The Secretary read the

The hearing was opened to the audience. Wm. P. Ficker, architect for the applicant, addressed the Commission and spoke in favor.

There being no further comment, the hearing was closed.

The Secretary informed the Commission that the proposed sign extends 27 feet above grade and this is with only 3 feet of ground clearance rather than the required 10 feet. It was further noted that it would be extremely difficult for the passing motorist to read the sign without creating serious traffic problems on Beach Boulevard.
