Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

CERS Description: Industrial Facility Storm Water
Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-03-2020
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a cursory NEC inspection of the above facility on December 3, 2020. Rolls of plastic film, pallets, and other industrial materials were observed stored outdoors. At the time of the inspection, the facility did not meet the NEC criteria. The NEC will be denied and a Notice of Non-Compliance will be issued to obtain NOI coverage. The facility certified their NEC coverage on 10/26/20.

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with plant manager Divid Ramirez of Harris Industries. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste (waste paint/thinner) generated was properly stored closed. The container however was not labeled. Please label this container and send verification that this has been completed. -- Waste manifests were available for review. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Violation Date: 06-15-2023
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 07/11/2023. Inventory needs to be updated to include the compressed gasses onsite.

Violation Division: Huntington Beach Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 410115
Site Name: PVD COATINGS LLC
Violation Date: 06-16-2014
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 07/21/2014. Facility is a Conditionally exempt small quantity generator (CESQG) (generates < 100 Kg. per month of hazardous waste or about 27 gallons). The 90-day period (to properly dispose of the waste) begins on the date the CESQG has accumulated 100 Kg. of hazardous waste. Last manifest was in 2008. To abate this violation have the drum of oil picked up within 30 days of this inspection report and send a copy of the manifest to this agency.

Waste manifests were available for review. -- Annual hazardous waste training is conducted. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-16-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes:

On site to conduct an annual routine Hazardous Waste Inspection. Met with Juan who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: 55 gallon drum of used oil Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. Hazardous Waste Emergency Response information.

Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 07-21-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes:

Received the manifest for the pick up of 90 gallons for waste oil by express oil. Facility has obtained a new EPA ID number CAL000398457 Violation W009 has been abated. All violations have been corrected.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 10-04-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes:

This is a follow up inspection report. On 6/14/16 a routine inspection was conducted. During inspection Violation I053 was given for exceeding the accumulation time. To abate this violation have all hazardous waste picked up and send the receipt to this agency immediately. NOTE: Small quantity generator (SQG) (generates < 1,000 Kg. per month of hazardous waste or 27 to 275 gallons). SQG's may accumulate hazardous waste (from initial date of waste accumulation) for 180 days or less, or 270 days or less if the waste is transported over a distance of 200 miles or more, for off-site treatment, storage or disposal. SQG's must not accumulate 6,000 Kg. or more of hazardous waste. .

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct an annual routine Hazardous Waste Inspection. Met with Art who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: 300 gallon tank of transmission fluid and a parts washer. Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. Hazardous Waste Emergency [Truncated]

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with owner Art Carr of California Performance Transmission. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste consists of a 500-gallon waste transmission fluid. Filters are drained and recycled with other metal scraps at the facility. -- Waste manifests for all waste streams were available for review. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

WDS:

Name: INDUCTION HEET TREET INC
Address: 5111 ARGOSY DR
City: HUNTINGTON BEACH
Facility ID: Santa Ana River 30I014773
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 8
Facility Telephone: 7148917804

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Site History:	The Baker Hughes Centrilift facility (Site) is used to service and rebuild pumps used in the oil and water resource industries. The Site has been in operation by Baker Hughes at the current location since 1976. As part of site construction in 1976, Centrilift installed a three-stage clarifier (northern clarifier) outside the northwest corner of the building. This clarifier received rinseate from the outdoor steam-cleaning operation and from the indoor shop area. The northern clarifier was decommissioned and removed from service in 1988. In 1985, a second three-stage clarifier (southern clarifier) was installed approximately 50 feet south of the northern clarifier. This southern clarifier was decommissioned in September 1993. The initial release solvents were found from a subsurface concrete structure in the northwestern area of the site. In 1994, Baker Hughes signed an oversight cost recovery agreement and agreed to investigate and remediate the Site. Since the early 1990s, characterization investigations have been performed to delineate the extent of contamination at the Site. Soil vapor, soil matrix, and groundwater data have been collected. The following constituents have been identified as contaminants of concern (COCs) at the Site: 1,1-dichloroethane (1,1-DCA); 1,1-dichloroethene (1,1-DCE); cis-1,2-dichloroethene (cis-1,2,-DCE); tetrachloroethene (PCE); 1,1,1-trichloroethane (1,1,1-TCA); trichloroethene (TCE); and 1,4-dioxane. In 1993, the initial site characterization was performed. The investigation included soil borings and a soil gas investigation. The investigation findings were presented in the Site Characterization Report, dated December 2, 1993. In 1994 & 1995, further investigations were conducted to delineate soil vapor and groundwater impacts at the site. Groundwater monitoring wells MW-1 through MW-4 and extraction wells EW-1 through EW-3 were installed. These investigation findings were presented in the Further Groundwater and Soil Vapor Characterization report, dated August 21, 1995. In 1995, a soil vapor extraction (SVE) pilot test was performed on MW-1, EW-1, EW-2, and EW-3. A groundwater extraction and treatment system commence operation. This system extracted from 3 well and groundwater was treated utilizing air stripping technology and polished with granulated activated carbon. Treated water was discharged in the storm sewer per WDRs. This groundwater treatment system was shut down in 2000 to evaluate alternative remediation systems. The findings were presented in the Soil Vapor Extraction Pilot Test Report, dated September 1, 1995. In 1996, groundwater monitoring wells MW-5 through MW-9 were installed. A soil investigation was conducted in the area of MW-2. The findings were presented in the Supplemental Site Assessment Report, dated June 11, 1996. In 2001 & 2002, a dual-phase (simultaneously removes vapor and groundwater) extraction pilot test was performed. The findings were presented in the Pilot Test Report, dated June 26, 2002. In 2003, a dual-phase extraction system was designed. A Remedial Design Package, Dated April 8, 2003 was submitted. In 2004, dual-phase extraction wells DE-1 through DE-8 were installed. Soil and groundwater data

gaps investigations were conducted. The dual-phase extraction system was utilized at the site from 2004 to 2009. The investigation findings were submitted in Additional Investigation reports, dated August 24, 2004 and October 5, 2004. In 2005 & 2006, Applications of In Situ Chemical Oxidation (ISCO) treatment technology introduced to the subsurface. Wells IW-1 through IW-20 were installed. Pilot study application of sodium persulfate and ferrous sulfate were injection into 8 wells at 10 to 30 feet below ground surface (ft bgs) over a 80 ft by 80 ft area. The pilot test groundwater monitoring revealed a reduction in VOC concentrations. A remedial application of 16,200 lbs of sodium persulfate and 1,300 lbs of ferrous sulfate were injected into 20 wells over a 170 ft by 90 ft area. Findings are presented in the In Situ Chemical Oxidation Report, dated December 14, 2010. In 2008, Membrane Interface Probe (MIP) investigation was performed. Finding were presented in the MIP Investigation Report, dated April 20, 2009 In 2009, Cone Penetrometer Testing (CPT) and Hydropunch investigation was performed. Report dated December 15, 2011. In 2010, large diameter auger excavation was completed to remove a significant portion of residual VOC mass in soil out site the northwest corner of the building near of the former northern clarifier. The excavation boundaries were approximately 20 ft by 40 ft and to a depth of 27 ft to 37 ft below ground surface. The excavation and removal of impacted soil was implemented over a 3-week period. A total of 25 five-foot and 16 three-foot diameter boreholes were advanced A total of 1,291.67 tons of non-hazardous soil was transported offsite to McKittrick Waste Treatment Site and a total of 118.54 tons of RCRA hazardous soil was transported to the Arlington, Oregon Waste Management Facility. During backfilling, displaced water was containerized and transported offsite for recycling. In 2012, Baker Hughes conducted a second round of large diameter auger excavation, advancing 37 5-foot diameter and 48 3-foot diameter boreholes to depths of 27 feet bgs. The foot print of the excavation was designed to remove all soil, to a depth of about 30 feet, within the 100,000 microgram per kilogram iso-concentration contour, which was delineated based on high resolution discrete sampling data and membrane interface probe data. Approximately 1,900 tons of contaminated material were removed during the second excavation. In August 2013, Regional Board staff requested the submittal of a Conceptual Site Model , a work plan for additional on- and off-site investigation of the 30-foot and 45-foot groundwater zones, and a limited feasibility study to compare and evaluate remediation alternatives to address the mass of VOCs remaining in the soil. In April 2014, Baker Hughes conducted an membrane interface probe (MIP) investigation in an attempt to delineate the lateral extents of groundwater contamination in the 45-foot zone. The MIP probe hit refusal at approximately 40 feet and did not detect contaminants. On February 3, 2014, we approved a work plan for additional offsite investigation of the 45-foot groundwater zone and the installation of a number of offsite groundwater monitoring wells. We approved several addenda to the work plan that extended the scope of work and the areal extent of the 45-foot Sand investigation. The activities conducted at and around the Site in 2014 and early 2015 included performing a membrane interface probe (MIP) investigation, installing nine groundwater monitoring wells in the 45-Foot Sand, conducting a cone penetrometer testing (CPT) survey in the 45-Foot Sand downgradient from the Site, collecting groundwater samples to analyze for background groundwater quality characteristics for inclusion in a

Waste Discharge Requirement (WDR) permit application, performing a remedial data collection survey using a membrane interface probe equipped with a hydraulic profiling tool (MiHPT) to identify where the highest concentrations of VOCs and 1,4-dioxane were located in saturated soil near the former source area at the Site, installing twelve new shallow and nine deeper groundwater monitoring wells to monitor the specific locations of VOCs and 1,4-dioxane and conducting monthly groundwater sampling of all newly-installed groundwater monitoring wells (Interim Status Report, April 2015). Twenty-five CPT borings were advanced into the 45-Foot Sand southwest of the Site. The CPT borings were advanced to depths ranging from approximately 60 to 80 feet below ground surface (bgs) on Argosy Avenue, Jason Circle, Newsboy Circle, Galway Circle and Baffin Circle, Tasman Drive, Chemical Lane, Commercial Drive and Business Drive and on the Site. The results of this CPT investigation indicated that VOC and 1,4 dioxane are present downgradient of the site along the Tasman Drive, Chemical Lane, Commercial Drive and Business Drive. AIS has expressed the possibility of presence of other sources of groundwater contamination south of Argosy Avenue and east of Cambay Lane (Technical Memorandum, CPT Assessment Results and Design of Proposed Groundwater, June 2015). Monitoring the permanent monitoring wells and additional CPTs in 45 Foot Sand one show that the plume is laterally extended to Bolsa Chica St. the southern boundary of the impact to the 45-foot sand is McFadden Ave at this time. RWQCB has requested the following based on the May3, 2016 meeting: 1. To provide contact information for the properties on the east of the Site, and 5340 Argosy Ave. (2 discussed locations) for further investigation. 2. To provide The First Semi-Annual 2016 Groundwater Monitoring Report on June 15, 2016 including; a) the updated Conceptual Site Model, b) updated iso-concentration contour maps for UFGU, c) updated iso-concentration contour maps for 45-Foot Sand; d) iso-concentration contour maps for Total VOCs and 1,4 - dioxane in UFGU and 45-Foot Sand; e) Rose diagram if there is historical variation in groundwater flow direction in UFGU. 3. To provide a tracer test work plan to evaluate the hydraulic connection and its magnitude among interfingering layers within the UFGU and possible connection to the 45-Foot Sand zone. 4. To provide a work plan for a bench scale study on the 45-Foot Sand zone to evaluate applicability of ISCO. 5. To provide a work plan for vertical delineation of groundwater impact at the Site and along the groundwater flow direction. RWQCB held a meeting with Baker Hughes on June 30, 2016. The primary focus of the meeting was the need to complete the vertical delineation at and hydraulically downgradient of the site. RWQCB stated the need to conduct this phase of the work and evaluate any potential impact to the groundwater resources below the 45-Foot sand (below the depth of 70 ft).

who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS database may contain additional details for this site. Please contact your EDR Account Executive for more information.

Eval Notes: inspection notes too long. see attachment.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-19-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: This was a sunny day. The company services pumping equipment that are used to pump oily liquid. The SWPPP was acceptable. BMPs proposed in the plan were secondary containments, covers, and regular housekeeping. Review of the last two annual reports showed elevated SC, TSS and O&G. The contact, Bryan Walters, was travelling to another facility and was not available during the inspection. It appeared that a back up team was needed for this facility to ensure that the SWPPP would be consistently implemented. There was a groundwater processing

system on site. Several drums of contaminated groundwater were found with no secondary containment. Approximately 50 large pipes coated with oil were stored throughout the open yard. A large amount of oil was found on the ground under the pipes. Several trays used as the secondary containers were full of oily black colored liquid. The yard was littered with large oil spills, debris, and oil soaked adsorbent. Approximately 10 metal crates containing parts and equipment coated with oil and rust colored residue were found on site with no covers and secondary containment. Five drums of fresh chemicals were found outside the containment area. There was a steam cleaning processing bench being set up outside. The bench was used to clean oil off the pipes. No covers and no secondary containment was found for the area. Large oil spills were found leading from the area across the yard to the storage area. Based on the contact, the area was newly built and that an awning would be built soon. The existing SWPPP did not contain information about this area. Pictures were taken of the facility. On 3/20/01, Bryan Walters called and was informed of the findings in the inspection. He requested that the pictures be attached with the notice. Staff agreed to do that.

Eval Date: 06-25-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Met with Patty Roche of Centrilift - Hughes Inc.. The facility manufactures equipment used in the oil drilling industry. The following was observed: - All hazardous waste was managed properly, containers were labeled, and the containers were closed. - Manifests were available for review. - no signs of a release were visible. The facility is in compliance at the time of this inspection.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a Hazardous Waste Inspection. Met with Silil who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: universal waste, waste oil. Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. Hazardous Waste Emergency Response Information. .

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS database may contain additional details for this site.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Registry ID: 110071052834

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Site Name: AAE AEROSPACE - BUILDING 1
Violation Date: 12-08-2022
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 05/04/2023. Observed one 55 gallon drum of

Eval Source:	CERS,
Eval General Type:	Other/Unknown
Eval Date:	05-04-2023
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	This is an off site inspection to follow-up on the violations cited during the routine inspection conducted on 12/8/2022. Reviewed the following: - Photographs demonstrating that 55-gal drums of hazardous wastes have been labeled with all of the required information. - 55-gal drum of Silica Dust waste has been correctly labeled as "Baghouse Waste (Silica Dust)". - 55-gal drum of Silica Dust (200 lb) has been removed from the facility on a non-hazardous waste manifest dated 2/2/2023. Laboratory test results dated 9/8/2021 indicate that the Silica Dust waste is hazardous for Acetone. Please begin managing the Silica Dust as hazardous waste immediately and ensure the waste is hauled on a uniform hazardous waste manifest by a registered hazardous waste hauler hereafter. Violations 3030007 and 3030010 have been corrected.

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous waste inspection. Met with Marilyn Rodriguez of AAE Aerospace. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste generated was properly stored. Two labels were observed without the start date. The start date was added based on the last manifest date. This violation was abated on this date. -- Waste manifests for all waste streams were available for review. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The Section Seven Tracking System (SSTS) tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct an annual routine Hazardous Waste Inspection. Facility has changed ownership the new owner is Transgime Group INC. Met with Enad who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: 55 gallon drum of used oil. It was discussed on this date that plant may be shutting down in 6 months. Inform this agency, so that a final inspection can be conducted. EPA ID Application given on this date, numbers are owner and site specific. \ Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for [Truncated]

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS database may contain additional details for this site.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-12-2021
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous waste inspection. Met with Hector Zaldivar of AMG/Notthoff Engineering Inc. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste generated was properly stored. Many containers were observed with missing or incomplete labels. Please replace labels, properly fill out, and submit photo documentation to this agency to verify that this has completed. -- Waste manifests were available for review. -- Annual hazardous waste training has not been conducted. Please conduct training and submit documentation (Employee participation sheets) that this has been completed. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Eval Notes:	On site to conduct a routine hazardous waste inspection. Met with Hector Zaldivar of AMG/Notthoff Engineering Inc. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste generated was properly stored. Many containers were observed with missing or incomplete labels. Please replace labels, properly fill out, and submit photo documentation to this agency to verify that this has completed. -- Waste manifests were available for review. -- Annual hazardous waste training has not been conducted. Please conduct training and submit documentation (Employee participation sheets) that this has been completed. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The FINDS: database may contain additional details for this site.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-04-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes:

Met with GM Jason Krispl and Mike Trollmann of Aerodyne Precision Machining Hazardous waste observed included two (2) 275-gallon totes containing waste cutting fluid from CNC machines. Containers were missing a label. Please note that all containers storing hazardous waste must contain a hazardous label. Please place completely filled out labels on the containers in order to abate the open violation.
