CERS Description: Hazardous Waste Generator

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-13-2020
Violations Found: No
Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Simotu Moemoe, Store Manager. The facility is a Very Small Quantity Generator of retail hazardous wastes. Aaron Medina of Fastech provided the following valid certifications: ICC, Veeder-Root, Vaporless, FE Petro. The manager, Chandra Thapa was also present during this inspection. There are three USTs onsite: 87 main, 87 siphon and 91. VR-208 sensors are in use in the fill and STP/piping sumps, and in all four UDCs. VR-420 sensors are in use in the dry annulars. Leak detection is provided by mechanical leak detectors (87 = FE Petro, 91 = Vaporless). Overfill prevention is provided by ATGs connected to an outside annunciator. The system is monitored by a Veeder-Root TLS-350 panel. This facility has 3 USTs - 1-15,000 Reg UL, 1-12000 Reg UL and 1-12000 Premium UL (Joor). Observed that the sensors in each turbine sump are properly located. There is a small amount of liquid (appears to water) in several of the sumps. This liquid is not enough to cause the sensor to alarm. Steve indicated that they will properly remove it and put it in the waste liquid container behind the store. He also informed me that the sensors (annular - 420 and sump/UDC - 208) were all properly operation when immersed in water. An audible/visual alarm was noted at the Veeder Root panel. The leak detectors are mechanical (FE Petro and VMI) which were tested this date. Please send a copy of the results within the next 30 days. Reviewed the [Truncated]

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site.
