Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Violation Date: 07-14-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 09/24/2015. Overfill enunciator has visual cue but no audible alarm.

percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 07/22/2020. No audible alarm
Violation Division: Anaheim City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 354830
Site Name: ANAHEIM GLOBAL MEDICAL CENTER
Violation Date: 07-06-2017
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 07/06/2017. Diesel annular sensor failed when tested. Replaced like for like during inspection.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Registry ID: 110071212207

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	07-26-2021
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Regional Board staff conducted an inspection of the facility to determine if the facility was still open for business since the facility failed to re-certify their 2019-2020 NEC Annual Certification. Based on visual observations, the facility is still conducting industrial operations and had multiple industrial materials exposed to storm water. The facility is in non-compliance with the IGP for failure to re-certify the NEC coverage and their NEC will be Administratively Terminated.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Site History:	Historical operations at the site included the design, manufacturing and testing of electronic circuit boards. Since 1992, various investigation and remediation activities have taken place at the site. Several on-site contaminant source areas were identified, and a groundwater monitoring network was installed. In November 1995, the TCE concentration in monitoring well MW-5, the site s farthest downgradient monitoring point, was 11,000 micrograms per liter (g/L), indicating that a significant mass of TCE had migrated from the soil into the groundwater, and was moving off-site. The initial on-site remediation, which consisted of operating a soil vapor extraction (SVE) system for removal of VOCs from the soil, was conducted from 1995 to 1998. However, groundwater analytical results from monitoring well MW-5 indicated that TCE was still migrating from the on-site soils and into the groundwater. The SVE system resumed operation in June 2006, continuing until September 2007. Data from MW-5 now indicate that the SVE system has been largely successful in removing VOCs from the on-site source areas, thereby minimizing the further migration of contaminants into the groundwater. Between 1998 and 2006, there was no remedial action or containment in place to prevent the off-site migration of the dissolved TCE plume. Therefore, K/J proposed an off-site investigation to assess the lateral extent of the impacts to groundwater, as a result of SMTEK s past discharges of TCE. The off-site investigation was conducted on June 20, 2008, and consisted of three CPT borings (B1, B2, B3) that were advanced to groundwater on South Claudina Street, adjacent to, and downgradient of, the site. Boring location B1 is approximately sixty feet downgradient of MW-5. B2 is upgradient of MW-5, and B3 is cross-gradient from MW-5. All of the sampling points are downgradient of the site s former contaminant source areas, where SVE has been conducted. TCE was detected in the groundwater samples from all three of the borings, with 23 g/L in B1, 9.1 g/L in B2 and 4.6 g/L in B3. A fourth boring location was proposed farther downgradient, on private property, but the property owner denied access for the investigation. Additional groundwater sampling was conducted in the off-Site downgradient areas at 8 locations. Low concentrations of TCE was detected in all locations. Board staff has not requested further sampling in the off-Site locations. However, the monitoring well in the source area continues to show high concentrations of TCE. IN

November 2009, a confirmation sampling work plan was submitted to the RB. A meeting in regards to the off-site groundwater issue between the RB and the RP and his consultant was scheduled. Soil vapor assessment at the 1244 building has been completed. It was determined that there is no health risk for any tenant in taht building. Off-site downgradient groundwater investigation results indicate low concentrations of PCE in the groundwater.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Address: 601 E BALL RD
City,State,Zip: ANAHEIM, CA 92805
Site ID: 534375
CERS ID: 722933
CERS Description: Industrial Facility Storm Water

Violations:

Site ID: 534375
Site Name: International Paper Anaheim
Violation Date: 08-01-2011
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Large neglected accumulations of cardboard bits and fibers on roof and on ground on west and north sides of building and on northern area of east side of building. Unattended spills of ink powder and starch found.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-01-2011
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: hot and sunny. Contact would not allow photos. Housekeeping along building's entire west and north sides, and north portion of east side is poor; numerous bits of scrap paper litter these areas. On roof, found an area roughly 40X80-feet covered in scrap paper up to 1-foot deep north of the cyclones. Many other areas of roof-top collection pipes have further piles of paper and paper fibers. One area has several layers of caked paper fibers. East side of building has the starch tank and heated wax tanks. Spilled wax was found on ground and coating the tanks; liquid at ambient temperature. One spill was a small liquid pool of wax; most everything was a heavy greasy coating on the tanks and surrounding ground. Starch tank has a small spill of starch powder under the transfer pipe. Found an unattended dry ink powder spill on ground by roll-off by fire tank and an open bucket of liquid ink nearby. Contact reports they have a full-time custodian to clean and that the cyclones have "hiccups". Accuracy of SWPPP drainage is questionable; one roof drain found to go underground. At end of inspection, Contact stated photos would not be

allowed during follow-up inspection.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Case Development Inspection
Eval Date: 11-17-2011
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Weather: mostly cloudy and cool. Contact allowed photos. Stockpile of excess scrap metal on S-side is significantly reduced. Groundlevel cyclone area is heavily littered with paper fiber but most of previously-observed scrap bits are gone; rooftop cyclones are similarly improved. Paper bits still litter finished product stockpile; discussed sweeping these areas as the stock is rotated. Some litter still on ground below N loading dock; Contact reported that this area will be cleaned by end of day. Agreed with Contact that housekeeping is significantly improved, but still lags behind similar operators; agreed to wait for storm water sample results to confirm effectiveness.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fi

Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, and tank systems authorized under Permit-by-Rule, Conditional Authorization, and Conditional Exemption or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.

Eval Date: 03-23-2015
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Follow up to site visit made on July 8, 2014. Previous site visit revealed several violations. I met with Mr. Shelly who showed me around the site. The yard was nearly completely full with plated hub caps. Dirt and debris were significantly reduced but still present. Mr. Shelly said they sweep frequently and vacuum wash the property, but acknowledged the fact that the site was still dirty and said that his employees should sweep more. I told him to ensure that the entire facility is kept clean, not just the driveway area. Scrap metal piles were reduced from the last visit. The waste container in the center of the yard had been replaced and was completely covered with a tarp. Empty chemical bins did not have secondary containment. The empty drums stored at the southeast side of the facility had been removed. The open chemical waste bin had been removed. Mr. Shelly said that all waste bins are secured with appropriate lids. Tracking still present indicating general housekeeping procedures are still not adequate. The SWPPP had been updated as of September 2014 and Mr. Shelly had made several changes to the document in writing. The recent sampling data indicated that zinc, electrical conductivity, and nitrate were above benchmark values. I explained the new permit requirements, specifically the Numeric Action Levels and how the recent sampling data would exceed the levels. I told Mr. Shelly that they need to ensure sweeping and vacuum/power washing of the facility continues and to improve general housekeeping to prevent pollutants from leaving the site. Also, any scrap metal or empty containers left outside during a rain event should be covered to prevent exposure.

Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Inspectors Barbara Barry, Michelle Beckwith, and Michael Perez (RB staff) inspected this facility to follow up on a report submitted by the City of Anaheim that 10-20 gallons of mineral oil discharged from Linco Industries into the street on 9/17/2013. RB staff met with Dean Shelley, General Manager at Linco Industries who gave consent for RB staff to tour the property and to take pictures. SWPPP had not been updated since 2006 and stated that there had been no spills at this facility. Mr. Shelly said there has been "no spill issues getting into the street." Mr. Shelly said they don't have a spill kit, but they vacuum up spills if necessary. On the tour, RB staff observed that there was no secondary containment of liquid and dry waste bins, no spill kit, a leaking tank, uncovered scrap metal, an open waste bin, tracking of colored substances leading to drains, and pieces of rusting metal on the ground. Barbara Barry then asked Mr. Shelly about the mineral oil spill that the City of Anaheim had reported in September. Mr. Shelly said, "oh ya, there was that spill, but I thought you already knew about that so I didn't bring it up." Barbara Barry asked Mr. Shelly if any employee training had happened since that time. Mr. Shelly said yes but could not provide any records of employee training when asked. RB staff informed Mr. Shelly that there was deficient implementation of BMPs at this facility, the SWPPP needed to be kept updated, and that the Annual Report had incorrect information regarding the unauthorized discharge in September.

Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fi

Eval Notes:	Follow up to site visit made on July 8, 2014. Previous site visit revealed several violations. I met with Mr. Shelly who showed me around the site. The yard was nearly completely full with plated hub caps. Dirt and debris were significantly reduced but still present. Mr. Shelly said they sweep frequently and vacuum wash the property, but acknowledged the fact that the site was still dirty and said that his employees should sweep more. I told him to ensure that the entire facility is kept clean, not just the driveway area. Scrap metal piles were reduced from the last visit. The waste container in the center of

the yard had been replaced and was completely covered with a tarp. Empty chemical bins did not have secondary containment. The empty drums stored at the southeast side of the facility had been removed. The open chemical waste bin had been removed. Mr. Shelly said that all waste bins are secured with appropriate lids. Tracking still present indicating general housekeeping procedures are still not adequate. The SWPPP had been updated as of September 2014 and Mr. Shelly had made several changes to the document in writing. The recent sampling data indicated that zinc, electrical conductivity, and nitrate were above benchmark values. I explained the new permit requirements, specifically the Numeric Action Levels and how the recent sampling data would exceed the levels. I told Mr. Shelly that they need to ensure sweeping and vacuum/power washing of the facility continues and to improve general housekeeping to prevent pollutants from leaving the site. Also, any scrap metal or empty containers left outside during a rain event should be covered to prevent exposure.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Inspectors Barbara Barry, Michelle Beckwith, and Michael Perez (RB staff) inspected this facility to follow up on a report submitted by the City of Anaheim that 10-20 gallons of mineral oil discharged from Linco Industries into the street on 9/17/2013. RB staff met with Dean Shelley, General Manager at Linco Industries who gave consent for RB staff to tour the property and to take pictures. SWPPP had not been updated since 2006 and stated that there had been no spills at this facility. Mr. Shelly said there has been "no spill issues getting into the street." Mr. Shelly said they don't have a spill kit, but they vacuum up spills if necessary. On the tour, RB staff observed that there was no secondary containment of liquid and dry waste bins, no spill kit, a leaking tank, uncovered scrap metal, an open waste bin, tracking of colored substances leading to drains, and pieces of rusting metal on the ground. Barbara Barry then asked Mr. Shelly about the mineral oil spill that the City of Anaheim had reported in September. Mr. Shelly said, "oh ya, there was that spill, but I thought you already knew about that so I didn't bring it up." Barbara Barry asked Mr. Shelly if any employee training had happened since that time. Mr. Shelly said yes but could not provide any records of employee training when asked. RB staff informed Mr. Shelly that there was deficient implementation of BMPs at this facility, the SWPPP needed to be kept updated, and that the Annual Report had incorrect information regarding the unauthorized discharge in September.

Violations:

Site ID: 560072
Site Name: L3 Interstate Electronics Corporation
Violation Date: 10-02-2019
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Failure to Obtain Permit
Violation Notes: Discharger failed to recertify the NEC by October 1, 2019
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Site ID: 560072
Site Name: L3 Interstate Electronics Corporation
Violation Date: 10-02-2018
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Failure to Obtain Permit
Violation Notes: DISCHARGER FAILED TO RECERTIFY THE NEC BY OCTOBER 1, 2018
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-11-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a no exposure certification (NEC) inspection of the above facility on January 11, 2016. No industrial activity is exposed to storm water and thus the facility meets the requirements of the NEC as defined in the IGP. At the time of this inspection, the facility is in compliance with the IGP.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-29-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a cursory NEC inspection of the above facility. The facility's NEC permit was terminated on 10/23/19 for failure to recertify by the deadline (10/1). The facility must obtain IGP coverage, whether that be under an NEC or NOI. A NNC will be issued.

Eval Division: Water Boards

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Financial Assurance Documentation
Completed Date: 03/19/2014
Comments: DTSC has determined that the Voluntary Cleanup Agreement (VCA) for the Metropolitan Residential Site located in Anaheim, California, 92805 was signed by the City of Anaheim. Anaheim Housing Authority was the Responsible Party and the owner of the property at the time the Department approved the Removal Action Work plan for the Site. As such and since the Responsible party is a local government, the Financial Assurance requirement is waived pursuant to Health and Safety Code section 25355.2(c) and 25355.2(C)(4). However; the developer and the Home Owners Association(HOA)is still required to pay for DTSCs over sight cost that will be included in O &M Agreement for the Project. An email was sent to Ms. Anna Amarandos informing about the decision made.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

results from fieldwork conducted in July 2009. Maximum concentrations in soil gas include the following: 0.15 ug/l of naphthalene; 580 ug/l of PCE; 20 ug/l of TCE. The risk evaluation estimated the cancer risk due to chlorinated compounds via the vapor intrusion pathway as 1.5×10^{-5} and the total hazard index as 17. PCE is the primary contributor to risk and hazard.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Oversight Agreement
Completed Date: 06/10/2009
Comments: Signed agreement sent (FedEx) to District.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/10/2009
Comments: On July 10, 2009, fieldwork was completed per District's consultant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/03/2009
Comments: Via email on 07/03/2009, DTSC noted that the site sampling plan appeared consistent with discussions with the District's consultant and provided comments on the site sampling plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 10/22/2009
Comments: DTSC did not review the Environmental Assessment Summary Report since the District terminated the EOA (August 2009) prior to receipt of the Report. The report summarized the soil and soil vapor sampling results from fieldwork conducted in July 2009. Maximum concentrations in soil gas include the following: 0.15 ug/l of naphthalene; 580 ug/l of PCE; 20 ug/l of TCE. The risk evaluation estimated the cancer risk due to chlorinated compounds via the vapor intrusion pathway as 1.5 x 10⁻⁵ and the total hazard index as 17. PCE is the primary contributor to risk and hazard.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 07/07/2009
Comments: Via email on July 7, 2009, DTSC received a final copy of the Field Work Notice and was informed that the Notice was posted at the 1010 and 1016 E. Katella properties and delivered to properties within the line of sight of the proposed school property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Agreement Terminated Notification
Completed Date: 08/17/2009
Comments: On August 17, 2009, DTSC received a letter from the District, dated August 12, 2009, with notification that the District is terminating the Agreement effective immediately. The letter also indicates, however, that a summary data report will be submitted to DTSC when ready.
