Violation Date: 06-03-2024
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Business failed to certify HMBP on/before March 1, 2024. Submittal made did not include the Emergency Plan section.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 549871
Site Name: MEN CAL Corp.
Violation Date: 06-21-2021
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 07/16/2021. OBSERVATION: Training documentation for all applicable employees was not available for review. Facility must conduct and document annual training for employees as specified in the employee training plan. CORRECTIVE ACTION: Please provide training records for the Hazardous Materials Business Plan with the following information documented: topic of training, date, employee name, employee signature. Submit documentation to this Agency within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-25-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine Hazardous Materials and Business Emergency Plan (HMBEP) inspection. Consent to enter and inspect was given by Juan Orozco, plant manager. This location had previously reported under CERS ID 10494820. During this inspection it was observed that the business operated out of two addresses, separated by a street. This facility must create its own CERS ID and submit for the materials stored at this address. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure (volumes are approximate): - Hydraulic Oil- 200 gallons - Propane- 550 gallons Employee training on the hazardous materials business emergency plan had been conducted. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds (55 gallons liquids, 200 cubic feet compressed gases, 500 pounds [Truncated])

compliance with the annual certification requirement and a violation is being cited. Businesses are required to annually review and certify that their information in the California Electronic Reporting System (CERS) is complete, accurate and in compliance by March 1st. Your business was notified via email on March 27, 2024 that your facility was out of compliance with this requirement. Please note the following important details: 1) Complete submittal includes the HazMat Inventory AND the Emergency Plan / Training sections. Both sections must be submitted. Your submittal for 2024 was missing the Emergency Plan/Training section. 2) If your business qualifies (see below) you may submit 2024 via the Certify option available on CERS. You must be logged in to use. HMBP Certify: A business may use the Certify option button located on their forms page if: 1) A previous, complete submittal was made the prior year, and 2) The bu

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

Eval Notes: Onsite to conduct a routine hazardous waste inspection. Met with Max. Inspected used oil, and waste antifreeze. Drums were provided with a lid, stored in a secure manner and appear to be in good condition. The operator completes a maintenance inspection on the drums on a weekly basis. A Hazardous Waste label was noted on all drums with the required identification. Municipal dumpster area does not appear to contain any hazardous waste. Perimeter of facility inspected - did not observe any water runoff or staining at this time. Hazardous Waste Emergency Response plan was available for review. Manifests and bills of lading for all hazardous waste streams were reviewed today. Ensure all hazardous waste manifests/disposal documents are maintained on site for at least three years from the date of transport and are available for review during normal business hours. Please continue to ensure all universal wastes (fluorescent lamps, mercury switches, batteries, [Truncated])

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	OBSERVATION: The generator has not made a hazardous waste determination for the spent media generated from the bead blasting equipment, to determine if it is hazardous. CORRECTIVE ACTION: Do not dispose of the spent media to the municipal dumpster unless it has been determined that the waste is non-hazardous. Have a representative sample of the waste tested by a state-certified laboratory for Title 22 CCR heavy metals and toxicity. Having the following analysis performed on the waste: a total threshold limit concentration (TTLC) analysis. Depending upon test results from the TTLC analysis, a soluble threshold limit concentration (STLC) analysis may be required. Submit the test results to this Agency within 30 days. If the waste is determined to be hazardous, then it must be managed as hazardous waste. If it is determined to be non-hazardous, the waste will not be regulated by this Agency. The generator may also opt to use generator knowledge that the waste is [Truncated]

Violation Division:	maintain the container closed while in storage. Submit a photo of the container to this Agency within 30 days.
Violation Program:	Orange County Environmental Health
Violation Source:	HW CERS,
Site ID:	422619
Site Name:	AnoChem Coatings
Violation Date:	07-08-2021
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 03/01/2022. OBSERVATION: Complete and current training documentation for all applicable employees was not available for review. Facility must conduct and document annual training for employees as specified in the employee training plan. CORRECTIVE ACTION: Please provide training records for the Hazardous Materials Business Plan with the following information documented: topic of training, date, employee name, employee signature. Submit documentation to this Agency within 30 days.
Violation Division:	Orange County Environmental Health

Violation Date: 03-21-2022
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 03/21/2022. OBSERVATION: The 55 gal container of waste nickel filters has been stored on site for over 180 days. Per the site contact, the approximate accumulation start time was June 2020. CORRECTIVE ACTION: Immediately have the hazardous waste hauled by a registered waste hauler. Submit a copy of the manifest to this Agency within 30 days.

Violation Date: 07-13-2021
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: OBSERVATION: The generator has not made a hazardous waste determination for the spent media generated from the bead blasting equipment, to determine if it is hazardous. CORRECTIVE ACTION: Do not dispose of the spent media to the municipal dumpster unless it has been determined that the waste is non-hazardous. Have a representative sample of the waste tested by a state-certified laboratory for Title 22 CCR heavy metals and toxicity. Having the following analysis performed on the waste: a total threshold limit concentration (TTLC) analysis. Depending upon test results from the TTLC analysis, a soluble threshold limit concentration (STLC) analysis may be required. Submit the test results to this Agency within 30 days. If the waste is determined to be hazardous, then it must be managed as hazardous waste. If it is determined to be non-hazardous, the waste will not be regulated by this Agency. The generator may also opt to use generator knowledge that the waste is [Truncated]

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters

of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Registry ID: 110002661548

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violations:

Site ID: 433557
Site Name: AT&T California - LC116
Violation Date: 09-20-2019
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 10/17/2019. DO reports for the months of September, July, April, March, January, November, and October were not signed by the owner/operator within 48 hours. Corrective action: Within 30 days, provide documentation of DO reports being signed within 48 hours by the owner/operator from the month of October to this agency.

WDS:

Name: LENNYS AUTO WRECKING
Address: 1045 E 6TH ST
City: SANTA ANA
Facility ID: Santa Ana River 30I018085
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: 7145417300
Facility Contact: Lenny Gomez

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS database may contain additional details for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Blaine, I apologize for mis-keying your first name on the report. I have very limited guidance regarding the radioactive materials. One of my co-workers has offered the following as an indicator or whether or not you need to disclose the radioactive sources: Do you fall into this category? (6) The business handles a radioactive material at any one time during the reporting year in quantities for which an emergency plan is required to be considered pursuant to Schedule C (Section 30.72) of Part 30 (commencing with Section 30.1), Part 40 (commencing with Section 40.1), or Part 70 (commencing with Section 70.1), of Chapter 1 of Title 10 of the Code of Federal Regulations, or pursuant to any regulations adopted [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-06-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Ben Mendoza Jr, Office Manager. Observed the facility and inspected hazardous materials storage. No hazardous materials were observed that met or exceeded threshold reporting values. The facility has reported that it stores up to 2,200 pounds of 600 basolit sulfur cement. REQUIREMENT FOR ELECTRONIC SUBMITTAL OF HMBEP DOCUMENTS: - Business Activities - Owner/Operator Information - Hazardous Materials Inventory - Site Map - Emergency Response Plan - Employee Training Plan The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Hazardous Materials documents can be submitted via the California Electronic [Truncated]

Eval Notes: From: Thomann, Blaine [mailto:Blaine.Thomann@ocpw.ocgov.com] Sent: Thursday, September 08, 2016 1:02 PM To: Freed, Dean <DFreed@ochca.com>; Perlas, Felix [OCPW] <felix.perlas@ocpw.ocgov.com> Cc: Kubasek, Chris [OCPW] <chris.kubasek@ocpw.ocgov.com>; Adler, Camille [OCPW] <camille.adler@ocpw.ocgov.com> Subject: RE: Hazmat inspection report Good Afternoon Dean, I looked into the sections you provided and found <http://www.nrc.gov/reading-rm/doc-collections/cfr/part030/part030-0072.html>. We currently have 6 soil moisture density gauges and 3 thin lift asphalt gauges. All combined, we have 81mCi of Cesium-137 and 240mCi of Americium-241. The threshold for reporting of these 2 radioactive materials is 3,000 Curies and 2 Curies, respectively. All told, these amounts fall far short of the limit requiring reporting of the possessed nuclear material. In our future reportings, we will remove reference to the nuclear materials. Thank you for your assistance in [Truncated]

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 02/06/2018. The hazardous waste labels were not legible and/or were missing the accumulation dates. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. During the inspection labels on the containers were completed and marked with all the required information.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Comments:	Not reported
Description:	Caller states a vehicle collided with a guy-line of a pole mounted transformer. This caused the transformer to fall to the ground and spill approximately 25 gallons of mineral oil onto asphalt, concrete, and then into a nearby gutter. The spill did not enter any storm drains and no waterways were impacted. A private contractor is performing the clean-up. The incident appears to be a "hit-and-run."

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS database may contain additional details for this site.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 02/14/2017. Chemicals over reportable quantities need to be disclosed to this Agency via CERS within 30 days. These reportable quantities are 55 gallons liquids, 200 cubic feet compressed gases, and 500 pounds solids. Please refer to occupainfo.com.

Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 390484
Site Name: CONNELLY MACHINE WORKS
Violation Date: 11-04-2019
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: Returned to compliance on 01/27/2020. The facility was observed to be operating two water jet systems. The system uses high pressure water and sand to cut metal parts. The water in the system is closed loop and does not leave the system. The waste sand is collected in a 55 gallon drum attached to the machine. The owner stated that the drum is filled with waste approximately once every two weeks, and the waste is sent to the municipal trash. Corrective action: Immediately discontinue send the sand waste to the municipal trash. Have a representative sample of the waste sent to a State Certified Laboratory to be tested using the Total Threshold Limit Concentration(EPA Method 6010B) test for the CAM 17 heavy metals. Provide documentation of the test results to this Agency within 60 days.

Violation Description: 6.95, Section(s) 25505(a)(4)
Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 11/07/2019. Annual hazardous material training has not been conducted. Corrective action: Provide annual training on hazardous materials stored at the facility, emergency notification, and emergency evacuation. Send a copy of the employee sign in sheet to this Agency within 30 days.

Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 01-06-2020
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Laboratory test results dated 11/8/2019 were received by this Agency. A sample of waste named Sand Garnet was tested using the Total Threshold Limit Concentration for the CAM17 heavy metals. The results indicated that additional analysis is required. The levels of Chromium and Nickel were near regulatory thresholds. Submit a sample of the Sand Garnet to a State Certified Laboratory and run a Soluble Threshold Limit Concentration(STLC) test to measure levels of Chromium and Nickel. Violation I325 is still outstanding, run the STLC to determine if the levels of Chromium and/or Nickel exceed regulatory thresholds and provide the results of the test to this Agency. Do not dispose of this waste until a hazardous waste determination has been completed. Disposal of this waste to a landfill would constitute illegal disposal and would require enforcement action. A copy of this report was sent to sean@connellymachine.com.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a

Reviewed facility's CERS HMBP submission. During the inspection I conducted on 1/12/17, I discussed with Sean Connelly certain requirements for the HMBP program and issues regarding their submittal. Marcia Samuyo is planning on attending a CERS portal training session for help. Chemical Inventory: Vasco 5000 Please correct the CAS No. Per inspection, I was told there is roughly 1,000 gallons of coolant in all the machines. On the site map it is noted there are 60 gallons in each of the 19 CNC machines and 60 gallons in each of the 11 Mills, which would together = 1,800 gallons. Along with the 2 55 gallon drums, the maximum daily amount should be 1,910,

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

The FINDS: database may contain additional details for this site.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Violations Found:	Yes
Eval Type:	Other, not routine, done by local agency
Eval Notes:	According to the CERS database, your business remains out of compliance with the annual certification requirement and a violation is being cited. Businesses are required to annually review and certify that their information in the California Electronic Reporting System (CERS) is complete, accurate and in compliance by March 1st. Your business was notified via email on March 27, 2024 that your facility was out of compliance with this requirement. Please note the following important details: 1) Complete submittal includes the HazMat Inventory AND the Emergency Plan / Training sections. Both sections must be submitted. 2) If your business qualifies (see below) you may submit 2024 via the Certify option available on CERS. You must be logged in to use. HMBP Certify: A business may use the Certify option button located on their forms page if: 1) A previous, complete submittal was made the prior year, and 2) The business is not subject to the Federal EPCRA reporting requirements, and 3) The

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-04-2013
Violations Found: No
Eval Type: Routine done by local agency

Eval Notes: On site for a hazardous materials disclosure inspection. Met with Chuy Ramirez who granted consent to inspect and to take photos. Previously reviewed the eSubmit information from Dana Glazer and declined the submission due to the disclosure of retail paint products and dry asphalt. The retail products and the dry asphalt products do not need to be disclosed. The large propane tank and the propane tanks on the 3 forklifts must be disclosed at the eSubmit website within the next 30 days. A copy of this report was sent to Dana Glazer via email. Observed that they have a 500 gallon propane tank for filling different sized containers. In addition there are 3-forklifts on site each with a 7 gallon propane tank. The propane requires notification. The eSubmit contact is Dana Glazer and a copy of this report will be sent to the contact.

information. Your submission cannot be accepted until we confirm the ownership information with your facility. Please verify that quantities for propane. A 500 gallon tank and three 7 gallon cylinders were observed during your last inspection. If this is still accurate, your maximum daily amount should therefore be 521 gallons and the average daily amount should reflect the average amount stored. You may disclose in either units of cubic feet or gallons, but it will be easier to use gallons in this case unless you wish to convert the units. Storage [Truncated]

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
