Use Variance No 602

Dr. L. G. Nelson

The sign requested in this case contains some 230 square feet where a maximum of 100 square feet is allowed. The sign proposes to identify tenants of two buildings, one of which has not yet been started. One building is completed and is occupied and there is an existing sign advertising its tenants.

The sign as proposed extends 27 feet above grade and this is with only 3 feet of ground clearance rather than the ten feet required. There are 32 slots on each side for tenants names, each of which are 6 inches high. It seems that it would be extremely difficult for the passing motorist to read all of this list without creating serious traffic problems on Beach Boulevard.

The Staff can see no real justification for the request and would, therefore, recommend in the negative.
