Eval Notes: On-site to check ownership and see if the violation #1325, cited during a routine inspection on 12/4/17, was corrected. The violation was for failure to activate a new EPA ID number to reflect the new business owner, the current owner of this facility had an EPA ID number for his former business site located at 1600 Grand Ave suite C. Noticed on the DTSC website that the business address was still listed at 1600 N Grand as owner. Verified at 1600 N grand unit C, that the subject business has moved from that location to the 120 N Lacy address. Mr. Armenta said he and the previous inspector Mr. Bechara completed and submitted the EPA ID form for the new address 120 N Lacy. I had him call DTSC and he left a message to call him back. Mr. Armenta said he will email me the outcome once DTSC calls him back. I left him labels and explained why the updated information for the EPA ID number is important.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS database may contain additional details for this site.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Eval Date: 11-04-2011
Violations Found: Yes
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: Weather conditions: intermittent rain. Discharger did not recalculate Risk Factor by 9/2/11 deadline. Purpose of inspection was to observe condition of site BMPs. No BMPs were in place (no perimeter controls, no soil cover for seemingly inactive areas, etc). Site was level throughout, and was partially surrounded by a privacy wall. No construction equipment (machinery) was on site. A stockpile of whole and broken roof tiles, which appeared to be waste material, were not covered or contained. The on site waste disposal container was not covered. It was partially full w/ tree trimmings, and what appear household trash.

Hazardous Materials Inventory denied; Please note, per inspection conducted 1/10/2017, while I was onsite I observed the Waste Corrosive Solid - Concrete Sweepings. The sweepings were contained in a small maybe 15 to 20 gallon container and did not weigh near the amount reported in the chemical inventory. Also, for solids the reportable quantity is 500 pounds, so this may be removed. Site map: Please add the lead acid batteries location, it was near the hazardous waste storage next to the receiving area of the large warehouse. Please update the propane storage location, I observed these were in a locked cage outside of the front of the small warehouse.

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Eval Notes: On site to observe post FL-90 upgrade testing, which includes the installation of new penetration fittings and testing; and the testing of new spill buckets. Observed that the bravo penetration fittings, new manhole lids and collars, spill buckets and tank bottom protectors, etc have been installed. The spill buckets were filled with water and visually observed for at least one hour. No leaks were observed. The turbine and fill sumps (except for the 87 turbine - vortex treated and did not get new penetration fittings) were filled with water and tested with approved equipment for two 15 minute test periods. The sumps were extremely deep and were tested one at a time so the water could be moved one at a time. The testing showed passing results. The UST modification is complete. Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
