	City of Huntington Beach

Wastewater/Sewer	City of Huntington Beach
Electricity	Southern California Edison
Natural Gas	Southern California Gas Company
Heating Source	HVAC units

The subject property consists of two parcels of land totaling 2.12-acres located at 8371, 8375 Talbert Avenue, Huntington Beach, California 92646. The site can also be identified by Assessors Parcel Numbers (APN): 301-67-706A. Improvements to the subject property consist of three one-story residential buildings totaling approximately 1,600 sf, 2,400 sf, and 4,000 sf, and one one-story workshop building totaling approximately 1,900 sf. The property is also developed with asphalt paved parking areas and landscaping around the buildings.

5.2 SUBJECT PROPERTY OBSERVATIONS

A summary of the subject property uses and conditions is tabulated below. Detailed information is discussed following the summary for any "yes" answers, along with an opinion about the significance of the listing.

Identified? (check if Yes)	Item Description
Equipment/Activities/Uses	
	Emergency Generators
	Elevators
	Hydraulic Lifts
	Dry Cleaners/Laundromats
	Photo Processing
	Medical/Dental Offices - Biomedical Wastes
	Automotive/Equipment Repair
	Grease Traps and Oil/Water Separators
	Wastewater Treatment Systems
	Septic or Sewage Tanks
✓	Air Compressors
	Transformers or Other Mech./Elec. Equipment That Could Contain PCBs
	Pipeline Markers

Identified? (check if Yes)	Item Description
	Oil and Gas Wells
	Stormwater Ponds
	Quarries, Pits, Lakes, or Lagoons
✓	Use, Storage, or Disposal of Hazardous Substances
✓	Use, Storage, or Disposal of Petroleum Products
	ASTs/USTs
	Drums or Other Bulk Chemical Containers
	Suspect Containers/Unidentified Contents
✓	Drains and Sumps
	Drinking Water, Irrigation or Monitoring Wells
	Agrochemical Use/Application
	Railroad Spur/Tracks
Potential Evidence of Releases	
	Interior/Pavement Stains or Corrosion
	Stained Soil/Stressed Vegetation
	Chemical Odors
	Surface Water Sheen or Discoloration
	Exterior Pipe Discharges/Unknown Pipes/Effluent Discharges
	Pools of Liquid or Standing Water
	Solid Waste Dumping/Landfilling/Suspect Fill Material
	Construction Debris/Material Stockpiles
	Other Uses or Conditions of Concern

5.2.1 AIR COMPRESSORS

PSI observed a small portable air compressor located in the workshop building. The air compressor appeared to be in generally good condition and no evidence of leaking or spillage was observed on or near the compressor. The presence of the air compressor is not considered evidence of a REC in connection with the subject property.

5.2.2 USE, STORAGE, OR DISPOSAL OF HAZARDOUS SUBSTANCES

Small quantities of cleaning chemicals and lubricants were observed in the workshop building and garages on the subject property. These cleaning chemicals appeared to be stored properly, were in containers of 5-gallons or less in size, and no leaks or stains were observed around them. Based on this information, these cleaning chemicals are not considered evidence of a REC in connection with the subject property.

5.2.3 USE, STORAGE, OR DISPOSAL OF PETROLEUM PRODUCTS

Small quantities of motor oils, lubricants, and gasoline were observed in the workshop building on the subject property. These items appeared to be properly labeled and stored with no apparent leaking, odor, or corrosion observed. Based on the small quantity and the observed storage practices, these substances do not appear to be evidence of a REC in connection with the subject property.

5.2.4 DRAINS OR SUMPS

PSI observed a drainage ditch along the western property boundary. PSI did not observe evidence of standing water, staining or stressed vegetation in the vicinity of the ditch at the time of the site reconnaissance. The presence of this drainage ditch is not considered to be evidence of a REC in connection with the subject property.

5.3 OFF-SITE OBSERVATIONS

A summary of the adjoining property uses and conditions is tabulated below. Detailed information is discussed following the summary for any “yes” answers, along with an opinion about the significance of the listing.

Identified? (check if Yes)	Item Description
Equipment/Activities/Uses	
	Emergency Generators
	Elevators
	Hydraulic Lifts
	Dry Cleaners/Laundromats
	Photo Processing
	Medical/Dental Offices - Biomedical Wastes
	Automotive/Equipment Repair

Identified? (check if Yes)	Item Description
	Grease Traps and Oil/Water Separators
	Wastewater Treatment Systems
	Septic or Sewage Tanks
	Air Compressors
✓	Transformers or Other Mech/Elec. Equipment That Could Contain PCBs
	Pipeline Markers
	Oil and Gas Wells
	Stormwater Ponds
	Quarries, Pits, Lakes, or Lagoons
	Use, Storage, or Disposal of Hazardous Substances
	Use, Storage, or Disposal of Petroleum Products
	ASTs/USTs
	Drums or Other Bulk Chemical Containers
	Suspect Containers/Unidentified Contents
	Drains or Sumps
	Drinking Water, Irrigation or Monitoring Wells
	Agrochemical Use/Application
	Railroad Spur/Tracks
	Potential Evidence of Releases
	Interior/Pavement Stains or Corrosion
	Stained Soil/Stressed Vegetation
	Chemical Odors
	Surface Water Sheen or Discoloration
	Exterior Pipe Discharges/Unknown Pipes/Effluent Discharges
	Pools of Liquid or Standing Water
	Solid Waste Dumping/Landfilling/Suspect Fill Material
	Construction Debris/Material Stockpiles

Identified? (check if Yes)	Item Description
	Other Uses or Conditions of Concern

5.3.1 TRANSFORMERS OR OTHER MECH./ELEC. EQUIPMENT THAT COULD CONTAIN PCBS

PSI observed one pad-mounted transformer on the western adjoining property. No evidence of leakage, spillage or corrosion was observed in connection with the transformers. PSI did not observe non-PCB labeling on the transformers at the time of the site reconnaissance. PSI believes the electrical equipment is the property and responsibility of So Cal Edison, the local electrical utility company, who would be responsible for cleanup related to the equipment that could not be attributed to tenant negligence. The identified electrical equipment appeared to be in good condition, with no apparent evidence of staining, leakage, or corrosion noted. Based on their observed condition and the local utility ownership, the observed transformers are not considered to be evidence of a REC in connection with the subject property.

6.0 HISTORICAL USES

PSI utilized readily ascertainable historical data resources in order to research the history of the site and surrounding area. The intent of this review was to identify historical tenancies or uses of the subject property and surrounding area, which might be considered evidence of a REC. Generally, PSI reviewed the following readily ascertainable historic data resources, where they were available:

- Readily available historical topographic maps were reviewed to evaluate land development in the area over time. It should be noted that the scale of topographic maps in some cases does not allow for mapping of individual structures and developed areas may be shown by shading only.
- Selected historical aerial photographs were reviewed at 5-10 year intervals to obtain information concerning the development and history of the subject property and surroundings.
- PSI reviewed readily ascertainable historical city directories at 5-10 year intervals in order to obtain information on tenancies on the subject property and adjoining properties.
- PSI requested available historical fire insurance maps from EDR. The Sanborn Map Company and other regional providers historically mapped urban areas for use by insurance underwriters. In some cases these maps provide useful information in evaluating previous tenancies and uses of the subject property and surrounding area.

Copies of select historical documents are provided in the report appendix; however, it should be noted that some of the resources used by PSI may be copyrighted and PSI has summarized these resources herein, but we have not included copies of these resources in the appendix.

6.1 SUMMARY OF RESOURCES

PSI reviewed the following resources in order to evaluate the historic uses of the subject property and surrounding area:

Source Type	Years Reviewed	Source
USGS Topo Maps	1896, 1901, 1902, 1932, 1935, 1942, 1949, 1950, 1965, 1972, 1981, 2012	EDR Historical Topo Map Report
Aerial Photographs	1938, 1947, 1953, 1963, 1972, 1977, 1987, 1990, 1994, 2005, 2009, 2012, 2016	EDR Aerial Decade Photo Package
City Directories	1965, 1972, 1975, 1980, 1985, 1992, 1995, 2000, 2005, 2010, 2014	EDR City Directory Image Report
Sanborn Fire Insurance Maps	Not Reviewed, Unmapped Property	EDR Certified Sanborn Map Report

6.2 CURRENT AND PRIOR USE INTERVIEWS

PSI conducted interviews with persons who are knowledgeable of the current use and history of the site. The following individuals were interviewed:

Name	Title/Role	Date Interviewed	Comments
Mary Langston	Property Owner	May 21, 2019	Mary provided access to the site and general information about the former use of the property. Mary indicated the subject property has been owned by her family since the early 1900's and was formerly used as a dairy farm, including the land to the north of the subject property.
Gordon Langston	Property Owner	May 21, 2019	Gordon escorted PSI during the site reconnaissance and provided information about the former use of the property. Gordon also provided information regarding the removal of the former underground storage tank and well located at the property.
Orange County Environmental Health Department	Custodian of Records	May 20, 2019	PSI obtained information from the Orange County Environmental Health Department public records database regarding the former use and disposal of hazardous materials and petroleum products at the subject property. PSI also obtained information regarding the leaking underground storage tank (LUST) and associated remediation of the site from the public records database.

No evidence of RECs were identified as a result of the interviews conducted during this assessment. An HREC associated with the former release of petroleum hydrocarbons from the underground storage tank previously located at the site was identified during the interviews and is discussed further in section 3.4 of this report.

Complete records of communication detailing information obtained and reviewed, have been appended to this report.

6.3 PRIOR INVESTIGATIONS

The client provided PSI with the reports or documents discussed in Section 3.4 of this report.

6.4 CITY DIRECTORIES

The following table lists the chronological city directories for the subject property and immediately adjoining properties.

Property	Address: Listing Description by Year
Subject Property	8371 Talbert Avenue: • Julien LeCrivain (1965-1995) • Corine LeCrivain (2000) • Gordon Langston (2005-2014) 8375 Talbert Avenue: • Not listed.
North	8402-8492 Jaln Drive: • Residential tenants (1980-2014)
East	17963 Point Reyes Street: • Not listed. 8502 Cape Canaveral Avenue: • Not listed.
South	18001 Gulf Lane: • Not listed. 8402-8452 Talbert Avenue: • Residential tenants (1972-2014) 18001 Newland Street: • Not listed.

Property	Address: Listing Description by Year
West	8345 Talbert Avenue: • Jerrold McAdams (1965-1975) • Saint Vincent De Paul Church (1980-1985) • George Stevens (1992) • Saint Vincent De Paul Church (1995-2014)

6.5 SUMMARY HISTORY OF SITE AND SURROUNDING AREA

A chronological summary of the history/use of the subject property and immediately adjacent properties is provided in the following table.

Date	Resource	Interpreted Use/Observations
SUBJECT PROPERTY		
1896, 1901, 1902	Topographic Maps	The subject property appears to consist of undeveloped land.
1932, 1935	Topographic Maps	The site is developed with two structures.
1938, 1942, 1947, 1949, 1950, 1953, 1963, 1965, 1972	Topographic Maps, Aerial Photographs	The site is developed with the three present-day residential structures and associated garage structures. The subject property appears to be associated with the agricultural operations on the northern adjoining property.
1977, 1981, 1987, 1990, 1994, 2005, 2009, 2012, 2016	Topographic Maps, Aerial Photographs	The workshop building is developed at the north side of the site, and the subject property now resembles the present-day layout of the site. Historic city directories did not identify the past tenants of the property.
NORTH ADJOINING PROPERTY		
1896, 1901, 1902, 1932, 1935	Topographic Maps, Aerial Photographs	The northern adjoining property appears to consist of undeveloped land.
1938, 1942, 1947, 1949, 1950, 1953, 1963, 1965	Topographic Maps, Aerial Photographs	The site is developed with several structures that appear to be used for agricultural purposes.
1972	Topographic Map, Aerial Photograph	The site is developed with a livestock pen and one associated barn structure.

Date	Resource	Interpreted Use/Observations
1977, 1981, 1987, 1990, 1994, 2005, 2009, 2012, 2016	Topographic Maps, Aerial Photographs	The site is developed with the present day residential structures. Historic city directories did not identify the past tenants of the property.
EAST ADJOINING PROPERTY		
1896	Topographic Map	The eastern adjoining property appears to consist of undeveloped land.
1901, 1902, 1932, 1935	Topographic Maps, Aerial Photographs	The eastern adjoining property appears to consist of Newland Street followed by undeveloped land.
1938, 1942, 1947, 1949, 1950, 1953, 1963, 1965	Topographic Maps, Aerial Photographs	The site consists of Newland Street followed by agricultural land.
1972, 1977, 1981, 1987, 1990, 1994	Topographic Maps, Aerial Photographs	The site consists of Newland Street followed by one large structure utilized as a school.
2005, 2009, 2012, 2016	Topographic Maps, Aerial Photographs	The site consists of Newland Street followed by the present-day residential structures. Historic city directories did not identify the past tenants of the property.
SOUTH ADJOINING PROPERTY		
1896	Topographic Map	The southern adjoining property appears to consist of undeveloped land.
1901, 1902, 1932, 1935	Topographic Maps	The southern adjoining property appears to consist of Talbert Avenue followed by undeveloped land.
1938, 1942, 1947, 1949, 1950, 1953	Topographic Maps, Aerial Photographs	The southern adjoining property consists of Talbert Avenue followed by agricultural land.
1963, 1965, 1972, 1977, 1981, 1987, 1990, 1994, 2005, 2009, 2012, 2016	Topographic Maps, Aerial Photographs	The southern adjoining property consists of Talbert Avenue followed by the present-day residential structures. Historic city directories did not identify the past tenants of the property.

Date	Resource	Interpreted Use/Observations
WEST ADJOINING PROPERTY		
1896, 1901, 1902, 1932, 1935	Topographic Maps, Aerial Photographs	The western adjoining property appears to consist of undeveloped land.
1938, 1942, 1947, 1949, 1950, 1953	Topographic Maps, Aerial Photographs	The site consists of agricultural land.
1963, 1965	Topographic Maps, Aerial Photographs	The site is developed with two structures at the east side of the site.
1972	Aerial Photograph	The present-day cemetery is developed at the west side of the site.
1977	Aerial Photograph	The southern structure is no longer present at the site.
1987, 1990, 1994	Aerial Photographs	The site is developed with several of the present-day commercial structures and appears to be utilized as a church.
2005, 2009, 2012, 2016	Topographic Maps, Aerial Photographs	The site is developed with an additional structure and now resembles the present-day layout of the site. Historic city directories did not identify the past tenants of the property.

The subject property historically consisted of vacant land from 1896 to 1902. By 1935, the site was developed with two residential structures, and by 1938 the site was developed with a third residential structure. By 1977, a workshop building was developed at the north side of the site, and the property generally resembled the present-day layout of the site.

The adjoining properties historically consisted of vacant land from 1896 to 1935. By 1938, the properties were generally utilized for agricultural purposes. By 1963, the southern adjoining property was developed with the present-day residential structures, and the western adjoining property was developed with two structures. By 1972, the cemetery was developed on the western adjoining property, and the eastern adjoining property was developed with a school. By 1977, the northern adjoining property was developed with the present-day residential structures. By 2005, the eastern adjoining property was developed with the present-day residential homes.

7.0 ENVIRONMENTAL REGULATORY RECORDS REVIEW

7.1 DATABASE FINDINGS

PSI retained EDR to provide environmental database information attributed to the subject property and its surroundings. EDR obtains environmental databases published by local, state, tribal, and federal agencies and maps the information for electronic searches. EDR's service includes reporting Standard Environmental Records Sources and, in most cases, some Additional Environmental Records Sources.

The search was performed to AMSDs listed in ASTM E 1527-13. The search radius required by ASTM varies by database.

Unmappable (orphan) sites (if any were listed) having insufficient address information to be mapped were evaluated for potential location within the AMSD. Those that could be determined to be within the AMSD are discussed, as appropriate.

The distribution of listed sites with respect to the subject property is tabulated and mapped in EDR's Radius Map Report, which is appended. The reader is referred to the table, which can be found near the front of EDR's report. The full names of the abbreviations and acronyms used below and in EDR's report can be found in the Government Records Searched/Data Currency Tracking section of EDR's report.

7.1.1 SUBJECT PROPERTY

The subject property was listed on one or more regulatory databases as summarized in the following table.

Facility Name & Address	Database(s)	Comments
Julien LeCrivain 8371 Talbert Avenue Huntington Beach, CA	LUST, RGA LUST, CERS, HIST CORTESE, HIST UST, FINDS	The subject property previously had one 550-gallon UST located at the site. The tank was installed in 1967 and was utilized to store fuel. In December of 1985 a leak was identified during removal of the UST, and remedial activities were performed to remove contaminated soil from the site. Groundwater was also impacted at the site, but the levels of contamination were "lower than the most restrictive levels given on the [Leaching Potential Criteria] table" and no remediation was required. In December of 1990, The County of Orange Health Care Agency granted a 'No Further Action' letter to the subject property owner regarding the remedial actions associated with the former leaking underground storage tank. Based on the remedial efforts regarding the former leaking underground storage tank and 'No Further Action' letter granted by the regulatory agency, these listings are considered to represent an HREC to the subject property.

7.1.2 SURROUNDING PROPERTIES

EDR identified a number of regulated facilities and/or spill sites within the search radius. Those sites that are adjacent to the subject property or warranted further evaluation are summarized and discussed in the table below. PSI considered the remaining database listings unlikely to impact the subject property based upon factors including (but not limited to):

- The nature of the listing;
- The use of the facility;
- When the facility was listed and its current listed status;
- The developmental density of the setting;
- The potential for vapors to encroach from the property to the subject property;
- The distance between the listing and subject sites related to whether releases are likely to migrate based on local surface and subsurface drainage conditions; and/or
- The presence of intervening drainage divides; and/or inferred groundwater movement.

Facility Name & Address	Distance (feet) & Direction	Elevation Difference (feet)	Database(s)	Comments
Fountain Valley School District 17890 Newland Street, Huntington Beach CA	Eastern Adjoining Property	2 Feet Higher	SWEEPS UST, CA UST, FID UST, HIST UST, LUST, CERS, HIST CORTESE, WDS, EMI	The listed databases indicate this site previously had four underground storage tanks utilized to store fuel. The tanks ranged from 550- to 5,000-gallons and were installed at the property in 1988. A leak was discovered at the property in September of 1997 during removal of the tanks. In October of 1997, the County of Orange Public Health Department granted a 'no further action' letter to the property. The property was listed on the WDS database as a facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation. The database lists the Santa Ana River as the discharge point. No violations or spills were reported in the database. The property was also listed on the EMI database in 1987 and 1990 as being regulated by the South Coast Air Quality Management District. No violations or spills were reported in the database.

Facility Name & Address	Distance (feet) & Direction	Elevation Difference (feet)	Database(s)	Comments
				Based on the remediation of the former leaking underground storage tank(s) and closure from the overseeing regulatory agency, these listings are not considered to represent a REC to the subject property.

7.2 REGULATORY AGENCY INQUIRIES

PSI requested records or information about the subject property and/or surrounding area from the governmental agencies listed in the following sections. Information was requested by telephone, in person, via e-mail or through a written FOIA or equivalent request, as appropriate.

7.2.1 REGULATORY AGENCY MAINTAINED WEBSITES

PSI reviewed the State of California GeoTracker, Envirostor and CalEPA websites for records pertaining to underground storage tanks, hazardous material storage, spills, leaks, cleanups, violations and releases at the subject property address.

PSI identified records of concern pertaining to the subject property address and the eastern adjoining property on the GeoTracker and CalEPA websites. Records pertaining to the subject property and adjoining property addresses were reviewed and included in discussions where relevant.

7.2.2 HEALTH DEPARTMENT/ENVIRONMENTAL DIVISION

PSI reviewed the Orange County Health Care Agency online database to inquire about environmental concerns at the subject property and surrounding area. PSI identified records relating to the former leaking underground storage tank and subsequent closure of the site by the regulatory agency on the database. The records were reviewed and included in discussions where relevant.

8.0 VAPOR ENCROACHMENT SCREENING

8.1 METHODOLOGY

Vapor encroachment is an emerging concern associated with the potential for volatile chemicals, such as petroleum fuels and chlorinated solvents to migrate through the subsurface in the gas phase from contaminated soil and/or groundwater plumes. Vapor encroachment may be a concern if subsurface volatile contaminants migrate into occupied buildings through cracks and penetrations in the building slab.

The ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment process requires the Environmental Professional to evaluate the potential for vapor encroachment onto the subject property, and to determine if such vapor encroachment constitutes evidence of a REC on the subject property. The E1527-13 Standard Practice does not specifically state the methods that must be used to screen for potential vapor encroachment issues. However, ASTM has developed a separate Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E2600-15). The vapor encroachment screening guidance outlines a methodology to conduct vapor encroachment screening, which will satisfy the vapor screening requirements under the Phase I ESA Standard Practice. PSI utilized the ASTM E2600-15 Standard Guide to conduct vapor encroachment screening for the subject property.

The goal of conducting Vapor Encroachment Screening (VES) is to identify a VEC, which is defined as the presence or likely presence of COC vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil either on or near the subject property. If a VEC is identified, the environmental professional must determine whether the VEC represents evidence of a REC on the subject property under the context of the Phase I ESA Standard Practice. It should be noted that the identification of a VEC on the subject property does not necessarily indicate that a potential for migration of vapors into existing or proposed structures on the subject property is likely. The environmental professional will identify the VEC as a REC where the potential for vapor migration into structures is considered likely, or where the contaminant concentrations in the soil, groundwater, or soil vapors on the subject property are significant and likely to result in enforcement against on-site or off-site responsible parties.

The VES utilizes information regarding the potential presence of releases on or near the subject property that were collected as a normal part of the Phase I ESA process, such as governmental database records, review of governmental files, historical data sources, etc. No additional data was collected specifically for the purpose of the VES. In order to identify potential sites of concern within the AMSD, as available and appropriate, PSI reviewed Sanborn Maps, governmental database records, regulatory agency files, aerial photographs, and other information.

VES Standard Guide prescribes a two tier approach for screening of sites for potential vapor encroachment. In Tier I, potential sites of concern within the search radii are identified and the environmental professional must determine whether a VEC exists or not based on the information that is available within the context of the Phase I ESA data gathering. If the available information indicates that a VEC exists based on available information, the environmental professional, in consultation with the User, may conduct Tier II screening to further evaluate the potential risk. Under Tier II, the environmental professional would review available

reports through the regulatory agency or other reasonably ascertainable sources to determine the status of assessment/remediation, size and migration pathways for any associated plumes, geologic conditions, and other geologic information. This information would be utilized to determine the distance between the plume and the target property boundary. For example, if the distance from the edge of a plume in a downgradient position to the subject property boundary exceeds 100 feet for VOCs or petroleum free product, or 30 feet for dissolved petroleum hydrocarbons (PHCs), then the site may be screened out and a VEC does not exist. Functionally, where Tier II information is readily available during the normal course of conducting the Phase I ESA, PSI has combined the Tier I and Tier II steps herein. Where agency files are not readily available for nearby contaminated sites within the typical schedule for a Phase I ESA, then Tier II screening might be recommended as a separate step subsequent to the Phase I ESA. Where Tier II screening is recommended, the sites of concern where data is lacking are considered a VEC until further information is available and/or further screening is completed.

The VES Standard Guide requires the environmental professional to search for potential sites of concern within the following databases and search distances, where groundwater flow is not known and/or preferential pathways for groundwater or vapor flow may exist:

Standard Environmental Records Sources	Minimum Search Distance (miles) - VOCs, excluding PHCs	Minimum Search Distance (miles) - PHCs
State and tribal HWS lists	1/3	1/10
State or tribal-equivalent NPL	1/3	1/10
State or tribal-equivalent CERCLIS list	1/3	1/10
State or tribal landfill or solid waste site list	1/3	1/10
State or tribal leaking storage tank lists	1/3	1/10
State and tribal registered tank lists	Subject property only	Subject property only
State and tribal IC/EC registries	Subject property only	Subject property only
State and tribal voluntary cleanup site lists	1/3	1/10
State and tribal brownfield sites list	1/3	1/10
Federal NPL site list	1/3	1/10
Federal CERCLIS list	1/3	1/10
Federal RCRA CORRACTS list	1/3	1/10
Federal RCRA non-CORRACTS TSD List	1/3	1/10
Federal RCRA Generators List	Subject property only	Subject property only
Federal IC/EC registries	Subject property only	Subject property only

Standard Environmental Records Sources	Minimum Search Distance (miles) - VOCs, excluding PHCs	Minimum Search Distance (miles) - PHCs
Federal ERNS list	Subject property only	Subject property only

The default search distances may be expanded or reduced in the up-gradient, down-gradient, or cross-gradient directions by the environmental professional based on experience in the local area and applying professional judgment to factors such as where a well-defined regional groundwater flow direction is identified, or whether other geologic features such as low permeability soils or hydrogeologic boundaries such as rivers or streams exist which would tend to limit the potential for migration of groundwater or vapors in a particular direction.

8.2 VES RESULTS

PSI identified 4 sites of potential concern within the VES search radii, the Subject Property (8371 Talbert Avenue), the eastern adjoining property (Fountain Valley School District, 17890 Newland Street), a property located 500 feet west of the site (Good Shepard Cemetery, 8301 Talbert Avenue) and a property 1/4 mile west of the site (Walmart, 8230 Talbert Avenue) . These sites were evaluated using the EDR VES Application and the results of the VES are included in the EDR VES Report, which is appended. Based on that evaluation, no VECs were identified.

8.3 VES LIMITATIONS

The VES process is not intended to be an exhaustive screening and cannot wholly eliminate uncertainty regarding the presence of VECs in connection with the subject property. Screening is intended to reduce, but not eliminate uncertainty regarding whether or not a VEC exists in connection with the subject property.

9.0 CONTRACT INFORMATION

9.1 STANDARD OF CARE AND WARRANTIES

Our services were not intended to be technically exhaustive. There is a possibility that with the proper application of methodologies, conditions may exist on the property that could not be identified within the scope of the assessment(s) or that were not reasonably identifiable from the available information.

No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with the property. The ESA was intended to reduce, but not eliminate uncertainty regarding the potential for RECs in connection with a property.

Our report is based on commonly known and reasonably ascertainable information, including limited, ground-level visual inspection of the property except where otherwise explicitly indicated, in general conformance with ASTM E1527-13. Findings and conclusions derived from the methodologies described in the Practice contain all of the inherent limitations in the methodologies that are referred to in the Practice.

PSI has assumed that factual information provided to us by the client, or obtained from governmental and historical research firm, the public domain, interviews, and other sources is accurate and unbiased. PSI assumes no liability for the accuracy of data provided to us by others.

PSI did not perform exploratory probing or discovery, perform tests, operate specific equipment, or take measurements or samples to perform the ESA scope. The ESA was not a building code, safety, regulatory or environmental compliance inspection. The ESA is not intended to reduce the risk of the presence of mold and physical deficiencies conducive to mold nor the risk that mold or physical deficiencies conducive to mold may pose to the buildings and building occupants.

The methodologies include reviewing information provided by other sources. PSI treats information obtained from the record reviews and interviews concerning the property as reliable and the ASTM protocol does not require PSI to independently verify the information. Therefore, PSI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete.

PSI has performed the services in a manner consistent with that level of care and skill ordinarily exercised by other members of our profession currently practicing in the same locality and under similar conditions, within the limitations of ASTM E1527-13 standard, and the All Appropriate Inquiries Rule established by the U.S. Environmental Protection Agency (40 C.F.R. Part 312). No other warranties are implied or expressed.

The observations and recommendations presented in this report are time dependent, and conditions will change. This report speaks only as of its date.

9.2 RELIANCE

Sperry Commercial, PSI's client, may rely on this report.

9.3 USE BY OTHER PARTIES

This report was prepared pursuant to a contract between PSI and its client. That contractual relationship included an exchange of information about the property that was unique and serves as the basis upon which this report was prepared. Because of the importance of these understandings, our assessment may not be sufficient for the intended purposes of another party.

Reliance or any use of this report by anyone other than those parties identified above for which it was prepared, except with express written permission, is prohibited and therefore not foreseeable to PSI. Any unauthorized reliance on or use of this report, including any of the information or conclusions contained herein, will be at the third party's risk. No warranties or representations expressed or implied in this report are made to any such third party.

Third party reliance letters may be issued:

- upon timely request;
- subject to the permission of our original client; and
- payment of the then-current fee for such letters.

All third parties relying on our report, by such reliance, agree that such reliance is limited by our proposal and/or General Conditions, as applicable.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 6 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 04/09/2019 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-26-2013
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct an annual routine Hazardous Waste Inspection. Met with Ajet who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: Hazardous waste storage area containing 55 gallon drum for flammables, buckets of universal, corrosives, oxidizers, toxic ect. Hazardous waste containers are properly labeled and covered. Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. Hazardous Waste Emergency Response information.

inspect and take photos was granted by the assistant store manager, Mark Davis. A walk-through of the facility and trash compactor area was conducted. There was no hazardous waste observed in the compactor on this date, and no photos were taken. The following were observed: 55-gallon poly drum of aerosol cans Black: 9 x 5-gallon buckets toxic Red: 5-gallon bucket flammable Yellow: 5-gallon bucket corrosive 4? box of fluorescent light tubes Box of lithium ion batteries Box of alkaline batteries The containers were observed properly stored and labeled. Hazardous waste disposal documents were reviewed. No hazardous waste violations were observed on this date. A copy of this report will be sent to lmnico.s02636.us@wal-mart.com

CERS HAZ WASTE:

Site ID: 411264
CERS ID: 10687069
CERS Description: Hazardous Waste Generator

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-04-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine hazardous waste inspection. Met with Wade Miller. Inspected used oil, drained used oil/fuel filters, absorbent, aqueous parts cleaner and waste antifreeze. Drums were provided with a lid, stored in a secure manner and appear to be in good condition. The operator completes a maintenance inspection on the drums on a weekly basis. A Hazardous Waste label was noted on all drums with the required identification. Municipal dumpster area does not appear to contain any hazardous waste. Perimeter of facility inspected - did not observe any water runoff or staining at this time. Hazardous Waste Emergency Response plan was available for review. Manifests and bills of lading for all hazardous waste streams were reviewed today. Ensure all hazardous waste manifests/disposal documents are maintained on site for at least three years from the date of transport and are available for review during normal business hours. Please continue to all [Truncated]

CERS Description:	Chemical Storage Facilities
Evaluation:	
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-04-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Onsite to conduct a routine hazardous waste inspection. Met with Wade Miller. Inspected used oil, drained used oil/fuel filters, absorbent, aqueous parts cleaner and waste antifreeze. Drums were provided with a lid, stored in a secure manner and appear to be in good condition. The operator completes a maintenance inspection on the drums on a weekly basis. A Hazardous Waste label was noted on all drums with the required identification. Municipal dumpster area does not appear to contain any hazardous waste. Perimeter of facility inspected - did not observe any water runoff or staining at this time. Hazardous Waste Emergency Response plan was available for review. Manifests and bills of lading for all hazardous waste streams were reviewed today. Ensure all hazardous waste manifests/disposal documents are maintained on site for at least three years from the date of transport and are available for review during normal business hours. Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-13-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: An on-site inspection was conducted this date to witness the annual monitoring system certification. John Kneisel (Petroleum Tank Testing) conducted the monitoring system certification and provided current Veeder-Root, VMI, and ICC certifications. This facility contains: 3 - USTs (87 south, 87 north (manifolded), 91) Monitor system is a Veeder-Root monitor panel and reads all functions normal. Overfill protection provided by audible/visual alarms. Sensors were observed positioned so as to initiate alarms at the earliest point possible. Sensors were re-positioned in a true vertical position upon installation after testing. Alarm history and setup tape reviewed while on site. The following were tested: - Sensors, initiated positive shutdown to the turbines when tested in water - ?Fail Safe? and ?Positive Shutdown? - Overfill protection (ATGs set at 90% capacity) for an external audible and visual alarm - Spill buckets using a visual hydrostatic test - Leak [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine UST inspection during the annual monitoring system certification. John Kneisel of Petroleum Tank Testing Inc. provided the following valid certifications: ICC, Veeder-Root, VMI. The manager, Lorena Meza was also present during this inspection. There are three double-walled fiberglass tanks at this site: 87 main, 87 siphon, 91. Wrap-around VR-409 sensors are in use in the dry annulars. Overfill prevention is provided by ATGs connected to an outside annunciator. VR-208 sensors are in use in the STP/piping sumps, fill sumps, and UDCs 1-2, 3-4, 5-6, 7-8, 9-10, 11-12. Mechanical leak detectors are in use on the 87 main and 91 product lines. The UST system is monitored by a Veeder-Root TLS-350 panel. All of the sensors initiated positive shutdown of their associated turbines when immersed in water. Fail Safe and Sensor Out were demonstrated operational. The fill spill buckets were tested hydrostatically for 1 hour and passed. All UST sensors and [Truncated]

Eval Notes:	Onsite to conduct a routine hazardous waste inspection. Consent to inspect and take photos was granted by the manager, Lorena Meza. A walk-through of the facility, parking lot and dumpster enclosure was conducted. There was no hazardous waste observed in the dumpster on this date, and no photos were taken. The following were observed: Waste solids with fuel (absorbent & filters), waste liquid with fuel The containers were observed properly stored and labeled. There were no hazardous waste disposal documents generated in the past 3 years. Upon review of DTSC's Hazardous Waste Tracking System website, the facility EPA ID number CAL000398833 was found to be INACTIVE. Please contact DTSC with all issues pertaining to the California EPA ID number. No hazardous waste violations were observed on this date. Eval Date:	06-15-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has three, double-walled tanks (87/87/91) monitored by a Veeder Root TLS-350 system. The monitor is operational for audible and visual alarms. The in-tank probes are used for overfill prevention. Fail safe and sensor out programming were verified. The sensors in the tank annulars, turbine sumps, fill sumps, and UDCs all shutdown the turbines when submerged in fuel. The mechanical line leak detectors were tested with a simulated 3 gph leak and were determined to be operational. The in-tank probes were positioned at 90% tank capacity, triggering an external audible/visual alarm for all three tanks. Spill buckets were visually tested for 30 minutes. At the end of the test period, there was no indication of leakage. Testing was conducted by John Kniesal of Petroleum Tank Testing. Technician certifications (VR, ICC, VMI) were verified. Please submit the test [Truncated]

Eval Date: 06-13-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: An on-site inspection was conducted this date to witness the annual monitoring system certification. John Kneisel (Petroleum Tank Testing) conducted the monitoring system certification and provided current Veeder-Root, VMI, and ICC certifications. This facility contains: 3 - USTs (87 south, 87 north (manifolded), 91) Monitor system is a Veeder-Root monitor panel and reads all functions normal. Overfill protection provided by audible/visual alarms. Sensors were observed positioned so as to initiate alarms at the earliest point possible. Sensors were re-positioned in a true vertical position upon installation after testing. Alarm history and setup tape reviewed while on site. The following were tested: - Sensors, initiated positive shutdown to the turbines when tested in water - ?Fail Safe? and ?Positive Shutdown? - Overfill protection (ATGs set at 90% capacity) for an external audible and visual alarm - Spill buckets using a visual hydrostatic test - Leak [Truncated]

Eval Date: 06-15-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine hazardous waste inspection. Consent to inspect and take photos was granted by the manager, Lorena Meza. A walk-through of the facility, parking lot and dumpster enclosure was conducted. There was no hazardous waste observed in the dumpster on this date, and no photos were taken. The following were observed: Waste solids with fuel (absorbent & filters), waste liquid with fuel The containers were observed properly stored and labeled. There were no hazardous waste disposal documents generated in the past 3 years. Upon review of DTSC's Hazardous Waste Tracking System website, the facility EPA ID number CAL000398833 was found to be INACTIVE. Please contact DTSC with all issues pertaining to the California EPA ID number. No hazardous waste violations were observed on this date. A copy of this report will be sent to tarekw@berribrothers.com

Eval Date:	06-15-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has three, double-walled tanks (87/87/91) monitored by a Veeder Root TLS-350 system. The monitor is operational for audible and visual alarms. The in-tank probes are used for overfill prevention. Fail safe and sensor out programming were verified. The sensors in the tank annulars, turbine sumps, fill sumps, and UDCs all shutdown the turbines when submerged in fuel. The mechanical line leak detectors were tested with a simulated 3 gph leak and were determined to be operational. The in-tank probes were positioned at 90% tank capacity, triggering an external audible/visual alarm for all three tanks. Spill buckets were visually tested for 30 minutes. At the end of the test period, there was no indication of leakage. Testing was conducted by John Kniesal of Petroleum Tank Testing. Technician certifications (VR, ICC, VMI) were verified. Please submit the test [Truncated]

Eval Notes: On site to conduct an annual routine Hazardous Waste Inspection. Met with Son who explained the process, escorted me through the site and gave consent to enter/inspect. Currently no hazardous waste stored on site. Son indicates he labels all drums with the required information once waste is generated. Etching process, Ferric chloride is stored in machine and is taken out periodically. Oxidation of circuit boards. Pumice dust is rarely generated about every 5 years it is cleaned out of the tanks. Any ink that is used is scraped cleaned from containers and containers are disposed of in the municipal trash. Electro polishing, contains Sulfuric Acid and Phosphoric acid. About every 3 years it is disposed of. Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. [Truncated]

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/11/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date:	2012
West Map:	5633763 SEAL BEACH, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06059C0253J	FEMA FIRM Flood data

06059C0261J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
COSTA MESA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

5G	1/2 - 1 Mile SW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
2	7 inches	11 inches	sandy clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY
